Abstract			xvi			
Chapter 1	Intr	Introduction				
	1.1	Background	1			
	1.2	Objectives	4			
Chapter 2	Review of Literature					
	2.1	Irrigation Management Systems	5			
		2.1.1 Past studies on performance of Kangsabati irrigation project	7			
	2.2	Development of Regional Climatic Scenario	9			
		2.2.1 Climate change scenarios	10			
		2.2.2 Predictors preprocessing	11			
		2.2.3 Statistical downscaling techniques	14			
	2.3	Prediction of Future Land Use/ Land Cover	17			
	2.4	.4 Climate Change Impact on Hydrological Processes and Water Resources				
		2.4.1 Application of direct GCM output	21			
		2.4.2 Application of downscaled GCM outputs	22			
	2.5	Land Use and Climate Change Impact on Hydrological Processes	25			
	2.6	Research Gap	27			
Chapter 3	Data and Methodology					
	3.1	Study Area	29			
	3.2	Data Collection	33			
		3.2.1 Observed hydro-climatic data	33			
		3.2.2 Data requirement for development of regional climate scenarios	33			
		3.2.3 Data requirement for land use/land cover change modeling	36			

## CONTENTS

		3.2.4 LU/LC modeling software	37			
	3.3	Description of IRCIM	38			
	3.4	Calibration and Validation of IRCIM	39			
		3.4.1 Inflow prediction	39			
		3.4.2 Reservoir module	41			
		3.4.3 Command area water balance	42			
		3.4.4 Irrigation management system	42			
	3.5	Development of Regional Climate Scenarios	45			
		3.5.1 Predictors preprocessing	48			
		3.5.2 Bias correction	49			
		3.5.3 Statistical downscaling techniques	50			
		3.5.4 Development of regional temperature scenarios	51			
		3.5.5 Development of daily rainfall scenarios	53			
		3.5.6 Performance evaluation of downscaling techniques	53			
		3.5.7 Trend estimation of historical and future RCP scenarios climatic data	54			
	3.6	Development of Future Land Use/Land Cover Scenario	56			
		3.6.1 Accuracy assessment	59			
		3.6.2 Markov model	59			
		3.6.3 Preparation of suitability maps	60			
		3.6.4 Cellular Automata-Markov model	65			
	3.7	Performance of irrigation system under different climate change scenarios				
		3.7.1 Reservoir module	67			
		3.7.2 Irrigation management system	69			
	3.8	Performance of Irrigation System under Land Use Change and Climate Change Scenarios				
Chapter 4	Resi	sults and Discussion				
	4.1	Calibration and Validation of IRCIM Model for Kangsabati Irrigation Project	71			
		4.1.1 Trend analysis of historical hydro-climatological data	71			
		4.1.2 Runoff prediction using distributed SCS CN method	73			
		4.1.3 Runoff prediction using ANN technique	76			
		4.1.4 Comparison of distributed SCS CN and ANN methods	79			
		4.1.5 Reservoir water balance	80			
		4.1.6 Simulation of ponding depth for IIT Kharagpur field experiment	82			
		4.1.7 Performance evaluation of irrigation management system	83			
		4.1.8 Performance evaluation of delivery system using modified schedule	88			
	4.2	Development of Regional Climatic Scenarios using Statistical	88			

Downscaling of GCM outputs

		Down	scaling of GCM outputs			
		4.2.1	Development of regional temperature scenarios	89		
		4.2.2	Development of regional rainfall scenarios	98		
	4.3	Prediction of Land Use/Land Cover (LU/LC) Scenario				
		4.3.1	Land use/land cover area statistics	108		
		4.3.2	Accuracy assessment	110		
		4.3.3	Nature and location of change in LU/LC	112		
		4.3.4	Land use/land cover change prediction using CA-Markov model	113		
	4.4	Irrigation System Performance under Different Climate Change Scenarios				
		4.4.1	Kangsabati reservoir inflow simulation under climate change scenarios	118		
		4.4.2	Effect of climate change on evapotranspiration of command and evaporation loss from Kangsabati reservoir	120		
		4.4.3	Effect of climate change on irrigation water demand and supply of Kangsabati reservoir command	123		
		4.4.4	Effect of climate change on Kangsabati reservoir release	125		
	4.5	Kangsabati Reservoir Performance under Land Use Change and Climate Change Scenarios				
		4.5.1	Future land use scenario for Kangsabati catchment	129		
		4.5.2	Effect of land use and climate changes on Kangsabati irrigation system performance	130		
Chapter 5	Sun	Summary and Conclusions				
	5.1	Summary				
	5.2	Conclusions				
	5.3	Research contributions from the study				
	5.4	Limita	ations and future scope	145
