Title Page	i
Certificate of Approval	ii
Certificate by the Supervisor	iii
Declaration.....	iv
Curriculum Vita	v
Acknowledgements.....	vi
List of Symbol and Abbreviations	vii
Abstract.....	viii
Table of Contents.....	ix-xii
 Chapter 1 Introduction	 1-10
1.1. Literature Survey	2-3
1.2. Spatial -temporal scale and influencing factors	4-6
1.2.1. Spatial scale.....	5
1.2.2. Temporal scale	5-6
1.3. Objectives	6-7
1.4. Methodology	7-9
1.5. Organization of the Thesis	9-10
 Chapter 2 Study area.....	 11-38
2.1.1. Location and accessibility	12
2.1.2 Consideration of coastal regulation zone	12-13
2.1.3. Climate	14
2.1.4. Geologic background and physiography.....	15-16
2.1.5. Topography and bathymetry	17
2.2. Objectives	17
2.3. Regional geomorphological mapping	17-19
2.4. General observations geomorphologic processes	19-25
2.4.1. Land.....	19-21
2.4.2. Wetland	21

TABLE OF CONTENTS

2.4.3. Water	25
2.5. Anthropogenic interventions.....	26-28
2.6. Identification of littoral cells.....	28-30
2.7. Littoral cell-wise details.....	30-37
2.7.1. Littoral cell 1 (LC 1)	30-31
2.7.2. Littoral cell 2 (LC 2)	32
2.7.3. Littoral cell 3 (LC 3)	32-33
2.7.4. Littoral cell 4 (LC4)	34
2.7.5. Littoral cell 5 (LC5)	34-35
2.7.6. Littoral cell 6 (LC6)	36
2.7.7. Littoral cell 7 (LC7)	36-38
Chapter 3 Shoreline change and prediction	39-58
3.1. Objectives	40
3.2. Methodology	40-49
3.2.1. Data sources and Geo-referencing	40
3.2.2. Selection of best grid resolution	42
3.2.3. Shoreline Detection and Digitization	43-45
3.2.4. Considerations of Littoral cells and Transects	46-47
3.2.5. Shoreline Change Rate Calculation and Prediction ..	47-48
3.2.6. Uncertainty and Predictability	49-50
3.2.6.1. Shoreline interpretation error.....	49
3.2.6.2. Regression coefficient.....	49
3.2.6.3. Root Mean Square Error (RMSE)	49-50
3.2.7. Geomorphological characteristics and anthropogenic interventions	50
3.3. Results and Discussions.....	50-58
3.3.1. Predicted shoreline positions.....	53-55
3.3.2. Validation of results by statistical techniques	55-58
3.4. Summary	58
Chapter 4 Three-Unit Based Coastal Change Study	59-76
4.1. Objectives	60
4.2. Methodology	60-70
4.2.1. Pre-Processing of satellite imageries.....	60-61
4.2.1.1. Atmospheric correction.....	60-61
4.2.1.2. Multi-resolution data sets.....	61
4.2.2. Image classification	63-66
4.2.2.1. Supervised classification.....	63
4.2.2.2. Identification of land, wetland and water	63-65

TABLE OF CONTENTS

4.2.3. Derivation of coastal change units	67
4.2.4. Verification of change units by field studies.....	68
4.3. Results and Discussions.....	71-74
4.3.1. Littoral cell wise disposition of coastal change units.....	71
4.3.2. Use of derived coastal change units for other coastal issues	72-73
4.3.2. 1. Sediment budget analysis.....	72
4.3.2. 2. Morphodynamics interpretation.....	72-73
4.3.2.3. Hazard zonation	73
4.4. Summary	75
Chapter 5 Seasonal sediment budget analysis.....	77-94
5.1. Objectives	78
5.2. Methodology	78-86
5.2.1. Data sources and selection of survey dates	78
5.2.2. Pre-processing and three-unit based approach	78-80
5.2.3. Beach profile surveys	80
5.2.4. Data archiving in GIS platform	82
5.2.5. Statistical analysis	82-86
5.3. Results and Discussions.....	87-92
5.4. Summary	93
Chapter 6 Seasonal shoreline shift	95-110
6.1. Objectives	96
6.2. Methodology	98
6.3. Results and Discussions.....	99-109
6.3.1. Regional observation.....	99-100
6.3.2. Littoral cell-wise observations	100-102
6.3.3. Transect-wise observations	103-104
6.3.4. Seasonal shoreline change rate estimation	105-107
6.3.5. Shoreline change rate study for 10 year interval...	108-109
6.4. Summary	110
Chapter 7 Summary and Conclusions	111-114
7.1. Summary	111-113
7.2. Conclusions.....	113-114
7.3. Future scope	114
Bibliography	115-126

TABLE OF CONTENTS

Appendix A Beach profile survey points with details	127-138
Appendix B Details of Landsat imageries	139-140
Appendix C Transect-wise details of seasonal shoreline change rates.....	141-150
