Chapter 1 Introduction and Literature Survey	
1.1 Surface Engineering	1
1.2 Classification of Surface Engineering Processes	2
1.2.1 Modification of surface without altering the chemical constitution	2
1.2.1.1 By heating	2
1.2.1.2 By mechanical working	2
1.2.2 Modification of surface by altering the chemical constitution	2
1.2.2.1 Thermochemical diffusion treatments	2
1.2.2.2 Electroplating and thermal diffusion treatments	3
1.2.2.3 Anodizing treatments	3
1.2.2.4 Parkerizing	3
1.2.3 Application of new material to the surface	3
1.2.3.1 Coatings deposited in solid state	3
1.2.3.2 Coatings deposited in the liquid state	3

	Page No
1.2.3.3 Coatings deposited from solution by reduction of ions	4
1.2.3.4 Coatings deposited from a vapour	4
1.3 Lasers in Surface Engineering	4
1.3.1 Advantages and disadvantages of CO ₂ and Diode laser	6
1.3.1.1 CO ₂ Lasers	6
1.3.1.2 Diode lasers	7
1.3.2 Parameters affecting quality of laser surface engineering processes	7
1.3.3 Process description for some laser surface engineering techniques	8
1.3.3.1 Laser heat treatment	8
1.3.3.2 Laser surface hardening	8
1.3.3.3 Surface hardening by laser particle injection	9
1.3.3.4 Pulsed laser deposition (PLD)	9
1.3.3.5 Laser cladding	9
1.3.3.6 Laser can also be used to initiate SHS (Self-propagating High-temperature Synthesis) reaction	10
1.3.4 Laser surface alloying (LSA)	10
1.3.4.1 Laser surface alloying with preplaced powder	11
1.3.5 Laser post treatment or laser glazing	12
1.4 Self-propagating High-temperature Synthesis (SHS)	13
1.5 Composite Materials and its Classification	14
1.5.1 Development of composites by <i>in-situ</i> and <i>ex-situ</i> Routes	16
1.6 Introduction to Wear and Wear Resistance	17
1.6.1 Classification of wear: generalized approach	17
1.6.1.1 Adhesive wear	18
1.6.1.2 Abrasive wear and asperity deformation	18
1.6.1.3 Fatigue and delamination wear	19
1.6.1.4 Chemical wear	19

	Page No
1.6.2 Classification of wear: Velocity accommodation approach	20
1.6.3 Time dependent behaviour of wear	22
1.6.4 Solid lubrication	23
1.6.5 Mechanical and tribological performance of some single phase composites	26
1.6.5.1 Al ₂ O ₃	26
1.6.5.2 TiB ₂	28
1.6.5.3 TiN	28
1.6.6 Ti-B-N based coating	29
1.6.7 Mechanical and tribological behaviour of multi-phase composite coatings	31
1.6.8 Effects of laser post-treatment on composite coatings	35
1.7 Nanostructured Coating	37
1.8 Problem Definition	41
1.9 Objectives of the investigation	42
1.10 Work Plan	43
Chapter 2 Experimental Methods and Conditions	45
2.1 Precursor Powders for Development of Coating	45
2.2 Preparation of Substrate Samples for LSA	46
2.3 Details of Laser Machine set-ups Used for the Investigation	47
2.4 Details of Substrate Materials	48
2.5 Characterisations of the Coatings	49
2.5.1 Physical characterisation	49
2.5.1.1 Scanning Electron Microscopy (SEM)	49
2.5.1.2 High Resolution Transmission Electron Microscopy (HRTEM)	50
2.5.1.3 X-ray diffraction (XRD)	50
2.5.1.4 X-ray photoelectron spectroscopy (XPS)	51
2.5.2 Mechanical characterisation	52
2.5.2.1 Vickers microhardness test	52

		Page No
	2.5.2.2 Pin-on-disc test	52
Chapter 3	Development of Nanostructured Al₂O₃-TiB₂-TiN Coatings by Combined SHS and Laser Surface Alloying	
	3.1 Introduction	55
	3.2 Experimental Details	56
	3.3 Results and Discussion	57
	3.4 Conclusions	65
Chapter 4	Performance Evaluation of Al₂O₃-TiB₂-TiN Composite Coatings with <i>in-situ</i> and <i>ex-situ</i> Reinforcements	
	4.1 Introduction	67
	4.2 Experimental Details	67
	4.3 Results and Discussion	69
	4.4 Conclusions	78
Chapter 5	Effect of hBN Addition on the Properties of Nanostructured Al₂O₃-TiB₂-TiN Based Coatings	
	5.1 Introduction	79
	5.2 Experimental Details	80
	5.3 Results and Discussion	82
	5.4 Conclusions	93
Chapter 6	Study on the Effect of Laser Post-treatment on the Properties of Nanostructured Al₂O₃-TiB₂-TiN Based Coatings	
	6.1 Introduction	95
	6.2 Experimental Details	95
	6.3 Results and Discussion	96
	6.4 Conclusions	108
Chapter 7	Effect of Laser Post-treatment on Al₂O₃-TiB₂-TiN Composite Coating with Free hBN	
	7.1 Introduction	109
	7.2 Experimental Details	109
	7.3 Results and Discussion	110
	7.4 Conclusions	115

	Page No
Chapter 8 Overall Conclusions and Major Contributions	
8.1 Summary of Thesis	117
8.1.1 Effect of SHS (comparison between <i>in-situ</i> and <i>ex-situ</i> techniques of production of coating)	117
8.1.2 Effect of hBN	118
8.1.3 Effect of Laser Post-treatment	119
8.1.4 Combined Effect of Laser Post-treatment and hBN Content	121
8.2 Overall Conclusions	121
8.3 Major Contributions	122
8.4 Future Scope of Work	122
References	125
