

Contents

List of Figures	v
List of Tables	ix
List of Symbols and Abbreviations	xi
1 Introduction	1
1.1 Motivations of the Present Work	6
1.2 Objectives of the Thesis Work	6
1.3 Outline of this Dissertation	7
2 CT System	9
2.1 Introduction	9
2.2 Fundamental Principles of CT	9
2.3 Overview of a CT System	11
2.4 Description of CT system	12
2.4.1 CT scanner gantry	12
2.4.2 Data Acquisition System (DAS)	13
2.4.2.1 First Generation CT Scanner	14
2.4.2.2 Second Generation CT Scanner	15
2.4.2.3 Third Generation CT Scanner	15
2.4.2.4 Fourth Generation CT Scanner	16
2.4.2.5 Spiral Scanner	17
2.4.2.6 Multi-slice Spiral Scanner	19
2.4.3 Image Processing Unit	22
2.4.4 Display Unit	23
2.5 Concluding Remarks	25
3 Reconstruction of Cone-beam CT	27
3.1 Introduction	27

3.2	Literature Survey	28
3.3	Katsevich Algorithm	30
3.3.1	Filtering	32
3.3.1.1	Derivative and Weighting	32
3.3.1.2	Forward Height Rebinning	32
3.3.1.3	Hilbert Transform	33
3.3.1.4	Backward Height Rebinning	33
3.3.2	Backprojection	33
3.4	Implementation of the Katsevich Algorithm	34
3.5	Architecture of the Backprojection	37
3.5.1	Architecture of g^F_calc Unit	40
3.5.2	Architecture of rho_calc Unit	43
3.6	Results and Discussions	45
3.6.1	Simulation Results	46
3.6.2	Hardware Results	46
3.7	Concluding Remarks	49
4	Visualization Using Two Dimensional Affine Transform	51
4.1	Introduction	51
4.2	Overview of 2D Affine Transform	53
4.3	Existing Architectures	55
4.4	Proposed Algorithms	56
4.4.1	Proposed ATPR Algorithm	56
4.4.2	Proposed MATPR Algorithm	58
4.5	Architectural Design of ATPR algorithm	61
4.5.1	Input Selection Unit	62
4.5.2	Coordinate Generation Unit	63
4.5.3	Affine Data Path Unit	63
4.5.3.1	Affine Transformation Unit	65
4.5.3.2	Interpolation Unit	66
4.5.4	Memory Controller Unit	69
4.6	Architectural Design of MATPR algorithm	70
4.6.1	Coordinate Transformation Unit	71
4.6.2	Memory Reorganisation	72
4.6.3	Interpolation and its Architecture	76

4.7	Results and Discussions	78
4.7.1	Simulation results	78
4.7.1.1	Computation Analysis	80
4.7.1.2	Image Quality Assessment	81
4.7.2	Hardware Performance Analysis	82
4.8	Concluding Remarks	86
5	Three Dimensional Affine Transform	87
5.1	Introduction	87
5.2	Overview of 3D Affine Transform	89
5.3	Proposed Algorithm	90
5.4	Architecture of Proposed Algorithm	95
5.4.1	Input Selection Unit	96
5.4.2	Coordinate Transformation Unit	96
5.4.3	Memory Management Strategy	98
5.4.4	Interpolation Unit	102
5.5	Results and Discussions	107
5.5.1	Simulation Results	107
5.5.1.1	Computational Analysis	107
5.5.1.2	Image Quality Analysis	109
5.5.2	Implementation Results	112
5.6	Concluding Remarks	113
6	Conclusions	115
6.1	Contributions	119
6.2	Limitation and Future scopes	119
