Title Page	i
Certificate of Approval	v
Certificate	vii
Acknowledgements	ix
Declaration	xi
Contents	xiii
Abstract	xvii
Abbreviations	xix
List of Symbols	xxi
Chapter 1 Introduction	1
1.1 Motivation	2
1.2 Literature Survey	5
1.3 Multi-Objective Mathematical Programming	9
1.4 Solution Methodology	14
1.4.1 Fuzzy Programming Method	15
1.4.2 Goal Programming Method	18
1.4.3 Weighting Method	21
1.5 Preliminaries on Fuzzy Set Theory	22
1.5.1 Nearest Trapezoidal Defuzzification	23
1.6 Mathematical Tools and Techniques	25
1.7 Objectives and Scope of the Thesis	27
1.8 The Structure of the Thesis	28
Chapter 2 Single Objective and Multi-Objective Multi-Choice Linear Programming Problems	33

2.1	Transformation of a Multi-Choice Linear Programming Problem	34
2.1.1	Mathematical Model	35
2.1.2	Transformation of Equivalent Models	35
2.1.3	Numerical Example	44
2.1.4	Results and Discussion	47
2.2	Generalized Transformation Techniques for Multi-Choice Linear Programming Problems	47
2.3	Multi-Choice Multi-Objective Linear Programming Problem	56
2.3.1	Mathematical Model	56
2.3.2	Equivalent Models	56
2.3.3	Numerical Example	57
2.4	Conclusions	63
 Chapter 3 Interpolating Polynomial Approach for Solving Multi-Choice Linear Programming Problem		65
3.1	Interpolating Polynomial Approach	66
3.1.1	Mathematical Model	66
3.1.2	Formulation of Interpolating Polynomials	66
3.2	Multi-Objective Multi-Choice Transportation Problem	73
3.2.1	Problem Formulation	73
3.2.2	Equivalent Mathematical Model	74
3.2.3	Numerical Example	76
3.3	Conclusions	82
 Chapter 4 Single Objective and Multi-Objective Probabilistic Programming Problems Involving Multi-Choice Parameters		83
4.1	Single Objective Probabilistic Programming Problems Involving Multi-Choice Parameters	84
4.1.1	Mathematical Model	84
4.1.2	Formulation of Deterministic Model	85
4.1.3	Transformation of Multi-Choice Programming	87
4.1.4	Numerical Example	88
4.2	Multi-Objective Probabilistic Programming Problems Involving Multi-Choice Parameters	91
4.2.1	Mathematical Model	91
4.2.2	Equivalent Deterministic Model	92
4.2.3	Transformation of Multi-Choice Programming	93

Contents

4.2.4 Numerical Example	94
4.2.5 Results and Discussion	97
4.3 Conclusions	97
 Chapter 5 Multi-Choice Linear Programming Problem Involving Fuzzy Parameters and Fuzzy Decision Variables.....	
5.1 Mathematical Model	100
5.2 Solution Procedures	100
5.2.1 Formulation of Interpolating Polynomial	103
5.3 Details of the Solution Procedure	105
5.4 Numerical Example	108
5.5 Conclusions	115
 Chapter 6 Multi-Objective Multi-Choice Mathematical Programming Model for Integrated Production Planning: A Case Study	
6.1 Preliminaries	119
6.2 Production Planning: Linear Programming Model	121
6.3 Steel Production in Rourkela Steel Plant	123
6.3.1 Factors in Steel Production Process	124
6.4 Mathematical Model Formulation	125
6.4.1 Model Description	126
6.4.2 Description of the Terms	126
6.4.3 Formulation of Constraints	128
6.4.4 Formulation of Objective Function	131
6.5 Presentation of Data	135
6.6 Solution Procedure	139
6.6.1 Fuzzy Programming Method	140
6.6.2 Weighting Method	141
6.7 Results and Discussion	142
6.8 Conclusions	143
 Chapter 7 Conclusions and Scope of Future Research	
7.1 Contributions of the Thesis	145
7.2 Conclusions	146
7.3 Scope for Future Research	146
 Bibliography	
	149
List of Research Papers (Published/ Communicated).....	
	165
