| Abstract | viii |
| Contents | ix |
| Chapter 1 | Introduction |
| | 1-6 |
| | 1.1 General 1 |
| | 1.2 Statement of Problem 4 |
| Chapter 2 | Review of Literature |
| | 7-34 |
| | 2.1 Pesticides Concerns 7 |
| | 2.1.1 Malathion 8 |
| | 2.1.2 Atrazine 9 |
| | 2.2 Pesticide Sorption 10 |
| | 2.2.1 Malathion 12 |
| | 2.2.2 Atrazine 12 |
| | 2.3 Principles of Water and Solute Transport 15 |
| | 2.3.1 Pesticide retardation 17 |
| | 2.3.2 Pesticide degradation 18 |
| | 2.3.2.1 Malathion 20 |
| | 2.3.2.2 Atrazine 20 |
| | 2.4 Leaching of Pesticides 22 |
| | 2.4.1 Laboratory column studies 22 |
| | 2.4.1.1 Malathion 23 |
| | 2.4.1.2 Atrazine 24 |
| | 2.4.2 Field studies 25 |
| | 2.4.2.1 Dynamics of water in crop root zone 25 |
| | 2.4.2.2 Dynamics of pesticides in crop root zone 26 |
| | 2.4.2.3 Dynamics of water and pesticides in lysimeters 28 |
| | 2.4.2.4 Soil core and suction cup analysis studies 30 |
| | 2.5 Modelling Water and Pesticides Transport 31 |
| | 2.6 Concluding Remarks 32 |

CONTENTS

| | Page |
|---|--------------|
| Chapter 3 | 35-64 |
| Materials and Methods | |
| 3.1 Study Areas | 35 |
| 3.1.1 Site details | 35 |
| 3.1.2 Sample collection and preparation | 36 |
| 3.1.3 Determination of soil properties | 36 |
| 3.2 Chemicals and Instruments Used | 36 |
| 3.3 Laboratory Experiments | 37 |
| 3.3.1 Batch sorption experiment | 37 |
| 3.3.1.1 Procedure | 38 |
| 3.3.1.2 Data analysis | 38 |
| 3.3.2 Column experiment | 39 |
| 3.3.2.1 Preparation of soil column | 39 |
| 3.3.2.2 Experimental setup and procedure | 40 |
| 3.3.2.3 Transport models | 42 |
| 3.3.2.4 Temporal moments | 42 |
| 3.3.2.5 Experimental verifications | 43 |
| 3.4 Field Experiments | 44 |
| 3.4.1 Treatments | 44 |
| 3.4.2 Experimental crops | 45 |
| 3.4.2.1 Rice experiment | 45 |
| 3.4.2.2 Potato experiment | 45 |
| 3.4.3 Field plot experiment | 46 |
| 3.4.4 Field lysimetric experiments | 50 |
| 3.4.4.1 Experimental setup | 50 |
| 3.4.4.2 Experimental procedure | 51 |
| 3.4.5 Field data collection procedure | 52 |
| 3.4.5.1 Weather data collection | 52 |
| 3.4.5.2 Soil moisture | 52 |
| 3.4.5.3 Pressure head | 53 |
| 3.4.5.4 Deep percolation | 53 |
| 3.4.5.5 Crop water use and water use efficiency | 54 |
| 3.4.5.6 Irrigation water requirement | 54 |
| 3.4.5.7 Pesticide recovery in rice crop | 55 |

CONTENTS

| | Page |
|--|---------------|
| 3.4.5.8 Pesticide recovery in potato crop | 56 |
| 3.4.5.9 Leachate collection from lysimeters | 56 |
| 3.4.5.10 Pesticide uptake by the crops | 57 |
| 3.4.6 Statistical analysis | 57 |
| 3.5 HYDRUS 1D Model | 57 |
| 3.5.1 Overview | 57 |
| 3.5.1.1 Soil water movement | 58 |
| 3.5.1.2 Inputs and boundary conditions for water flow | 59 |
| 3.5.1.3 Solute movement | 60 |
| 3.5.1.4 Boundary conditions for solute transport | 61 |
| 3.5.1.5 Root water uptake | 61 |
| 3.5.2 Simulation of water, solute and root water uptake | 61 |
| 3.5.2.1 Simulation process | 61 |
| 3.5.2.2 System geometry | 61 |
| 3.5.2.3 Inputs and boundary conditions | 62 |
| Chapter 4 | |
| Results and Discussions | 65-134 |
| 4.1 Laboratory Study | 65 |
| 4.1.1 Soil properties | 65 |
| 4.1.2 Sorption | 66 |
| 4.1.3 Modelling of batch sorption data | 71 |
| 4.2 Pesticide Mobility Using Soil Column | 72 |
| 4.2.1 Bromide | 72 |
| 4.2.2 Malathion | 74 |
| 4.2.3 Atrazine | 76 |
| 4.3 Field Study | 77 |
| 4.3.1 Environmental conditions | 77 |
| 4.3.2 Water dynamics under rice crop | 84 |
| 4.3.2.1 Variation of water pressure during rice growing season | 84 |
| 4.3.2.2 Changes in soil water flux during rice growing season | 86 |
| 4.3.2.3 Deep percolation of water and evapotranspiration under rice crop | 88 |
| 4.3.2.4 Water use efficiency of rice crop | 89 |

CONTENTS

| | Page |
|--|----------------|
| 4.3.3 Water dynamics under potato crop | 89 |
| 4.3.3.1 Variation of soil moisture during potato growing season | 89 |
| 4.3.3.2 Temporal variation of soil water storage under potato crop | 92 |
| 4.3.3.3 Deep percolation loss and evapo-transpiration under potato crop | 97 |
| 4.3.3.4 Water use efficiency of potato crop | 98 |
| 4.3.4 Water balance in lysimeter under rice and potato crop | 99 |
| 4.3.5. Dynamics of malathion under rice crop | 100 |
| 4.3.5.1 Effect of variation in depth and time on malathion movement in soil water during rice crop experiment | 100 |
| 4.3.5.2 Effect of variation in depth and time on malathion concentration in root zone for rice crop experiment | 104 |
| 4.3.5.3 Temporal changes of malathion in plant samples during rice crop experiment | 106 |
| 4.3.6 Dynamics of atrazine applied to potato crop | 106 |
| 4.3.6.1 Temporal variation of atrazine in soil samples during potato crop experiment | 107 |
| 4.3.6.2 Temporal changes of atrazine in plant samples during potato crop experiment | 111 |
| 4.3.7 Pesticide balance in lysimeter under rice and potato crop | 114 |
| 4.4 Modelling Soil Water and Pesticide Leaching | 114 |
| 4.4.1 Modelling of pesticide sorption and mobility under laboratory conditions | 114 |
| 4.4.2 Modelling of pesticide mobility and degradation under field conditions | 115 |
| 4.4.2.1 Calibration of HYDRUS 1D model | 115 |
| 4.4.2.2 Validation of HYDRUS 1D model | 118 |
| Chapter 5 | |
| Summary and Conclusions | 135-140 |
| 5.1 Summary | 133 |
| 5.2 Conclusions | 136 |
| 5.3 Future scope of the study | 137 |
