Abstract	xxxiii
<b>1 Introduction</b>	<b>1</b>
1.1 Moving object segmentation . . . . .	2
1.1.1 Stages in background subtraction . . . . .	3
1.1.2 Challenges . . . . .	5
1.1.3 Review of literature on background subtraction . . . . .	9
1.1.4 Our research directions on moving object detection . . . . .	15
1.2 Object tracking . . . . .	15
1.2.1 Literature review on Particle filter based object tracking . . . . .	16

---

## CONTENTS

1.2.2	Our research directions on object tracking . . . . .	18
1.3	Contributions . . . . .	19
1.4	Organization of the thesis . . . . .	20
<b>2</b>	<b>Covariance based background subtraction approaches</b>	<b>23</b>
2.1	Introduction . . . . .	24
2.2	Outline of our proposed approaches on covariance based background subtraction . . . . .	24
2.3	Statistical texture feature based background subtraction (STBS) . . . . .	27
2.3.1	Construction of covariance matrix . . . . .	27
2.3.2	Mahalanobis distance measure . . . . .	30
2.3.3	Background modeling . . . . .	30
2.3.4	Foreground detection . . . . .	32
2.3.5	Parameters value selection . . . . .	32
2.3.6	Computational Complexity . . . . .	33
2.4	Spatially correlated background subtraction, based on adaptive background maintenance . . . . .	34
2.4.1	Feature vector . . . . .	34
2.4.2	Calculation of mean and covariance matrix . . . . .	36
2.4.3	SCBS algorithm . . . . .	36
2.5	Results and discussions . . . . .	39
2.5.1	Effects of parameter choice on performance . . . . .	49
2.6	Summary . . . . .	52
<b>3</b>	<b>Fuzzy aggregation of intensity and texture features for robust detection of moving objects</b>	<b>55</b>
3.1	Introduction . . . . .	56
3.2	Fuzzy based background subtraction using intensity and texture features . . . . .	57
3.2.1	Computation of feature vector . . . . .	57
3.2.2	Mathematics behind the feature aggregation . . . . .	58
3.2.3	Simple feature aggregation (I, ST) by fuzzy integral . . . . .	59
3.3	Extended fuzzy based background subtraction (EFBS) . . . . .	61
3.3.1	Background modeling . . . . .	61
3.3.2	Foreground detection . . . . .	64
3.3.3	Parameter value selection . . . . .	64
3.4	Results and discussions . . . . .	66
3.5	Summary . . . . .	76

## CONTENTS

---

<b>4 Distribution based background subtraction approaches</b>	<b>77</b>
4.1 Introduction . . . . .	78
4.2 Our contributions on block-based distributions . . . . .	78
4.3 Robust detection of moving objects in video sequences through rough set theory framework . . . . .	82
4.3.1 Rough sets and Histon . . . . .	82
4.3.2 Extended concepts for histon . . . . .	86
4.3.3 Proposed roughness indices-based algorithm . . . . .	87
4.4 Detection of Moving Objects Using Multi-color Kernel Fuzzy Correlogram Based Background Subtraction . . . . .	90
4.4.1 Multi-color Kernel Fuzzy Correlogram . . . . .	90
4.4.2 Background subtraction algorithm using MKFC . . . . .	95
4.5 Results and discussions . . . . .	96
4.5.1 Spatial correlation approaches (3D HRI and 3D FHRI) . . . . .	96
4.5.2 Inter-pixel relation-based approach (MKFC) . . . . .	105
4.6 Comparison between all our proposed background subtraction approaches	117
4.7 Summary . . . . .	124
<b>5 Object tracking</b>	<b>127</b>
5.1 Introduction . . . . .	128
5.2 Contributions . . . . .	128
5.3 Particle filter . . . . .	130
5.4 Object tracking based on fuzzy particle filter in a rough set theory framework . . . . .	131
5.4.1 Observation model . . . . .	131
5.4.2 Multi-cue fusion using fuzzy integral . . . . .	132
5.4.3 Tracking algorithm . . . . .	132
5.5 Adaptive fuzzy particle filter based on color rough set features and fuzzy texture features . . . . .	136
5.5.1 Observation model . . . . .	137
5.5.2 Multi-cue fusion using fuzzy integral . . . . .	138
5.5.3 Adaptive tracking algorithm . . . . .	139
5.6 Results and discussions . . . . .	140
5.6.1 HRI & FHRI particle filter . . . . .	141
5.6.2 3D HRI & 3D FHRI particle filters . . . . .	149
5.7 Summary . . . . .	154
