CHAPTER - I	INTRODUCTION	1-12
1.1	Design of Transplanting Mechanism	5
1.2	Velocity of Planting Finger	11
1.3	Force Requirement	11
1.4	Objectives	12
CHAPTER - II	REVIEW OF LITERATURE	13-35
2.1	Rice Cultivation	13
2.2	Transplanting Operation	14
2.3	Mechanical Rice Transplanters	15
2.4	Preparation of Seedling for Transplanting	15
2.4.1	Soil preparation	16
2.4.2	Preparation of sprouted seeds	16
2.4.3	Seedbed preparation and sowing of nursery	17
2,5	Seedling Characteristics with respect to Mechanical	19
	Transplanter	
2.5.1	Seedling height	19
2.5.2	Plant density or number of seedlings/ cm ²	19
2.5.3	Moisture content of mat	20
2.5.4	Machine parameters	20

2.6		Design and Performance of Mechanical Rice	20
		Transplanters	
	2.6.1	Requirements of a mechanical transplanter	20
	2.6.2	Manually operated transplanters	21
	2.6.3	Animal operated transplanters	23
	2.6.4	Power operated transplanters	24
2.7		Forces, Moments and Energy Requirements of a	26
		Transplanting Mechanism	
	2.7.1	Analysis of path of motion and velocity of finger in a	28
		power operated transplanter	
	2.7.2	Analysis of path of motion of finger using vector	28
		loop equation	
	2.7.3	Velocity analysis of finger using vector loop equation	31
2.8		Force Transducers	32
	2.8.1	Characteristics of strain gauge	32
	2.8.2	Wheatstone bridge circuit	33
	2.8.3	Cantilever load cell	35
	2.8.4	Proving ring	35
CHAPTER -	III	THEORETICAL CONSIDERATION	36-52
3.1	III	General	36
	ш	General Analysis of Motion and Velocity of Finger in Self	
3.1		General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter	36 36
3.1	III 3.2.1	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting	36
3.1	3.2.1	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method	36 36
3.1		General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting	36 36
3.1	3.2.1	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat	36 36 37
3.1	3.2.1	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation	36 36 37
3.1	3.2.1 3.2.2	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI	36 36 37 40
3.1	3.2.1 3.2.2 3.2.3	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation	36 36 37 40 42
3.1	3.2.1 3.2.2 3.2.3	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI	36 36 37 40 42
3.1 3.2	3.2.1 3.2.2 3.2.3	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI type manual rice transplanter	36 36 37 40 42 43
3.1 3.2	3.2.1 3.2.2 3.2.3 3.2.4	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI type manual rice transplanter Design of Laboratory Model Rice Transplanter	36 36 37 40 42 43 45
3.1 3.2	3.2.1 3.2.2 3.2.3 3.2.4	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI type manual rice transplanter Design of Laboratory Model Rice Transplanter Velocity of transplanting finger in the laboratory	36 36 37 40 42 43 45
3.1 3.2	 3.2.1 3.2.2 3.2.3 3.2.4 3.3.1 	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI type manual rice transplanter Design of Laboratory Model Rice Transplanter Velocity of transplanting finger in the laboratory model rice transplanter	36 36 37 40 42 43 45 48
3.1 3.2	 3.2.1 3.2.2 3.2.3 3.2.4 3.3.1 	General Analysis of Motion and Velocity of Finger in Self Propelled Yanji Shakti Transplanter Analytical determination of path of transplanting finger using vector loop method Path of motion of finger, velocity of finger and finger orientation angle through the seedling mat Velocity of finger during seedling separation Analysis of motion and velocity of finger in IRRI type manual rice transplanter Design of Laboratory Model Rice Transplanter Velocity of transplanting finger in the laboratory model rice transplanter Design of force transducer for measuring bending	36 36 37 40 42 43 45 48

CHAPTER - IV	V	METHODS AND MATERIALS	53-96
4.1		General	53
4.2		Preparation of Mat Type Seedlings	53
	4.2.1	Preparation of pre-germinated seeds	53
	4.2.2	Preparation of seedlings in nursery frames	54
4.3		Growth Stage of Seedlings for Transplanting	56
4.4		Plant Population Density	57
	4.4.1	Justification	57
	4.4.2	Objective	57
	4.4.3	Facilities, equipments and accessories used	57
	4.4.4	Design of experiment	58
	4.4.5	Procedure	58
4.5		Determination of Root Mass per Unit Area	60
	4.5.1	Justification	60
	4.5.2	Objective	60
	4.5.3	Design of experiment	60
	4.5.4	Procedure	61
4.6		Preliminary Trials on Seedlings Separation Using	63
		Seedling Separating Tool	
	4.6.1	Development of hand seedling separating tool	63
	4.6.2	Determination of force required to separate seedlings	65
		from a seedling mat using hand operated seedling	
		separating tool	
4.7		Determination of Path of Motion of Finger in Rice	66
		Transplanter	
4.8		Development of Laboratory Model Rice Transplanter	68
	4.8.1	Transplanting unit	71
	4.8.2	Seedling tray and tray movement mechanism	74
	4.8.3	Power transmission system	76
	4.8.4	Variable speed motor and speed control unit	78
	4.8.5	Main frame	79
4.9		Development of Instruments for Measurement of	79
		Force Acting on the Transplanting Finger and Other	
		Parameters of the Laboratory Model Transplanter	
	4.9.1	Revolution counter	79
	4.9.2	Force transducers	81
4.10		Effect of Wetting of Seedling Mat on Seedling	85
		Separation by Mechanical Finger	

	4.10.1	Objective	85
	4.10.2	Facilities, equipments and accessories used	86
	4.10.3	Design of experiment	86
	4.10.4	Procedure	88
4.11		Determination of Force Required for Separation of	91
		Seedlings by Finger of Mechanical Transplanter	
	4.11.1	Justification	91
	4.11.2	Objective	91
	4.11.3	Facilities, equipments and accessories used	91
	4.11.4	Independent and dependent variables	92
	4.11.5	Design of experiment	93
	4.11.6	Procedure	93
CHAPTER	- V	RESULTS AND DISCUSSION	97-167
5.1		Preparation of Mat Type Seedlings	97
5.2		Growth Stage of Seedlings for Transplanting	98
5.3		Plant Population Density	99
5.4		Root Mass Per Unit Area	99
5.5		Preliminary Trials on Seedlings Separation Using	100
		Seedling Separating Tool	
	5.5.1	Calibration of the spring used on hand operated	100
		seedling separating tool	
	5.5.2	Determination of force required to separate the mat	101
		seedlings using hand operated seedling separating	
		tool	
5.6		Determination of Path of Motion of Finger in Rice	101
		Transplanter	
5.7		Calibration of Bending Force and Axial Force	102
		Transducers Attached on the Finger and Ring of	
		Laboratory Model Rice Transplanter	
5.8		Effect of Wetting of Seedling Mat on Seedling	103
		Separation by Mechanical Finger	
5.9		Determination of Force Required for Separation of	105
		Seedlings by Finger of Mechanical Transplanter	
	5.9.1	Effect of planting speed, age of seedlings and seed	105
		rate on average tangential force. (15 mm thick mat)	
	5.9.2	Effect of planting speed, age of seedlings and seed	107
		rate on average radial force (15 mm thick mat)	

5.9.3	Effect of planting speed, age of seedlings and seed rate on average resultant force (15 mm thick mat)	111
5.9.4	Effect of planting speed, age of seedlings and seed rate on peak tangential force (15 mm thick mat)	115
5.9.5	Effect of planting speed, age of seedlings and seed rate on peak radial force (15 mm thick mat)	119
5.9.6	Effect of planting speed, age of seedlings and seed rate on peak resultant force (15 mm thick mat)	123
5.9.7	Effect of planting speed, age of seedlings and seed rate on average energy requirement during seedling separation per millisecond (15 mm thick mat)	127
5.9.8	Effect of planting speed, age of seedlings and seed rate on total energy requirement during seedling separation (15 mm thick mat)	128
5.9.9	Force experienced by finger with 15 mm seedling mat	130
5.9.10	Effect of planting speed, age of seedlings and seed rate on average tangential force (20 mm thick mat)	131
5.9.11	Effect of planting speed, age of seedlings and seed rate on average radial force (20 mm thick mat)	136
5.9.12	Effect of planting speed, age of seedlings and seed rate on average resultant force (20 mm thick mat)	140
5.9.13	Effect of planting speed, age of seedlings and seed rate on peak tangential force (20 mm thick mat)	144
5.9.14	Effect of planting speed, age of seedlings and seed rate on peak radial force (20 mm thick mat)	148
5.9.15	Effect of planting speed, age of seedlings and seed rate on peak resultant force (20 mm thick mat)	152
5.9.16	Effect of planting speed, age of seedlings and seed rate on average energy requirement during seedling separation per millisecond (20 mm thick mat)	156
5.9.17	Effect of planting speed, age of seedlings and seed rate on total energy requirement during seedling separation (20 mm thick mat)	160
5.9.18	Force experienced by finger with 20 mm seedling mat	164
5.9.19	Number of seedlings separated per cycle	165

5.9.20	Force requirement at the finger of manually operated rice transplanter	165
5.9.21	Summary range of the model parameters with various combinations	166
CHAPTER - VI	SUMMARY AND CONCLUSIONS	168-
