Contents

Table of Contents **xvii**

List of Figures **xxi**

List of Tables **xxv**

List of Abbreviations **xxvii**

1 Introduction **1**

1.1 Need for Video Compression 2

1.2 Motivation Behind the Present Work 4

1.3 Major Contributions of the Present Work 5

1.4 Outline of the Dissertation 7

2 Background and Literature Survey **9**

2.1 Motion Estimation and Compensation 9

2.2 Block Matching Algorithm 11

2.2.1 Full Search Block Matching Algorithm 14

2.2.2 Fast Search Algorithms for Block Matching Algorithm 14

2.3 Sub-Pixel Motion Estimation 18

2.4 Motion Estimation Architectures 20

2.4.1 Motion Estimation Architectures for Full Search Algorithm 21

2.4.2 Motion Estimation Architectures for Fast Search Algorithms 22

2.5 Conclusions 23

3 Fast Motion Estimation Architecture Based on UCBDS Algorithm 25

3.1 Introduction 26

3.2 Unrestricted Center Biased Diamond Search Algorithm 27

3.3 ME Architecture Based on the UCBDS Algorithm 29

3.3.1 Memory Unit 32

3.3.2 Processing Unit 35

3.3.3 Comparator Tree 36

3.3.4 Control Unit 36

3.4 Results 37

3.4.1 Simulation Results 37

3.4.2 Synthesis Results 38

3.5 Conclusions 40

4 VLSI Architectures for Fast Sub-Pixel Motion Estimation 43

4.1 Introduction 44

4.2 Introduction to Sub-Pixel ME Algorithms 46

4.3 Existing VLSI Architectures for Sub-Pixel ME 50

4.4 VLSI Design for Half-Pixel ME Based on Fast Two Step Search Algorithm 51

4.4.1 Fast Two Step Search Algorithm 51

4.4.2 Architecture of Fast Two Step Search Algorithm 52

4.4.3 Implementation Results 64

4.5 A Fast Algorithm and its Architecture for Quarter-Pixel Motion Estimation 67

4.5.1 The Proposed Fast Search Algorithm for Quarter-Pixel Motion Estimation 68

4.5.2 The Quarter-Pixel Motion Estimation Architecture for the Proposed Fast Search Algorithm 71

4.6 Results 74

4.6.1 Performance Analysis 74
4.6.2 Implementation Results 75
4.7 Conclusions 77

5 Motion Estimation Architectures Based on Fast One-Bit Transformation 79
5.1 One-Bit Transformation 80
5.2 One Bit Transformation Based Fast Motion Estimation 86
5.3 Data Flow Analysis for Diamond Search Algorithm 92
5.4 Proposed Motion Estimation Architectures 95
5.4.1 Proposed Motion Estimation Architecture for Fixed Block Size and Single Reference Frame 95
5.4.2 Proposed Motion Estimation Architecture for Variable Block Size and Single Reference Frame 103
5.4.3 Proposed Motion Estimation Architecture for Multiple Reference Frames 107
5.5 Results 109
5.5.1 Performance of the Proposed Method of Fast 1BT Based ME . . . 109
5.5.2 Implementation Results 110
5.6 Conclusions 114

6 Low Power Motion Estimation Architecture Based on Pixel Truncation 117
6.1 Motion Estimation Methods Based On Pixel Truncation 117
6.2 Proposed Fast Two Stage Search Algorithm for Motion Estimation 120
6.2.1 Summary of the Proposed Fast Two-Stage Search Algorithm 123
6.3 Architecture for the Proposed Fast Two Stage Search Algorithm 125
6.3.1 Proposed Memory Management for the Fast Two Stage Search Algorithm 126
6.3.2 Proposed Architecture for the First Stage of Motion Estimation . . 127
6.3.3 Proposed Architecture for the Second Stage of ME 130
6.4 Results 138

6.4.1 Performance Analysis of the Proposed Algorithm 138
6.4.2 Synthesis Results and Comparison 145
6.5 Conclusions 148

7 Summary and Future Work **151**
7.1 Major Contributions 151
7.2 Scope for Further Studies 154
