	Preface	V
	Abstract	vii
	Contributions	viii
Chapter 1	Introduction	1-26
1.1	Polymer composites	1
1.2	Polymer nanocomposites	2
1.3	Nanofillers	3
1.4	Polymer layered silicate nanocomposites	5
1.5	Types and microstructure of polymer- montmorrilonite clay nanocomposites	6
1.6	Preparative methods	7
1.6.1	In-situ polymerization	8
1.6.2	Melt intercalation	8
1.6.3	Solution intercalation	8
1.7	Applications of polymer clay nanocomposites	9
1.8	Polymer matrices for nanocomposites with layered silicate clays	11
1.8.1	Elastomers	11
1.8.2	Thermoset Resins	12
1.8.3	Thermoplastic Elastomers (TPE)	12
1.8.4	Thermoplastics	17
1.9	Scope and Objectives of the thesis	17
1.10	Reference	20
Chapter 2	Experimental	27-45
2.1	Introduction	27
2.2	Materials	27
2.2.1	Block copolymer	27
2.2.2	Layered silicates (nanoclays)	28
2.2.3	Solvent	29
2.3	Sample preparation	29
2.3.1	Neat and modified SEBS samples	29
2.3.2	Preparation of samples by solution intercalation process	32
2.3.3	Preparation of samples by melt intercalation process	32
2.3.4	Preparation of AA-, MA - , and S -SEBS - clay hybrid nanocomposites	33
2.4	Characterization	34
2.5	References	44

Chapter	r 3	Preparation and Characterization of Thermoplastic Elastomeric Nanocomposites from Poly [styrene- (ethylene-co- butylene) - styrene] and Montmorillonite Nanoclay	47-71	
3.1		Introduction	47	
3.2		Results and discussion	49	
	3.2.1	Evolution of morphologies in different selective solvents	49	
	3.2.2	Influence of block molecular weight on morphologies of SEBS in toluene	51	
	3.2.3	X-ray diffraction analysis of solution cast samples	52	
	3.2.4	FTIR analysis of solution cast samples	54	
	3.2.5	Morphological analysis by TEM of solution cast samples	56	
	3.2.6	Morphological analysis using AFM at bulk of the solution cast samples	57	
	3.2.7	Dynamic mechanical thermal analysis of solution cast samples	59	
	3.2.8	Analysis of mechanical properties of solution cast samples	62	
	3.2.9	Morphology and properties: melt vs solution cast process	64	
3.3		References	69	
Chapter	r 4	Detailed Morphological Mapping of Poly [styrene- (ethylene- co-butylene) - styrene] and its Clay Nanocomposites by Atomic Force Microscopy	73-82	
4.1		Introduction	73	
4.2		Results and discussion	74	
	4.2.1	Surface morphology of neat SEBS	74	
	4.2.2	Effect of nanoclays on the surface morphology	78	
	4.2.3	X-ray diffraction and transmission electron microscopy studies	81	
4.3		References	82	
Chapte	r 5	Quantification of Surface Forces of Thermoplastic Elastomeric Nanocomposites based on Poly [styrene- (ethylene-co-butylene)- styrene] and Clay by AFM	83-101	
5.1		Introduction	83	
5.2		Results and discussion	86	
	5.2.1	Examination of surface morphology	86	
	5.2.2	'Force' determined at a single point	89	
	5.2.3	'Force volume' imaging	94	
	5.2.4	Elasticity maps	97	
5.3		References	100	
Chapter	r 6	Effect of Polar Modification on Morphology and Properties of SEBS and its Montmorillonite Clay Based Nanocomposites	103-126	
6.1		Introduction	103	
6.2		Results and discussion	106	
	6.2.1	Effect of grafting of AA and MA onto SEBS	106	

6.2.2	Morphological investigation of AA and MA - grafted SEBS	110	
6.2.3	Mechanical and thermo-mechanical properties	113	
6.2.4	Thermal degradation properties	115	
6.2.5	Effect of montmorillonite nanoclays on properties and morphology of grafted SEBS- clay nanocomposites	116	
6.2.6	Thermodynamics behind nanocomposite formation	123	
6.3	References	125	
Chapter 7	Sulphonated Poly [styrene (ethylene-co-butylene) styrene] - Montmorillonite Clay Nanocomposites: Synthesis, Morphology and Properties	127-140	
7.1	Introduction	127	
7.2	Results and discussion	128	
7.2.1	Sulphonation of SEBS	128	
7.2.2	Morphological shift on sulphonation	129	
7.2.3	Tensile stress-strain properties of S-SEBS and their nanocomposites	134	
7.2.4	Thermal degradation properties	134	
7.2.5	Water-methanol uptake properties	135	
7.2.6	AC resistance in dry and wet modes	137	
7.3	References	139	
Chapter 8	Insights into Montmorillonite Nanoclay based ex-situ Nanocomposites from SEBS and modified SEBS by Small Angle X-ray Scattering and Modulated DSC studies	141-155	
8.1	Introduction	141	
8.2	Results and discussion	142	
8.2.1	SAXS studies for neat SEBS and its clay based nanocomposites	142	
8.2.2	SAXS studies for chemically modified SEBS and their clay nanocomposites	145	
8.2.3	DSC studies	148	
8.2.4	MDSC [®] for different SEBS samples	149	
8.2.5	Morphological proof by AFM and TEM	152	
8.3	References	154	
Chapter 9	Summary and Conclusions	157-161	
9.1	Summary and Conclusions	157
