Approval of the viva-voce board	ii
Certificate	iii
Declaration	iv
Acknowledgments	v
Abstract	vi
List of Abbreviations	vii
List of Symbols	ix
Contents	xi
List of Figures	xv
List of Tables	xvi
1 Introduction	1
1.1 Background	1
1.2 Injury and accident: Different phenomena	2
1.3 Problem definition	4
1.4 Research issues	5
1.5 Objectives and scope of the research	6
1.6 Contribution of the research	7
1.7 Chapterwise summary	7
2 Literature Review	10
2.1 Introduction	10
2.2 Taxonomy of literature	11
2.3 Hazard identification	11
2.3.1 Backward and forward tracking methods	13
2.3.2 Morphological methods	14
2.4 Injury risk assessment	15
2.4.1 Criterion variables	16
2.4.2 Modeling techniques	16
2.5 Accident causation	17
2.5.1 First generation: Accident proneness	20
2.5.2 Second generation: Domino theories	22
2.5.3 Third generation: Injury epidemiology	22
2.5.4 Fourth generation: System models	23
2.5.5 Factors affecting injury	24
2.6 Injury mechanism	27
2.6.1 Deviation models	28
2.6.2 Energy models	28
2.6.3 Injury severity	29

2.7	Injury intervention	30
2.7.1	Engineering interventions	30
2.7.2	Behavioral interventions	31
2.7.3	Enforcement interventions	31
2.8	Critical appraisal	32
2.9	Chapter summary	36
3	The Methodology	37
3.1	Introduction	37
3.2	Hazard evaluation and monitoring module	38
3.2.1	Worksystem hazard model	40
3.2.2	Statistical modeling of hazards	42
3.2.3	Monitoring of hazards	43
3.3	Injury risk assessment module	44
3.3.1	Injury count model	45
3.3.2	Injury risk indices	48
3.4	Injury causation module	51
3.4.1	Design of instrument	52
3.4.2	Study design	53
3.4.3	Analysis scheme	55
3.4.4	Comparative method	56
3.4.5	Dichotomization of constructs	57
3.4.6	Examining injury actuators for causation	60
3.4.7	Examining injury preventers for causation	62
3.4.8	Logistic regression	64
3.5	Injury severity module	65
3.5.1	Injury narratives	65
3.5.2	Two-way classification scheme	67
3.5.3	Injury severity model	69
3.5.4	Statistical measures of association	71
3.6	Application of the developed methodology	73
3.7	Chapter summary	75
4	Hazard Evaluation and Monitoring	77
4.1	Introduction	77
4.2	Hazard identification and categorization	77
4.3	Data collection	79
4.3.1	Observation and recording scheme	79
4.3.2	Details of data	79
4.4	Analyses and results	81
4.4.1	Weibull parameters	81
4.4.2	Hazard rate functions	83
4.4.3	Weibull control charts	85
4.5	Discussion	88
4.6	Chapter summary	90

5	Injury Risk Assessment	91
5.1	Introduction	91
5.2	Data collection	91
5.2.1	Observation scheme	91
5.3	Cross-tabulation of injury incidents	92
5.4	Analyses and results	93
5.4.1	Injury count model	94
5.4.2	Injury risk indices	96
5.5	Discussion	102
5.6	Chapter summary	105
6	Injury Causation	106
6.1	Introduction	106
6.2	Questionnaire design and data collection	106
6.2.1	Design of instrument	106
6.2.2	Data collection	107
6.2.3	Validity and reliability of collected data	109
6.3	Analyses and results	110
6.3.1	Descriptive statistics	110
6.3.2	Mean differences	111
6.3.3	Dichotomization of constructs	112
6.3.4	Comparative method	114
6.3.5	Logistic regression	118
6.4	Discussion	126
6.5	Chapter summary	130
7	Injury Severity Assessment	131
7.1	Introduction	131
7.2	Data collection	132
7.3	Injury narratives: Classification and coding	133
7.4	Analyses and results	133
7.4.1	Frequency distribution	134
7.4.2	Cross-tabulation	135
7.4.3	Ridit analysis	135
7.5	Discussion	138
7.6	Chapter summary	142
8	Summary and Conclusions	143
8.1	Introduction	143
8.2	Summary	143
8.3	Conclusions	146
8.3.1	Hazard evaluation and monitoring	147
8.3.2	Injury risk assessment	147
8.3.3	Injury causation	148
8.3.4	Injury severity assessment	149
8.3.5	General implications to industrial safety management	150
8.4	Limitations	151
8.5	Future scope of research	152

<i>CONTENTS</i>	xiv
A Glossary	154
B Worksystem hazard model	156
C Hazard rate functions	163
D Hazards: Weibull control charts	166
E Injury narratives	174
F Definitions of constructs	177
F.1 Injury actuators	177
F.2 Injury preventers	177
G Comparative analysis: Results	179
