| Abstract   | xiii |
| Contents   | XV   |
| CHAPTER 1 INTRODUCTION   | 1    |
| 1.1 Overview   | 1    |
| 1.2 Motivation of the Present Work   | 5    |
| 1.3 Objectives and Scope of the Present Thesis   | 5    |
| 1.4 Organisation of the Thesis   | 6    |
|  |      |
| CHAPTER 2 LITERATURE REVIEW  | 11   |
| 2.1 Introduction   | 11   |
| 2.2 Potential Flow Models  | 11   |
| 2.3 Incompressible Navier-Stokes Solvers   | 13   |
| 2.3.1 Formulation  | 13   |
| 2.3.2 Discretization schemes   | 14   |
| 2.3.3 Variable location in a cell  | 15   |
| 2.3.4 Pressure calculation techniques  | 17   |
| 2.3.5 Differencing schemes   | 21   |
| 2.3.6 Solution algorithm and stability criteria  | 22   |
| 2.3.7 Pressure velocity coupling algorithm   | 23   |
| 2.3.8 Flux reconstruction schemes  | 25   |
| 2.3.9 Structured and unstructured grid based method  | 27   |
| 2.4 Flow Past Various Two-Dimensional Geometries   | 30   |
| 2.5 Summary of Literature Review   | 42   |
| CHAPTER 3 DEVELOPMENT OF INCOMPRESSIBLE NAVIER-  | 45   |
| STOKES SOLVER  |      |
|  |      |
| 3.1 Introduction   | 45   |
| 3.2 Governing Equations  | 46   |
| 3.3 Unstructured Grid Based Finite Volume Discretization<br>of Governing Equations on Triangular Cells | 47   |
| <ul><li>3.4 Application of Consistent Flux Reconstruction Scheme<br/>on Unstructured Grid</li></ul>    | 51   |

| 3.5 The pressure-Poisson Equation  | 55  |
|--|-----|
| 3.6 Initial condition and Boundary Conditions  | 57  |
| 3.7 Numerical Stability, Convergence and Accuracy of the Solver                                | 58  |
| 3.8 Conservation of Kinetic Energy for the Solver  | 59  |
| 3.9 Terminology Used in Flow Calculations  | 60  |
| 3.10 Application and Validation of CFRUNS Solver   | 63  |
| 3.9.1 Flow past a bluff body   | 64  |
| 3.9.2 Flow past streamlined body   | 70  |
| 3.10 Conclusion  | 73  |
| CHAPTER 4 FLOW PAST TWO AND THREE CIRCULAR CYLINDERS<br>IN SIDE-BY-SIDE AND TANDEM ARRANGEMENT | 75  |
| 4.1 Introduction   | 75  |
| 4.2 Brief Description of the Flow Problem  | 76  |
| 4.3 Results and Discussion   | 77  |
| 4.3.1 Flow past two side-by-side circular cylinders  | 77  |
| 4.3.1.1 Wake dynamics  | 86  |
| 4.3.1.2 Flow statistics  | 88  |
| 4.3.2 Flow past three side-by-side and tandem circular cylinders                               | 90  |
| 4.4 Conclusions  | 100 |
| CHAPTER 5 FLOW PAST TWO AND THREE CIRCULAR CYLINDERS<br>IN STAGGERED ARRANGEMENTS              | 103 |
| 5.1 Introduction   | 104 |
| 5.2 Brief Description of the Flow Problem  | 100 |
| 5.3 Results and Discussion   | 105 |
| 5.3.1 Flow past two circular cylinders in staggered arrangement                                | 105 |
| 5.3.2 Flow past three circular cylinders in staggered arrangement                              | 108 |
| 5.3.2.1 Staggered cylinder of equal diameter   | 108 |
| 5.3.2.2 Staggered cylinder of unequal diameter   | 117 |
| 5.4 Conclusions  | 123 |
| CHAPTER 6 FLOW PAST SINGLE AND TANDEM CYLINDRICAL<br>BODIES IN THE VICINITY OF A PLANE WALL    | 125 |
| 6.1 Introduction   | 125 |
| 6.2. Brief Description of the Flow Problem   | 126 |
| 6.3 Results and Discussion   | 127 |
| 6.3.1 Unconfined flow past a cylindrical body at zero<br>angle of incidence                    | 127 |
| 6.3.2 Flow past a square cylinder placed in the vicinity of a plane wall                       | 130 |
| 6.3.3 Flow past a circular cylinder in the vicinity of a fixed wall                            | 134 |

| 6.3.4 Flow past two tandem circular cylinders in the | 138 |
|--|-----|
| vicinity of a plane wall                             |     |
| 6.3.4.1 when $g^* = 0.5$                             | 139 |
| 6.3.4.2 when $g^* = 1.0$                             | 141 |
| 6.3.5 Flow statistics                                | 144 |
| 6.3.5.1 Lift and drag coefficients                   | 144 |
| 6.3.5.2 Strouhal number                              | 146 |
| 6.3.5.3 Stagnation and separation points             | 147 |
| 6.4 Conclusions                                      | 148 |
| CHAPTER 7 FLOW PAST AIRFOILS                         | 151 |
| 7.1 Introduction                                     | 151 |
| 7.2 Geometrical Description of the Flow Problem      | 153 |
| 7.3 Results and Discussion                           | 153 |
| 7.4 Conclusions                                      | 162 |
| CHAPTER 8 CLOSURE                                    | 163 |
| 8.1 Concluding Remarks                               | 163 |
| 8.2 Significant Contributions of the Thesis          | 167 |
| 8.3 Future Scope of the Research                     | 168 |
