Chapter 1 Introduction	
1.1 Overview of Transition Metal Oxides	1
1.2 HTSC Oxides	2
1.2.1 Normal State Properties	3
I Resistivity	3
II Hall Angle	4
III Thermopower	4
IV ARPES	6
V Tunneling Spectra	7
VI Optical Conductivity	9
1.2.1.1 Magnetic Properties	10
1.2.1.2 Structural Properties	13
1.2.2 Superconducting Properties	16
1.2.3 Theoretical Model for Cuprates	19
1.3 CMR Oxides	26
1.3.1 Common Structure	26
1.3.2 Structural Properties	30
1.3.3 Transport Properties	32
1.3.4 Theoretical Models for CMR Oxides	35
1.4 Objectives	38
1.5 References	40
 Chapter 2 Electronic Structure - Pseudogap	
2.1 Introduction	47
2.2 Model and Calculations	47
2.3 Results and Discussions	52
2.3.1 Dispersion	52

2.3.2	Spontaneous Strain	56
2.3.3	Phase Diagram	58
2.3.4	Thermal Variation of Strain	59
2.4	Conclusion	62
2.5	References	63

Chapter 3 Physical Properties of Normal State Cuprates

3.1	Introduction	64
3.2	Resistivity and Thermopower	64
3.2.1	Calculation	65
3.2.2	Results and discussions	66
3.3	Optical Conductivity	72
3.3.1	Calculation	72
3.3.2	Results and Discussions	74
3.4	Magnetoresistance	75
3.4.1	Calculation	75
3.4.2	Results and Discussions	76
3.5	Knight Shift and Spin-lattice Relaxation Rate	78
3.5.1	Calculation	79
3.5.2	Results and Discussions	81
3.6	Conclusion	83
3.7	References	84

Chapter 4 Superconductivity With Multi-component Order Parameter

4.1	Introduction	86
4.2	Model and Calculation	87
4.3	Results and Discussions	92
4.3.1	Phase Diagram	92
4.3.2	Order Parameters	92

4.3.3	Multi-component Density of States	94
4.3.4	d-wave Features	97
4.4	Conclusion	100
4.5	References	100

Chapter 5 Coexistence of Pseudogap and Superconducting Gap

5.1	Introduction	102
5.2	Model and Calculations	103
5.3	Results and Discussions	106
5.3.1	Effect of Superconducting Gap on Pseudogap	107
5.3.2	Effect of Pseudogap on Superconducting Gap	107
5.3.3	Phase Diagram	108
5.3.4	Density of States in Coexistence Region	110
5.4	Coexistence of Pseudogap and d-wave Superconducting Gap	112
5.5	Conclusion	113
5.6	References	114

Chapter 6 K-dependent Pseudogap

6.1	Introduction	115
6.2	Model and Calculations	116
6.3	Results and Discussions	118
6.3.1	Spectral Density	118
6.3.2	Dispersion	121
6.3.3	Density of States	122
6.4	Conclusion	124
6.5	References	124

Chapter 7	Magnetostriction and Transport in Manganite System	
7.1	Introduction	126
7.2	Model and Calculations	127
7.3	Results and Discussions	132
7.4	Phonon Frequency	139
7.5	Effect of Inter-orbital Hopping	140
7.6	Transport Properties	141
7.6.1	Effect of Spontaneous Strain	141
7.6.2	Effect of Residual Strain	143
I.	Calculations	144
II.	Results and Discussions	145
7.7	Conclusion	148
7.8	References	150
Summary		152
Future Work		156
