 CHAPTER 1	 INTRODUCTION	 1
1.1	General background	1
1.2	Objectives and scope of the present work	11
1.3	Layout of the thesis	12
 CHAPTER 2	 LITERATURE REVIEW	 15
2.1	Introduction	15
2.2	Processing of C-fibre based composites	15
2.3	Fibre architecture	17
2.4	Evaluation of mechanical strength and fracture toughness	21
2.5	Tribological behavior	28
2.5.1	Erosion test results	32
2.5.2	Reciprocating wear test results	33
2.6	Directions for further research	36
 CHAPTER 3	 Experimental procedure	 37
3.1	Introduction	37
3.2	Processing of C-fibre based composite	38
3.2.1	Processing of C/C composites	38
3.2.1.1	C-fibre preform	38
A.	Preparation of 2D carbon fibre preform	38
B.	Preparation of 3D carbon fibre preform	39
C.	Preparation of 4D carbon fibre preform	40
3.2.1.2	Pitch impregnation and densification	40
3.2.1.3	Three dimensional C/C-SiC composite	41
3.2.2	Processing of 2D C/P composite	43
3.2.3	Processing of 2D C/E composite	44
3.3	Characterization	45
3.3.1	Microstructural characterization	45
3.3.2	Surface topographic examination	46
3.3.3	Mechanical test	46

	3.3.3.1	Tensile test	46
	3.3.3.2	Three point bend tests for determination of flexural strength	47
	3.3.3.3	Fracture toughness tests	47
3.3.4		Tribological tests	48
	3.3.4.1	Solid particle erosion test	48
	A.	Dynamic hardness measurement	48
	B.	Erosion tests	49
	3.3.4.2	Continuous impact abrasion test	50
	3.3.4.3	Low amplitude reciprocating wear test	53
3.3.5		Selection of composites for test	54
3.4		Summary	55
CHAPTER 4		Microstructure and mechanical behavior	57
4.1		Introduction	57
4.2		Microstructure	57
4.3		Tensile and flexural strength	63
4.4		Fracture behavior	65
	4.4.1	Load-displacement plots	66
	A.	Load-displacement data of 2D, 3D and 4D C/C composites	66
	B.	Load-displacement data of 3D C/C-SiC composites	68
	C.	Load-displacement data of 2D C/P and 2D C/E composites	69
	4.4.2	Examination of the crack paths	72
	A.	C/C composites	72
	B.	3D C/C-SiC composite	75
	C.	2D C/P and 2D C/E composites	77
	4.4.3	Fracture resistance parameters	79
	4.4.3.1	Elastic-plastic fracture toughness parameters	79
	4.4.3.2	Total fracture energy release rate	82
4.5		Summary	87
CHAPTER 5		Tribological behavior – Solid particle erosion	89
5.1		Introduction	89
5.2		Results	89
	5.2.1	Mechanical properties	89
	5.2.2	Erosion rates	90
	5.2.3	Correlation with various mechanical properties	93
	5.2.4	Erosion efficiency	95
	5.2.5	Examination of the eroded surface	96
5.3		Comparison with literature	97
5.4		Erosion micromechanism	99
5.5		Summary	101

CHAPTER 6	Tribological behavior – Continuous impact abrasion test	103
6.1	Introduction	103
6.2	Topography of original surfaces	103
6.2.1	C/C composites	104
6.2.2	2D C/P and 2D C/E composites	105
6.3	Weight loss	105
6.3.1	C/C composites	106
6.3.2	2D C/P and 2D C/E composites	106
6.4	Continuous impact abrasion resistance	108
6.5	Study of the continuous impact abraded surfaces	110
6.5.1	Optical micrograph	110
6.5.1.1	C/C composites	110
6.5.1.2	2D C/P and 2D C/E composites	111
6.5.2	Depth of the abraded surface	113
6.5.2.1	C/C composites	113
6.5.2.2	2D C/P and 2D C/E composites	115
6.5.2.3	Relationship between weight loss and depth of crater formed on the abraded surfaces	116
6.5.3	Topography of the craters formed on composites subjected to CIAT	117
6.5.3.1	C/C composites	117
6.5.3.2	2D C/P and 2D C/E composites	118
6.5.4	Scanning electron microscopy	119
6.5.4.1	C/C composites	119
6.5.4.2	2D C/P and 2D C/E composites	122
6.6	Mechanisms of surface degradation by CIAT	123
6.7	Correlation of CIA resistance with mechanical properties	126
6.8	Summary	129
CHAPTER 7	Tribological behavior – Low amplitude reciprocating wear test	131
7.1	Introduction	131
7.2	Weight loss	131
7.3	Coefficient of friction	133
7.3.1	C/C composites	133
7.3.2	2D C/P and 2D C/E composites	135
7.4	Study of worn surfaces	138
7.4.1	Size and depth of the craters	138
7.4.1.1	C/C composites	138
7.4.1.2	2D C/P and 2D C/E composites	139
7.4.2	Surface topography	139
7.4.2.1	C/C composites	140
7.4.2.2	2D C/P and 2D C/E composites	142
7.4.3	Morphology of worn surfaces and wear debris	144

	7.4.3.1	C/C composites	144
	7.4.3.2	2D C/P and 2D C/E composites	145
7.5		Discussion	145
	7.5.1	Degradation by wear	145
	7.5.2	Correlation between weight loss and depth of crater	146
	7.5.3	Surface roughness, coefficient of friction and wear mechanisms	148
	7.5.3.1	C/C composites	148
	7.5.3.2	2D C/P and 2D C/E composites	152
7.6		Summary	153
CHAPTER 8		Summary and conclusions	155
8.1		Microstructure and mechanical behavior	155
8.2		Solid particle erosion behavior	157
8.3		Continuous impact abrasion behavior	157
8.4		Low amplitude reciprocating wear behavior	159
8.5		Impact of this study and direction for the further research	160
