Abstract		viii
Cont	ents	ix
Cha	pter-1: Introduction	
1.0	Introduction	1
Cha	pter-2: Literature Survey	
2.1	Introduction	7
2.2	History of wear	8
	2.2.1 Type of wear	9
2.3	General wear model	10
	2.3.1 Archard's wear model	10
	2.3.2 The contribution of the asperities in the wear model	12
	2.3.3 Chemical and thermal wear map model	13
	2.3.4 Mechanical wear map model	16
2.4	Mild and severe wear criteria	21
	2.4.1 Based on coefficient of friction	21
	2.4.2 Based on general observation of increasing severity of wear	24
	2.4.2.1 Mild wear regime	24
	2.4.2.2 Severe wear regime	25
2.5	Transition between mild and severe wear	26
	2.5.1 Load-dependent transition	27
	2.5.2 Velocity dependent transition	28
	2.5.3 Distance dependent transition	29
2.6	Wear and microstructure	30
2.7	Wear and mechanical properties	33
2.8	Effect of pre-straining on mechanical behaviour of material	35
2.9	Appraisal of the problem	38
Cha	pter-3: Materials Characterization	4.1
3.1	Introduction	41
3.2	Experimental procedure	41
	3.2.1 Material	41
	3.2.2 Metallographic examination	42
	3.2.2.1 Volume tractions of phases	43
	3.2.2.2 Grain size measurement	44
	3.2.2.3 Inclusion characterization	44
	3.2.3 Hardness measurement	45
2.2	3.2.4 Tensile test	46
3.3	Results and discussion	46

3.3	1 Microstructural characterization	46
3.3	2 Mechanical properties	49
3.4 Sur	nmary	54
Chapter-	: Effect of Pre-strain on Hardness and Tensile Properties	
4.1 Intr	oduction	57
4.2 Exp	erimental procedure	58
4.2	1 Pre-strained tensile preparation and test	58
4.2	2 Hardness measurement on the pre-strained specimens	59
4.3 Res	ults and discussions	59
4.3	1 Material and microstructure	59
4.3	2 Analysis of tensile parameters	59
4.3	3 Tensile behaviour	62
4.3	4 Effect of pre-strain on hardness and strength	63
4.3	5 Effect of pre-strain on ductility and tensile toughness	66
4.3	6 Effect of pre-strain on work hardening behaviour	69
4.4 Co	clusions	71
Chapter-	: Influence of Microstructure and Pre-strain on Wear	
	Behaviour	
5.1 Intr	oduction	73
5.2 Exp	erimental procedure	75
5.2.	Wear pin specimen preparation	75
5.2.2	Wear test	75
5.2.2	Hardness measurement	77
5.2.4	SEM examination	77
5.3 Res	ults and discussions	77
5.3	1 Material and microstructure	77
5.3	2 Selection transition load	78
	5.3.2.1 Sliding wear mechanism with different loads	81
5.3	3 Influence of microstructure and pre-strain on wear behaviour	84
5.3	4 Wear behaviour of the steels at critical pre-strain	89
5.3	5 Correlation of wear rate with other mechanical properties	92
5.4 Cor	clusion	96
Chapter-	: Wear Behaviour a Weld Joint	
6.1 Intr	oduction	97
6.2 Exp	erimental procedure	98
6.2	1 Material, processing and microstructures	98
6.2	2 Hardness and tensile tests	100
6.2	3 Wear tests	100
6.3 Res	ults and discussions	102
6.3	1 Microstructural analysis	102
6.3	2 Microhardness variation across the weld-joint	104
6.3	3 Tensile properties of base metal and weld-joint	107
6.3	4 Wear behaviour of base metal	108
6.3	5 Wear behaviour of weld metal	110
6.3	6 Wear behaviour of HAZ	115
6.3	7 Work-hardening of wear surface	120
6.3	8 Some generalization about wear behaviour of the weld-joint	122
6.4 Co	clusions	124
Chapter '	: Concluding Remarks and Suggestions for further Research	
7.1 Co	cluding remarks	125

7.2 Suggestions for further research	128
References	129
