SEGMENTED POINT PROCESS MODELS FOR MAINTAINED SYSTEMS

Thesis submitted to Indian Institute of Technology, Kharagpur for the award of the degree

of

Doctor of Philosophy

by

Annamraju Syamsundar

under the guidance of Dr. V. N. A. Naikan

CERTIFICATE OF APPROVAL

Dt. 07.07.2009

Certified that the thesis entitled SEGMENTED POINT PROCESS MODELS FOR MAINTAINED SYSTEMS submitted by ANNAMRAJU SYAMSUNDAR to Indian Institute of Technology, Kharagpur, for the award of the degree of Doctor of Philosophy has been accepted by the external examiners and that the student has successfully defended the thesis in the viva-voce examination held today.

Signature Name Dr.S.K.Chaturvedi (Member of the DSC) Signature Name Dr. J. Maiti (Member of the DSC) Signature Name Dr. R.B.Misra (Member of the DSC)

Signature Name Dr. V.N.A.Naikan (Supervisor) Signature Name Dr. P.V.Varde (External Examiner) Signature Name Dr. V.N.A.Naikan (Chairman)

DECLARATION

I certify that

- a. the work contained in this thesis is original and has been done by me under the guidance of my supervisor.
- b. the work has not been submitted to any other Institute for any degree or diploma.
- c. I have followed the guidelines provided by the Institute in preparing the thesis.
- d. I have conformed to the norms and guidelines given in the Ethical Code of Conduct of the Institute.
- e. whenever I have used materials (data, theoretical analysis, figures, and text) from other sources, I have given due credit to them by citing them in the text of the thesis and giving their details in the references. Further, I have taken permission from the copyright owners of the sources, whenever necessary.

CERTIFICATE

This is to certify that the thesis entitled **Segmented Point Process Models for Maintained Systems**, submitted by **Annamraju Syamsundar** to Indian Institute of Technology, Kharagpur, is a record of bona fide research work under my supervision and is worthy of consideration for the award of the degree of Doctor of Philosophy of the Institute.

Date:

(V. N. A. Naikan) Associate Professor & Head Reliability Engineering Centre, Indian Institute of Technology, Kharagpur-721302, India

Acknowledgement

This thesis is the result of a. study on the modelling of industrial maintained systems working under changing / dynamic environments resulting in the development of "Segmented Point Process Models for Maintained Systems" and demonstrating their effectiveness when used for the modelling of such systems. The study was undertaken at the Indian Institute of Technology, Kharagpur under the Ph.D. study program for Reliability Engineering. The work was also partially carried out at Visakhapatnam Steel Plant a 3.4 MT integrated steel works at Visakhapatnam from where the required data was obtained.

The study was accomplished under the Supervision of Associate Professor Dr. V. N. A. Naikan and under the guidance of Professor Dr. R. B. Misra, Associate Professor Dr. J. Maiti, and Assistant Professor Dr. S. K. Chaturvedi.

First of all I would like to thank Dr. B. Pradhan who provided me with the inspiration and the motivation to undertake research work at a premier institute like the Indian Institute of Technology, Kharagpur.

I would like to express my gratitude to all the people who have provided me advice, help, cooperation and encouragement during the course of the study, particularly Dr. V. N. A. Naikan, Dr. R. B. Misra, Dr. J. Maiti, Dr. S. K. Chaturvedi, and Dr. N. K. Goyal. I will be forever beholden to Dr. Olivier Gaudoin for his idea, in a casual discussion at a conference that formed the genesis of this work. I would also like to thank Dr. P. K. J. Mohapatra whose course gave me the requisite grounding in statistics for carrying out the work.

I would like to thank my friend and co-researcher Edwin Vijay Kumar with whom I shared all my frustrations and agonizing moments on the way to my goal. I would like to thank Dr. G. Rama Devi for providing valuable help in improving the presentation of my work and bringing it to its present form.

I would like to thank the total top management of my organization Visakhapatnam Steel plant, whose very active encouragement made this work possible. I would like to thank all my senior colleagues whose constant support and encouragement under trying circumstances and lack of time motivated me to continue my work.

I would also like to thank my colleagues in the Mechanical section of Steel Melting Shops for providing an encouraging and stimulating environment and for their friendship, cooperation and support.

I would forever be grateful to my partner Sujatha for her love and patience during the PhD period, for supporting and encouraging me despite her great personal suffering.

I would forever cherish the love and encouragement of my parents especially my mother but for whose constant encouragement and belief in my abilities would not have made this possible.

I would treasure the love of my daughter who sacrificed the need for my help in her own studies to permit me to complete this work.

I would be grateful to all those who have been associated with my study, and helped me in shaping my ideas and bringing them to fruition, the editors and the reviewers of my papers and the reviewers of my thesis.
