

LIST OF TABLES

Table 4.1: List of 45 Items ..	42
Table 4.2: Five Sale Transactions of 45 Items with Quantity ..	43
Table 4.3: Association Rules for Threshold Values of 20% Support and 50% Confidence ..	46
Table 4.4: Association Rules for Threshold Values of 20% Support and 65% Confidence ..	47
Table 4.5: Association Rules for Threshold Values of 20% Support and 80% Confidence ..	47
Table 4.6: Association Rules for Threshold Values of 30% Support and 50% Confidence ..	48
Table 4.7: Association Rules for Threshold Values of 30% Support and 65% Confidence ..	48
Table 4.8: Association Rules for Threshold Values of 30% Support and 80% Confidence ..	48
Table 4.9: Observation of Purchase Dependency in Period-I ..	51
Table 4.10: Observation of Purchase Dependency in Period-II ..	53
Table 4.11: Lost Sale due to Purchase Dependency ..	55
Table 4.12: Average Daily Inventory in Period-I ..	56
Table 4.13: Average Daily Inventory in Period-II ..	57
Table 4.14: Summary of Profit Calculation in Period-I and Period-II ..	58
Table 4.15: Annual Demand, Unit Price and Monetary Value of the Inventory Items ..	64
Table 4.16: ABC Classification of the Items ..	64
Table 4.17: HML Classification of the Items ..	65
Table 4.18: Transaction of I_1 and I_2 and I_3 ..	66
Table 4.19: Details of ABC Classification of 45 Items ..	71
Table 4.20: Summary of ABC Classification of 45 Items ..	73
Table 5.1: Assigning Random Number for generating Demand Data ..	81
Table 5.2: Lot-Sizing Rule in PP-2 ..	5.2
Table 5.3: Assigning Random Numbers for the chosen Problem ..	90
Table 5.4: Lot-Sizing Rule in PP-2 for the chosen Problem ..	96
Table 5.5: Comparative summary of working with five replenishment policies ..	97

Table 5.6: Sale Transaction Data with Customer Profile showing five Transactions (part of the database with 1000 rows) ..99	99
Table 5.7: Association Rules ..99	99
Table 5.8: Support for Various Combinations ..103	103
Table 5.9: Replenishment Policies in Retail Sale with Customer Profile-Based Purchase..106	106
Table 5.10: Comparison of Inventory Replenishment Policies for Kismis and Basmati.. 110	110
Table 6.1: Sale Transaction Data of two items, a and b.. 115	115
Table 6.2: Quantitative Association Rule Mined from Sale Transaction Data of a and b.. 115	115
Table 6.3: Transaction of an Item, I_{55} .. 117	117
Table 6.4: Obtaining Derived Fields for I_{55} .. 118	118
Table 6.5: Obtaining Derived Fields for a and b.. 119	119
Table 6.6: Association Rules mined by selecting all the Derived Fields.. 120	120
Table 6.7: Meaningful Association Rules by selecting all the Derived Fields.. 120	120
Table 6.8: Association Rules mined by selecting (a = 1 or 2) and (b= 1 or 2) .. 121	121
Table 6.9: Association Rules mined by selecting (a = 2) and (b= 1 or 2) .. 121	121
Table 6.10: Association Rules mined from Transactions of 45 Items.. 123	123
Table 6.11: Association Rules mined from Original Fields with Numerical Data.. 123	123
Table 6.12: Association Rules mined from Derived Fields with Binary Data.. 124	124
Table 6.13: Lost Sale Incidents with various Demand Types.. 125	125
