Abstract		i-iii
List of Symbols		iv-vi
List of Figures		vii-xiii
List of Tables		xiv-xv
Chapter 1	Introduction	1-5
Chapter 2	Review of Literatures	6-17
	Introduction	6
	Part-I (Without cutout)	6
	Vibration and buckling of un-stiffened plates and shells	7
	Vibration and buckling of stiffened plates and shells	9
	Dynamic stability of un-stiffened plates and shells	10
	Dynamic stability of stiffened plates and shells	11
	Part-II (With cutout)	12
	Aim and scope of the present research work	15
Chapter 3	Mathematical Formulation	18-44
	3.1 The Basic Problem	18
	3.2 Proposed Analysis	18
	3.3 Finite Element Formulation	19
	3.3.1 Assumptions of the Analysis	19
	3.3.2 Shell Element	19
	Geometry of the element	20
	Displacement field	24
	Strain-displacement relation	25
	Stress-strain relation	31
	3.3.2.1 Elastic stiffness matrix	32
	3.3.2.2 Mass matrix	33
	3.3.2.3 Geometric stiffness matrix	33

	3.3.3 Stiffener Element	35
	3.4 Governing Equations	41
	3.4.1 Buckling	42
	3.4.2 Vibration	42
	3.4.3 Dynamic stability	42
	3.5 Method of Solution	44
Chapter 4	Problem Description	45-56
	4.1 Introduction	45
	4.2 Geometry of the stiffened panels	45
	4.3 Non-uniform loading type	46
	4.4 Boundary conditions	47
	4.5 Material properties	49
	4.6 Non-dimensionalisation of parameters	49
	4.7 Problems of stiffened shell panel identified for the present investigation	50
Chapter 5	Results and Discussions	57-178
	5.1 Introduction	57
	5.2 Stiffened shell panels without cutout under uniform loading	57
	5.2.1 Convergence and validation study	57
	5.2.2 Problems under investigation	69
	(Part-I) Laminated composite stiffened shell panels	69
	Numerical results	70
	(a) Free vibration studies	70
	(b) Buckling (Static stability)	72
	(c) Dynamic stability	74
	(Part-II) Isotropic stiffened shell panels	81
	Numerical results	82
	(a) Buckling (Static stability)	82
	(b) Dynamic stability	86

5.3 Laminated composite stiffened shell panels without cutout under non-uniform loading	93
5.3.1 Convergence and validation study	93
5.3.2 Problems under investigation	97
Numerical results	97
Loading Type-I	98
(a) Buckling	98
(b) Vibration	100
(c) Dynamic stability	102
Loading Type-II	119
(a) Buckling	120
(b) Vibration	121
(c) Dynamic stability	123
Loading Type-III	120
(a) Buckling	126
(b) Vibration	127
(c) Dynamic stability	130
Loading Type-IV	132
(a) Buckling	133
(b) Vibration	134
(c) Dynamic stability	136
5.4 Laminated composite stiffened shell panels with cutout under non-uniform loading	139
5.4.1 Convergence and validation study	140
5.4.2 Problems under investigation	144
Numerical results	145
Loading Type-I	145
(a) Buckling	145
(b) Vibration	147
(c) Dynamic stability	148

Loading Type-II	153
(a) Buckling	153
(b) Vibration	155
(c) Dynamic stability	157
Loading Type-III	160
(a) Buckling	160
(b) Vibration	162
(c) Dynamic stability	164
Loading Type-IV	168
(a) Buckling	168
(b) Vibration	170
(c) Dynamic Stability	172
Chapter 6 Conclusions	179-189
Future Scope of Research	189
References	190-204
Appendix	205-217
Computer Program	205
Method of Solution	206
Description of the Computer Program	210
Strength and limitations of the program	215
Impact of the present investigation	216
Additional references relevance to the investigation	217
