Table no.	Content of tables	Page no.
Table: 2.1.	Families of viruses infecting invertebrates	8
Table: 2.2.	Classification, pathogenicity and host range of different dsRNA viruses	10
Table: 2.3.	Characteristics of DpCPV dsRNA segments 1-10 and their encoded proteins	34
Table: 2.4.	Characteristics of LdCPV-1 dsRNA segments 1-10 and their encoded proteins	34
Table: 2.5.	Characteristics of LdCPV-14 dsRNA segments 1-10 and their encoded proteins	35
Table: 2.6.	Accession no. and nucleotide length of TnCPV-15 dsRNA segments 1-11	37
Table: 2.7.	Accession number, sizes, encoded proteins and probable functions of different gene segments of BmCPV	38
Table: 4.1.	Results of ELISA using preimmune and immune serum of p141.	94
Table: 4.2.	Results of ELISA using preimmune and immune serum of p137.	94
Table: 4.3.	Results of ELISA using preimmune and immune serum of p60.	95
Table: 5.1.	Comparison of stability of native virion and virus like particles at different pH	112

Fig. 2.2.	Structure of <i>Penicillium chrysogenum</i> Virus	11
Fig. 2.3.	Structure of <i>Pseudomonas</i> phage Phi6	12
Fig. 2.4.	Structure of <i>reoviridae</i>	15
Fig. 2.5.	Structure of CPV capsid	21
Fig. 2.6.	A conformational change between CSP-A and CSP-B	22
Fig. 3.1.	Scheme for cDNA synthesis	51
Fig. 3.2.	Scheme of the TOPO cloning	53
Fig. 3.3.	TOPO cloning vector containing AmCPV cDNA	53
Fig. 3.4.	Purification of AmCPV polyhedral bodies by sucrose density gradient centrifugation (A). Light microscopic picture of polyhedral bodies (B). SEM of polyhedral bodies(C)	58
Fig. 3.5.	Analysis of AmCPV RNA genome by agarose gel (A), and polyacrylamide gel (B) electrophoresis. Analysis of purified AmCPV RNA genome S1, S3, S8 and S11 by agarose gel electrophoresis (C)	58
Fig. 3.6.	Analysis of (A) pCR-XL-TOPO/AmCPV1, (B) pCR-XL-TOPO/AmCPV3, (C) pCR2.1 TOPO/AmCPV8 and (D) pCR2.1 TOPO/AmCPV11 by agarose gel electrophoresis	59
Fig. 3.7.	Secondary structure prediction of AmCPV S1, S3 and S8 encoded proteins using PHD	67
Fig. 3.8.	Representation of β - α - β - β motifs along the sequence of p60	67
Fig. 3.9.	Alignment of AmCPV S1 amino acid sequence with BmCPV -1 S3, DpCPV-1 S3 and LdCPV-1 S3 amino acid sequences	68
Fig. 3.10.	Alignment of AmCPV S3 amino acid sequence with BmCPV -1 S1, DpCPV-1 S1 and LdCPV-1 S1 amino acid sequences	69
Fig. 3.11.	Alignment of CBS domains found in AmCPV segment 8	70

Fig. 3.12.	Phylogenetic analysis of AmCPV S1	71
Fig. 3.13.	Phylogenetic analysis of AmCPV S3	71
Fig. 3.14.	Northern blot analysis of AmCPV genome RNA segments with cloned S1 (A), S3 (B), S8 (C), S11 (D) cDNA	72
Fig. 4.1.	pQE30 vector containing ORF of AmCPV S1, AmCPV S3 and AmCPV S8	80
Fig. 4.2.	pBlueBacHis2A Baculovirus transfer vector containing ORF of AmCPVS1, S3 and S8	83
Fig. 4.3.	Analysis of PCR amplified product of AmCPV S1 (A), S3 (B) and S8 (C) by 1% agarose gel	90
Fig. 4.4.	Analysis of restriction digested pQE-30/AmCPV S1 (A), pQE-30/AmCPV S3 (B), pQE-30/AmCPV S8 (C) in 1% agarose gel	90
Fig. 4.5.	Analysis of recombinant AmCPV S1 (A), S3 (B) and S8 (C) encoded proteins in <i>E. coli</i> by SDS- PAGE	91
Fig. 4.6.	Analysis of expression of recombinant AmCPV S1 (A), S3 (B) and S8 (C) encoded protein in <i>E. coli</i> by SDS-PAGE induced with varying concentration of IPTG	92
Fig. 4.7.	Analysis of expression of recombinant AmCPV S1 (A), S3 (B), S8 (C) encoded protein in <i>E. coli</i> by SDS-PAGE in various post-induction incubation period induced with 1mM IPTG	93
Fig. 4.8.	Analysis of affinity purified antibody by SDS-12% PAGE	95
Fig. 4.9.	Analysis of restriction digested pBluebacHis2A/AmCPV S1 (A), pBluebacHis2A/AmCPV S3 (B) and pBluebacHis2A/ AmCPV S8 (C) in 1% agarose gel	96
Fig. 4.10.	Recombinant baculovirus plaques of AmCPV S1 (A), AmCPV S3 (B) and AmCPV S8 (C) showing the expressing β -galactosidase	97
Fig. 4.11.	Analysis of PCR amplified DNA of AmCPV S1, AmCPV S3 and AmCPV S8 from recombinant baculovirus infected Sf9 cells in 1% agarose gel	97
Fig. 4.12.	Confocal images of recombinant baculovirus AcNPV/AmCPV S1 (A), AcNPV/AmCPV S3 (B) and AcNPV/AmCPV S8 (C) infected Sf9 cells	98
Fig. 4.13.	Confocal images of recombinant baculovirus AcNPV/AmCPV S1 and S3 co-infected Sf9 cells	99

Fig. 4.14.	Immunoblot analysis of AmCPV S1 encoded proteins using anti-p141 polyclonal antibody	100
Fig. 4.15.	Immunoblot analysis of AmCPV S3 encoded proteins using rabbit anti-p137 polyclonal antibody	100
Fig. 4.16.	Immunoblot analysis of AmCPV S8 encoded proteins using rabbit anti-p60 polyclonal antibody	101
Fig. 5.1.	Schematic diagram of the positions of TF3 and TF4 primers, used to generate a promoter Sp6 containing cDNA fragments by PCR	109
Fig. 5.2.	Electron micrographs of uranyl acetate-stained native AmCPV (A), VLPs containing p137 (B), and VLPs containing p137 and p141 (C)	111
Fig. 5.3.	Immunoblot analysis of VLPs of p137, and p137 and p141 together using anti-p137 or anti-p141 antibodies	112
Fig. 5.4.	Transmission Electron micrographs of uranyl acetate-stained native virions, purified VLPs of p137, and VLPs of p137 and p141 incubated at pH-3 to pH-12	113
Fig. 5.5.	Binding assay of p60 to poly (I:C)-sepharose	114
Fig. 5.6.	Agarose gel analysis of the PCR products of 3' (-) terminal AmCPV S2 cDNA (A). Analysis of <i>in vitro</i> transcribed AmCPV S2 RNA by formaldehyde agarose gel (B). Agarose gel analysis of [γ - ³² P] labeled AmCPV S11 RNA (C)	115
Fig. 5.7.	Analysis of RNA binding properties of p60 by EMSA. The [γ - ³² p] labeled dsRNA (A) or [α - ³² p] labelled ssRNA (B)	116
Fig. 5.8.	Influence of NaCl concentration on the RNA binding activity of p60	117
Fig. 5.9.	Binding specificity of p60 at different temperatures and under denaturing condition	117

Abstract	xvi
Chapter 1: Introduction	3
1.1 Introduction	3
Chapter 2: Literature Review	7
2.1 Introduction	7
2.2 Insect virus families	8
2.3 The Double-Stranded RNA Viruses	9
2.3.1 Birnaviridae	11
2.3.2 Chrysoviridae	11
2.3.3 Cystoviridae	12
2.3.4 Endornavirus	13
2.3.5 Hypoviridae	13
2.3.6 Partitiviridae	13
2.3.7 Totiviridae	14
2.3.8 Reoviridae	15
2.4 Cytoplasmic Polyhedrosis Virus	18
2.4.1 Classification	18
2.4.2 Pathogenesis	18
2.4.3 Structure of virion	19
2.4.4 Replication and morphogenesis	24
2.4.4.1 Attachment and uncoating	24
2.4.4.2 Viral transcription and genome replication	24
2.4.4.3 Viral protein and antigen synthesis	25
2.4.4.4 Occlusion body structure and polyhedrin crystallization	26
2.4.5 Virus propagation and persistence	27
2.4.6 CPVs as insecticides	29
2.4.7 CPVs as gene expression vectors	30
2.4.8 Immunological and molecular detection of CPV	30
2.4.9 Different CPVs	32
2.4.9.1 <i>Euxoa scandens</i> CPV	32
2.4.9.2 <i>Choristoneura fumiferana</i> CPV	32
2.4.9.3 <i>Orgiia pseudosugata</i> CPV	32
2.4.9.4 <i>Dendrolimus punctatus</i> CPV	33
2.4.9.5 <i>Lymnatria dyspar</i> CPV	34
2.4.9.6 <i>Manduca Sexta</i> CPV	35
2.4.9.7 <i>Heliothis armigera</i> CPV	35
2.4.9.8 <i>Trichoplusia ni</i> CPV-15	36

2.4.9.9 <i>Bombyx mori</i> CPV	37
2.4.10 CPVs infecting non-mulberry silkworms	41
2.5 Scope of research	43
2.6 Aims and objectives of the present study	44
Chapter 3: Cloning, sequencing and analysis of genome segments 1, 3, 8 and 11 of <i>Antheraea mylitta cypovirus</i>	47
3.1 Introduction	47
3.2 Materials and methods	48
3.2.1 Reagents, fine chemicals and enzymes	48
3.2.2 Radio labeled compounds	48
3.2.3 Silkworms and Viruses	48
3.2.4 Purification of polyhedral bodies	48
3.2.5 Isolation of double stranded genomic RNA	49
3.2.6 Quantitation and analysis of dsRNA	49
3.2.7 Purification of genome segments 1, 3, 8 and 11 RNA	49
3.2.8 Cloning of AmCPV segments 1, 3, 8 and 11 RNA	50
3.2.8.1 Synthesis of AmCPV segments 1, 3, 8 and 11 cDNA	50
3.2.8.2 Amplification of cDNA by PCR	52
3.2.8.3 Cloning and sequencing of AmCPV segments 1, 3, 8 and 11 cDNA in TOPO cloning vector	52
3.2.8.4 Small scale plasmid DNA isolation (miniprep) from recombinant colonies	53
3.2.8.5 Selection of recombinant plasmids containing segment 1, 3, 8 and 11 cDNA	54
3.2.9 Sequencing of the cloned AmCPV segment 1, 3, 8 and 11 cDNA	54
3.2.10 Nucleotide sequence accession numbers	55
3.2.11 Bioinformatic analysis of cDNA sequences	55
3.2.12 Phylogenetic analysis of cDNA sequences	55
3.2.13 Northern hybridization	56
3.2.13.1 Northern transfer	56
3.2.13.2 Probe preparation by radioactive labeling	56
3.2.13.3 Prehybridization, hybridization, washing and autoradiography of the membrane	57
3.3 Results	58
3.3.1 Purification of polyhedral bodies	58
3.3.2 Analysis of the viral genomic dsRNA by agarose and polyacrylamide gel electrophoresis	58
3.3.3 Cloning of AmCPV genome segment 1, 3, 8 and 11 cDNA in pCR-XL-TOPO or pCR 2.1 TOPO vector and selection of recombinant plasmids	59
3.3.4 Molecular analysis of AmCPV genome segments 1, 3, 8 and 11	60
3.3.5 Phylogenetic analysis	70
3.3.6 Northern Hybridization	71
3.4 Discussion	72
Chapter 4: Expression and purification of proteins encoded by genome segment 1, 3 and 8 of <i>Antheraea mylitta cypovirus</i>	77
4.1 Introduction	77
4.2 Materials and Methods	78

4.2.1 Reagents, Fine Chemicals and enzymes	78
4.2.2 Expression of protein encoded by genome segments 1, 3 and 8 of <i>A. mylitta</i> CPV in <i>E. coli</i>	78
4.2.2.1 Cloning into prokaryotic expression vector pQE-30	78
4.2.2.2 Detection of recombinant AmCPV S1, AmCPV S3 and AmCPV S8 encoded protein expression in <i>E. coli</i>	80
4.2.2.3 Optimization of different physicochemical parameters for the expression of AmCPV S1, AmCPV S3 and AmCPV S8 encoded proteins in <i>E. coli</i>	81
4.2.2.3.1 Optimization of inducer concentration	81
4.2.2.3.2 Optimization of post-induction incubation period	81
4.2.2.4 Large scale production and purification of His-tagged recombinant AmCPV S1, AmCPV S3 and AmCPV S8 encoded proteins from <i>E. coli</i>	82
4.2.3 Expression of AmCPV1, AmCPV3 and AmCPV8 encoded proteins in Sf9 cells via baculovirus (AcNPV) expression system	83
4.2.3.1 Cloning of AmCPV S1, S3 and S8 ORF into baculovirus transfer vector pBlueBacHis2A	83
4.2.3.2 Cotransfection of Sf9 cells with linearized baculovirus DNA and recombinant transfer vector pBlueBacHis2A/AmCPV S1, pBlueBacHis2A/AmCPV S3 and pBlueBacHis 2A /AmCPV S8	84
4.2.3.3 Isolation of recombinant baculovirus by plaque assay	84
4.2.4 Isolation of total DNA from recombinant baculoviruses infected Sf9 cells and amplification of AmCPV S1, AmCPV S3 and AmCPV S8 genes by PCR	85
4.2.5 Analysis of expression AmCPV S1, S3 and S8 encoded proteins from Sf9 cells by confocal microscopy	86
4.2.6 Large scale production of AmCPV S1, AmCPV S3 and AmCPV S8 recombinant proteins	86
4.2.7 Purification of baculovirus expressed His-tagged recombinant proteins	86
4.2.8 Production of polyclonal antibody against <i>E. coli</i> expressed AmCPV1, AmCPV3 and AmCPV8 encoded proteins in rabbit	87
4.2.8.1 Antigen preparation	87
4.2.8.2 Immunization of rabbit	87
4.2.8.3 Enzyme linked immunosorbent assay (ELISA)	87
4.2.8.4 Purification of specific antibodies by antigen affinity chromatography	88
4.2.9 Immunoblot analysis of the baculovirus expressed proteins and detecting their presence in infected midgut cells, polyhedra and virion particles	89
4.3 Results	90
4.3.1 Cloning of AmCPV segment 1, 3 and 8 ORFs in bacterial expression vector	90
4.3.2 Expression and purification of AmCPV S1, S3 and S8 encoded proteins in <i>E. coli</i>	91
4.3.3 Optimization of different physicochemical parameters for the expression of AmCPV S1, AmCPV S3 and AmCPV S8 encoded proteins in <i>E. coli</i>	92
4.3.3.1 Inducer concentration	92
4.3.3.2 Post-induction incubation period	93
4.3.4 Production and purification of polyclonal antibody raised against <i>E. coli</i> expressed p141, p137 and p60 proteins	93
4.3.5 Expression of p141, p137 and p60 in insect cells via baculovirus expression system	96
4.3.5.1 Cloning of AmCPV S1, AmCPV S3 and AmCPV S8 ORFs in baculovirus transfer vector	96
4.3.5.2 Generation and purification of recombinant baculovirus by plaque assay	96

4.3.6 PCR amplification of genes encoding for AmCPV S1, AmCPV S3 and AmCPV S8 from recombinant baculovirus infected Sf9 cells	97
4.3.7 Analysis of expression of AmCPV S1, S3 and S8 encoded proteins from Sf9 cells by confocal microscopy	98
4.3.8 Immunoblot analysis of p141, p137 and p60 proteins in infected Sf9 cells, infected midgut, polyhedral bodies and virion particles	99
4.4 Discussion	101
Chapter 5: Functional analysis of AmCPV genome segments 1, 3 and 8 encoded proteins	105
5.1 Introduction	105
5.2 Materials and Methods	106
5.2.1 Isolation of native virus from purified polyhedral bodies	106
5.2.2 Isolation of virus like particles from recombinant baculovirus infected Sf9 cells	106
5.2.3 Analysis of virus like particles (VLPs) by transmission electron microscopy	106
5.2.4 Immunoblot analysis of virion like particles	107
5.2.5 Analysis of stability of native virus and recombinant virus like particles at different pH	107
5.2.6 Preparation of poly I:C Sepharose	107
5.2.7 Binding assay of recombinant baculovirus expressed AmCPV S8 encoded p60 using poly (I:C)-sepharose	108
5.2.8 Preparation of AmCPV S2 single stranded RNA (mini genome)	108
5.2.8.1 Primer designing to attach SP6 promoter sequence to the cDNAs corresponding to 3'(-) strand RNAs	108
5.2.8.2 PCR amplification and purification of the amplified PCR products	108
5.2.8.3 <i>In vitro</i> transcription to generate RNA templates	109
5.2.9 Preparation of radio labeled template of dsRNA for electrophoretic mobility shift assay (EMSA)	109
5.2.10 Electrophoretic mobility shift assay (EMSA) with varying p60 concentration	110
5.2.11 Influence of ionic conditions, temperature and denaturant on the <i>in vitro</i> binding activity of p60	110
5.3 Results	110
5.3.1 TEM analysis of virus like particles	110
5.3.2 Immunoblot analysis of virus like particles	111
5.3.3 Comparison of stability of native virion and virus like particles at different pH	112
5.3.4 Binding assay of p60 with viral RNA	114
5.3.5 <i>In Vitro</i> transcription to produce single stranded AmCPV minigenomic RNA	114
5.3.6 Labelling of AmCPV double stranded RNA (S11)	115
5.3.7 RNA binding properties of p60	115
5.3.8 Influence of ionic conditions on the <i>in vitro</i> binding activity of p60	116
5.3.9 Influence of temperature and denaturants on the <i>in vitro</i> binding activity of p60	117
5.4 Discussion	118
Chapter 6: Summary and conclusion	123
6.1 Summary and Conclusion	123

6.2 Scope of Future Investigation	125
