<i>Symbols and Notations</i>	<i>xi</i>	
<b>CHAPTER I</b>	<b>INTRODUCTION</b>	<b>1</b>
1.1	An Outline of the Problem.....	1
1.2	Origin of the Present Research.....	5
1.3	Overview and state-of-art.....	6
1.4	Objectives.....	9
1.5	Thesis Organization.....	10
<b>CHAPTER II</b>	<b>REVIEW OF LITERATURE</b>	<b>11</b>
2.1	An Outline of the Problem.....	11
2.2	Uncoupled Slosh Dynamics (Liquid Sloshing in Rigid Containers) .....	13
2.3	Solid-Liquid Coupled Slosh Dynamics .....	31
2.4	Conclusions from the survey of literature on sloshing .....	55
2.5	Navier-Stokes based Flow-Induced Vibration of Cylindrical Structures.....	56
2.6	Isotropic Shells of Revolution .....	77
2.7	Important Observations from Literatures on FIV.....	80

---

<b>CHAPTER III</b>	<b>LIQUID SLOSHING IN VARIOUS CONTAINER GEOMETRIES</b>	<b>81</b>
3.1	Introduction .....	81
3.2	Mathematical Formulation .....	84
3.3	Results and Discussion .....	99
3.3.1	Rectangular Tanks .....	99
3.3.2	Annular Cylindrical Tanks .....	107
3.3.3	Trapezoidal Tanks .....	110
3.3.4	Circular Tanks (Horizontal Cylindrical Tanks) .....	117
<b>CHAPTER IV</b>	<b>SLOSHING IN CONTAINERS WITH SUBMERGED COMPONENTS</b>	<b>143</b>
4.1	Introduction .....	143
4.2	Mathematical Formulation .....	146
4.3	Results and Discussion .....	151
4.3.1	Rectangular Tanks with submerged blocks .....	151
4.3.2	Rectangular Tank with baffles .....	178
4.3.3	Rectangular Tank with partition walls .....	184
<b>CHAPTER V</b>	<b>LIQUID SLOSHING IN THREE-DIMENSIONAL CONTAINERS</b>	<b>197</b>
5.1	Introduction .....	197
5.2	Mathematical Formulation .....	198
5.3	Results and Discussion .....	205
5.4.1	Rectangular Containers .....	205

---

5.4.2	Cylindrical Containers .....	214
<b>CHAPTER VI</b>	<b>COUPLED SLOSH DYNAMICS</b>	<b>217</b>
6.1	Introduction .....	217
6.2	Mathematical Formulation .....	219
6.2.1	Structure domain .....	220
6.2.2	Fluid domain .....	223
6.2.3	Time integration of the coupled field equations .....	225
6.3	Results and Discussion .....	228
<b>CHAPTER VII</b>	<b>FLOW-INDUCED VIBRATION OF CIRCULAR CYLINDRICAL TUBES</b>	<b>235</b>
7.1	Introduction .....	235
7.2	Mathematical Formulation .....	239
7.2.1	Structure solver .....	240
7.2.2	Fluid Solver (The Navier-Stokes Solver) .....	246
7.3	Results and Discussion .....	251
<b>CHAPTER VIII</b>	<b>CONCLUSIONS</b>	<b>265</b>
<b>REFERENCES</b>		<b>273</b>
<b>RESUME</b>		<b>297</b>

## SYMBOLS AND NOTATIONS

The symbols and notations used in the thesis are mostly defined where they appear. Nevertheless, some of the important symbols are defined in this section.

$a$	Position of the block (distance of left wall of the block from the left wall of the tank)
$\{d\}$	Generalized displacement vector
$L, L_L$	Width of rectangular tank
$B_{tw}$	Interface boundary between tank wall and the fluid
$B_{cw}$	Interface boundary between component wall and the fluid
$B_f$	Liquid free surface boundary
$B_{tb}$	Bottom boundary of the tank
$B_{cb}$	Bottom boundary of the component
$c$	Velocity of sound in the fluid medium
$C_m$	Added mass coefficient
$C_l, C_d$	Coefficients of lift and drag
$[E]$	Matrix of elastic stiffness
$f$	Frequency in Hz.
$F_s$	Force
$(F_s)_t$	Dynamic force
$G$	Shear modulus
$H_L, d$	Depth of the liquid in the tank
$H_S$	Height of the tanks
$g$	Acceleration due to gravity.
$h$	Position of the baffle from free surface, height of the submerged block
