List of Symbols and Abbreviations	xvi

Chapter	1. INTRODUCTION	
1.1.	Background	1
1.2.	Objective and Scope of the Investigation	3
1.3.	Thesis Layout	5
Chapter	2 LITERATURE REVIEW	
2.1	Introduction	7
2.2	Binder Characterization	7
2.3	Resilient Modulus of Bituminous Mixes	12
2.3.1	Influence of Different Parameters on Resilient Modulus	13
2.4	Fatigue Cracking	19
2.4.1	Repeated flexure	22
2.4.2	Diametral fatigue test	24
2.4.3	Laboratory wheel-track fatigue tests	25
2.4.4	Identification of Fatigue Failure	26
2.4.5	Influence of Different Parameters on Fatigue Performance	27
2.5	Permanent Deformation	34
2.5.1	Permanent Deformation Testing methods	36
2.5.1.1	Indentation tests	37
2.5.1.2	Uni-axial stress tests	37
2.5.1.3	Triaxial stress tests	38
2.5.1.4	Indirect tensile test	38
2.5.1.5	Shear Stress Tests	39
2.5.1.6	Wheel-Tracking Tests	39
2.5.2	Influence of Different Parameters on Rutting in Mixes	40
2.6	Summary	50

Chapter	3	BINDER CHARACTERISATION	
	3.1	Introductory Remarks	53
	3.2	Selection of Binders for Investigation	53
	3.3	Preliminary Evaluation of Binders	54
	3.4	Viscosity Measurement of Binders	56
	3.5	Evaluation of Rheological Parameters using DSR	58
	3.6	Zero Shear Viscosity (ZSV)	73
	3.7	Temperature Susceptibility of Binders	74
	3.8	Development of Master Curve for DSR Parameters	75
	3.9	Concluding Remarks	80
Chapter	4	PRELIMINARY EVALUATION OF BITUMINOUS MIXES	
	4.1	Introduction	81
	4.2	Testing Programme	81
	4.3	Physical Properties of Aggregates	82
	4.4	Static Indirect Tensile Strength Test (ITS)	83
	4.5	Concluding Remarks	91
Chapter	5	RESILIENT MODULUS	
	5.1.	Introduction	93
	5.2.	Experimental Programme	93
	5.3.	ITS Testing Equipment	96
	5.4.	Test Results	99
	5.4.1.	Influence of Different Parameters on Resilient Modulus	113
	5.5.	Moduli of In-Service Mixes	118
	5.5.1.	Details of Field Test Sections	119
	5.5.2.	Collection of Cores	120
	5.6.	Deflection Studies	122
	5.7.	Shift Factor	123
	5.8.	Concluding Remarks	125
Chapter	6	CRACKING CHARACTERISTICS	
	6.1	Introduction	127
	6.2	Fatigue Test Programme	128
	6.2.1	Fatigue Test Setup	128
	6.2.2	Analysis of Test Results	131
	6.2.3	Failure Criteria and Analysis Method	132
	6.2.4	Fatigue Test Results	134
	6.3	Fatigue Performance of Bituminous Mixes	138
	6.4	Surface Initiated Cracking	143
	6.5	Concluding Remarks	150

Chapter	7	PERMANENT DEFORMATION CHARACTERISTICS	
	7.1.	Introduction	153
	7.2.	Static Indentation Test	154
	7.3.	Testing Procedure	156
	7.4.	Indentation Test Results	156
	7.5.	Influence of Mix Variables	158
	7.5.1.	Effect of Binder Type and its Content	158
	7.6.	Correlation Between Field and Lab Permanent Deformation	160
	7.6.1.	Incremental Static Indentation Test	162
	7.7.	Relative Rutting Performance of Mixes	167
	7.8.	Concluding Remarks	167
Chapter	8	CONCLUSIONS AND FUTURE SCOPE OF STUDY	
	8.1	Conclusions	169
	8.2	Scope for further study	173
	8.3	Contributions from the Present Research Work	174
		REFERENCES	175
Appendix-	A	STRUCTURAL EVALUATION OF IN-SERVICE SECTIONS USING FWD	
	A1	Test Location Details	A-1
	A2	Calibration of FWD Sensors	A-1
	A3	Deflection Measurement	A-3
	A4	Backcalculation of Layer Moduli	A-8
	A5	Temperature Correction for Moduli	A-10
