Title Page	i
Certificate of Approval	v
Certificate	vii
Acknowledgements.....	ix
Declaration.....	xi
List of symbols.....	xiii
Abstract.....	xv
Contents.....	xvii
List of Figures.....	xxi
List of Tables.....	xxvii
Chapter-1 Introduction	1
1.1 General.....	1
1.2 Aim and Scope of the Thesis.....	3
1.3 Literature Survey.....	4
1.3.1 Survey of different reference generation techniques.....	4
1.3.2 Survey on tracking methodology.....	15
1.3.3 Survey on converter topology.....	16
1.4 Organization of the Thesis.....	19
Chapter-2 Investigation On hGA Based Reference Generation Technique	23
2.1 Introduction	23
2.2 Problem formulation.....	25
2.3 GA based optimization.....	25
2.4 hGA based reference generation technique.....	28
2.4.1 Implementation of hGA based optimization technique.....	28

	2.4.2 Flow chart of hGA based optimization technique.....	32
	2.5 Simulation results.....	35
	2.6 Experimental results.....	39
	2.7 Conclusion.....	43
Chapter-3	ANN Based Reference Generation Technique	45
	3.1 Introduction.....	45
	3.2 Background of the work.....	47
	3.3 ANN based reference generation technique.....	48
	3.3.1 Structure of ANN.....	48
	3.3.2 Training of network.....	49
	3.3.3 Adaptation/fine tuning of the ANN using RLS algorithm.....	49
	3.3.4 Recursive Least Square rule.....	52
	3.4 Simulation Result	55
	3.5 Experimental Result.....	59
	3.6 Conclusions.....	63
Chapter- 4	A Shunt Active Power Filter with Enhanced Performance Using ANN based Predictive and Adaptive Controllers	65
	4.1 Introduction.....	65
	4.2 Estimation of current reference	66
	4.3 Control of the DC link voltage in the APF.....	67
	4.4 ANN based fast estimation of the compensating current.....	70
	4.5 Adaptive current detection technique.....	73
	4.6 Simulation results.....	75
	4.7 Experimental results.....	79
	4.8 Conclusions.....	82
Chapter- 5	Sliding Mode Controller Based Tracking of Shunt Active Power Filter	83
	5.1 Introduction	83
	5.2 Sliding mode controller with feedback linearization	85
	5.2.1 Feedback linearization.....	85
	5.2.2 Sliding mode control.....	86
	5.3 Modeling of shunt active power filter for sliding mode control	87

	5.3.1 Tracking of current reference	87
	5.3.2 Regulation of DC link voltage.....	90
	5.3.4 Controller design.....	94
	5.4 Simulation results	95
	5.5 Experimental result.....	99
	5.6 Conclusions.....	100
Chapter- 6	Topological Variations of Active Power Filter	103
	6.1 Introduction.....	103
	6.2 System configuration	104
	6.3 Design of passive filter	108
	6.3.1 Passive filter for Topology-A	108
	6.3.2 Passive filter for Topology-B	110
	6.4 Understanding dynamics of APF	110
	6.5 Controller design.....	115
	6.5.1 Synchronous reference theory based approach.....	115
	6.5.1.1 Controller design of Topology-A.....	115
	6.5.1.2 Controller design of Topology-B.....	117
	6.5.2 ANN based controller for dual parallel topology.....	117
	6.6 Simulation and experimental results for Topologies A & B.....	119
	6.6.1 Simulation and experimental results for Topologies-A.....	120
	6.6.1.1 Performance of Topology-A (Simulation Results).....	120
	6.6.1.2 Performance of Topology-A (Experimental Results).....	133
	6.6.2 Simulation and experimental results for Topology-B.....	148
	6.6.2.1 Performance of Topology-B (Simulation Results).....	148
	6.6.2.2 Performance of Topology-B (Experimental results).....	157
	6.7 Conclusions.....	167
Chapter 7	Conclusions	171
	7.1 General.....	171
	7.2 Major conclusions.....	172
	7.3 Major contributions.....	175
	7.4 Future scope of work.....	176
