List of Symbols	xxi
Abstract	xxv
Contents	xxvii
 Chapter 1: Introduction	
1.1. Background	1
1.2. Motivation for the Present Study	3
1.3. Objectives of the Present Research	4
 Chapter 2: Literature Review	
2.1. Theoretical Analysis and Modeling of the Thermal Conductivity of Nanofluids	5
2.1.1. Conventional Models for Two-Phase Mixture	5
2.1.2. Existing Models of Thermal Conductivity of Nanofluids	6
2.1.2.1. Layered Structure Models	7
2.1.2.2. Models based on Brownian Motion of Nanoparticles	9
2.1.2.3. Micro-convection Models	11
2.1.2.4. Models based on Nanoparticle Clustering	13
2.1.3. Controversy on Heat Transfer Mechanism of Nanofluids—Need for a Concrete Model	17
2.2. Experimental Studies on Nanofluids	18

2.2.1. Synthesis of Nanofluids	18
2.2.1.1. Two-step process	19
2.2.1.2. One-step process	20
2.2.2. Morphological Characterization of Nanoparticles in Nanofluids	22
2.2.3. Measured Thermal Conductivity of Nanofluids	23
2.2.3.1. Nanofluids Containing Metallic-Oxide Nanoparticles	23
2.2.3.1.1. Al_2O_3 -Nanofluids	23
2.2.3.1.2. CuO-Nanofluids	27
2.2.3.1.3. TiO_2 -Nanofluids	29
2.2.3.2. Nanofluids Containing Metallic Nanoparticles	30
2.2.3.2.1. Cu-Nanofluids	30
2.2.3.2.2. Ag- or Au-Nanofluids	32
2.2.3.2.3. Fe-Nanofluids	33
2.2.3.3. Carbon Nanotube Suspensions	34
2.2.4. Influence of Different Parameters on Thermal Conductivity of Nanofluids	37
2.2.4.1. Effect of Volume Fraction of Nanoparticles	37
2.2.4.2. Effect of Nanoparticles Material	37
2.2.4.3. Effect of Nanoparticles Size	38
2.2.4.4. Effect of Nanoparticles Shape	38
2.2.4.5. Effect of Temperature of the Nanofluid	38
2.2.4.6. Effect of Sonication Time	39
2.2.4.7. Effect of the Type of Base Fluid	39
2.2.4.8. Effect of Surfactant	39
2.3. Inference	40

Chapter 3: Model Formulation

3.1. Overview	41
3.2. Simulations Using Molecular Dynamics	44
3.2.1. General Steps of Molecular Dynamics Simulation	44
3.2.1.1. Initialization of Positions and Velocities of the Atoms	44
3.2.1.2. The Force Calculation	45
3.2.1.3. Integrating the Equations of Motion Using Velocity-Verlet Algorithm	46
3.3. Collision of a Cu Nanoparticle with a Cu Heat Source	48
3.3.1. Generation of a Heat Source and a Nanoparticle	48
3.3.2. Equilibration at a Predetermined Temperature	49
3.3.3. Phase Space of the Nanoparticle and Heat Source prior to Collision	52
3.3.4. MD Simulation of Collision	52
3.3.4.1. Drag Force on the Nanoparticle during Collision	53
3.3.4.2. Estimation of Temperature Variation of Nanoparticle and Heat Source during a Collision	54
3.3.5. Calculation of Collision Period	55
3.3.6. Estimation of Collision Induced Temperature Rise of the Nanoparticle	56
3.3.7. Kinetic Energy Distribution of the Nanoparticle and Heat Source prior to and after Collision	57
3.4. Brownian Motion of a Cu Nanoparticle in Water Medium	57
3.4.1. Stochastic Simulation to Generate Trajectory of Brownian Motion of a Cu Nanoparticle	57
3.4.2. Evaluation of Temperature Variation of the Nanoparticle during Brownian Motion	60

3.5. Evaluation of Thermal History of a Cu Nanoparticle in a Water Based Nanofluid	62
3.6. Estimation of Thermal Conductivity Enhancement of Nanofluid	63
3.7. Coupled MD-Stochastic Simulation for Different Particle Sizes	64
3.8. MD Simulation of Collision for a Cylindrical Nanoparticle	66
3.9. Coupled MD-Stochastic Simulation for Different Temperatures of Base Fluid	67
3.10. Coupled MD-Stochastic Simulation for Water Based Nanofluids Containing Other Type of Nanoparticles	68
3.10.1. Water Based Ag-Nanofluid	68
3.10.2. Water Based Zn-Nanofluid	69

Chapter 4: Experimental

4.1. Synthesis of Nanofluid	71
4.1.1. Preparation of Cu-Nanofluid	71
4.1.1.1. Preparation of Cu Nanoparticles by Mechanical Milling	71
4.1.1.2. Dispersion of Cu Nanoparticles in Fluids	72
4.1.2. Preparation of Cu ₉ Al ₄ -Nanofluid	72
4.1.2.1. Preparation of Cu ₉ Al ₄ Nanoparticles by Mechanical Alloying	72
4.1.2.2. Dispersion of Cu ₉ Al ₄ Nanoparticles in Fluids	73
4.1.3. Preparation of Ag-Nanofluid	73
4.1.3.1. Preparation of Ag Nanoparticles	73
4.1.3.2. Dispersion of Ag Nanoparticles	73
4.2. Characterization of Nanoparticles	74
4.2.1. X-ray Diffraction	74
4.2.2. Scanning Electron Microscopy	74
4.2.3. Transmission Electron Microscopy	74
4.2.4. Dynamic Light Scattering	75
4.2.5. Fourier Transform Infrared Spectroscopy	75

4.3. Measurement of Thermal Conductivity of Nanofluids by Transient Hot-Wire Method	75
4.3.1. Experimental Setup	76
4.3.2. Theoretical Basis	77
4.3.3. Calibration	78

Chapter 5: Results and Discussion

5.1. Water Based Cu-Nanofluid	81
5.1.1. Simulation Results	81
5.1.1.1. Equilibration of Cu Nanoparticle and Cu Heat Source	81
5.1.1.2. Configuration of the Nanoparticle with respect to Heat Source prior to Collision	84
5.1.1.3. MD Simulation of Collision of a Cu Nanoparticle with a Cu Heat Source	85
5.1.1.4. Collision Period	90
5.1.1.5. Thermal Pick up of the Nanoparticle due to the Collision	93
5.1.1.6. Kinetic Energy Distribution	95
5.1.1.7. Stochastic Simulation	96
5.1.1.8. Coupled MD-Stochastic Simulation	101
5.1.1.8.1. Thermal History of a Single Cu-Nanoparticle Suspended in a Water Based Nanofluid	101
5.1.1.8.2. Estimated Enhancement in Thermal Conductivity	104
5.1.1.9. Effect of Size of the Nanoparticle	105
5.1.1.10. Effect of Shape of the Nanoparticle	108
5.1.1.11. Effect of Temperature of the Base Fluid	110
5.1.2. Experimental Results	111

5.2. Experimental Study on Thermal Conductivity of Cu ₉ Al ₄ -Nanofluid	117
5.3. Theoretical Study on Thermal Conductivity of Water Based Zn-Nanofluid	122
5.3.1. MD Simulation	122
5.3.2. Stochastic Simulation	125
5.3.3. Coupled MD-Stochastic Simulation	126
5.4. Water Based Ag-Nanofluid	128
5.4.1. Simulation Results	128
5.4.2. Experimental Results	129
5.5. General Discussion	137
Chapter 6: Conclusions	143
Chapter 7: Future Scope of Study	147
Chapter 8: References	149
List of Publications	163
