

PREFACE

The present thesis contains results of theoretical investigations about electronic energy states of some specific models of disordered systems. A substantial part of the work reported in the thesis has been published in relevant scientific journals, which have been referred to in the text at appropriate places. No part of this work has been submitted for the award of any other degree.

The author wishes to express his deep sense of gratitude to Dr. C.L. Roy, Assistant Professor, Department of Physics and Meteorology, Indian Institute of Technology, Kharagpur, for kindly suggesting the subject of the thesis and for his valuable guidance and supervision throughout the course of the present investigation.

It is a pleasure on the part of the author to record his sincere regards to Professor H. N. Bose, Head of the Department of Physics and Meteorology, Indian Institute of Technology, Kharagpur, whose stimulating contact has always been a source of inspiration. The author is also indebted to Professor G. Bandyopadhyay for his constant encouragement and keen interest all along the period in which the present work was carried out.

The author takes this opportunity to thank the authorities of the Indian Institute of Technology, Kharagpur for awarding him a research scholarship and for extending to him all facilities for carrying out the present work. Thanks are also due to the members of staff of the IBM 1620 Computer Centre at the Indian Institute of Technology, Kharagpur for their help in computational work. Lastly, the author is thankful to Mr. A. K. Bose for typing the thesis.
