Contents

1 Introduction and Motivation **1**

1.1 Graphs, Eigenvalues and Applications 1

1.2 Historical Background 3

1.3 Preliminaries 4

1.3.1 Notations and Definitions 4

1.3.2 Adjacency Matrix 6

1.3.3 Laplacian Matrix 6

1.4 Some Fundamental Results Needed in the Sequel 7

1.5 Scope of the Present Study 8

2 Some New Bounds on the Spectral Radius of Graphs **11**

2.1 Introduction 11

2.2 Upper Bounds for Spectral Radius of Graphs 12

2.3 Bounds on Eigenvalues of Trees 25

2.4 Upper Bound on the Sum of the Spectral Radius of a Graph and its Complement 29

2.5 Lower Bound for Smallest Eigenvalue of Graphs 30

3 Upper Bounds on the Largest Laplacian Eigenvalue of a Graph **33**

3.1 Introduction 33

3.2 Upper Bound on the Largest Laplacian Eigenvalue 34

3.3 Upper Bounds on Largest Laplacian Eigenvalue and Graphs Characterization 38

3.4 Upper Bounds on Largest Laplacian Eigenvalue in Terms of Number of Nodes, Number of Edges and Degree Sequence 48

4 Lower Bounds on the Spectral Radius of an Adjacency and Laplacian Matrix of a Graph 57
4.1 Introduction 57
4.2 Lower Bound on the Spectral Radius of a Graph 58
4.3 Lower Bound on the Spectral Radius of Laplacian Matrix of a Graph . . . 62

5 Graphs Characterized by the Largest Laplacian Eigenvalue 69
5.1 Introduction 69
5.2 Lemmas and Results 70
5.3 Characterization of Graphs 72

6 Lower Bound on the Second Largest Laplacian Eigenvalue of a Graph 79
6.1 Introduction 79
6.2 Lower Bound on the Second Largest Laplacian Eigenvalue of a Graph . . . 80
6.3 The Sum of the Two Largest Laplacian Eigenvalues 93

7 Some Spectral Properties of the Laplacian Matrix of Starlike Trees 101
7.1 Introduction 101
7.2 Lemmas and Results 102
7.3 Some Spectral Properties of Starlike Trees $S(k.n)$ 104
7.4 Bounds for the Largest Laplacian Eigenvalue of a Starlike Tree 107
7.5 The Second Largest and the Least non-zero Laplacian Eigenvalue 111

8 The Laplacian Spectrum of a Graph 115
8.1 Introduction 115
8.2 The Spectrum 116
8.3 The Largest Laplacian Eigenvalue and the Corresponding Eigenvector for Bipartite Graphs 121
8.4 Characterization of Graphs 123
8.5 Eigenvalues and Graph Structure 126

9 A Sharp Upper Bound on the Number of Spanning Trees of a Graph 129
9.1 Introduction 129
9.2 Characterization on Graphs 130
9.3 Maximizing the Product of the Degrees of a Graph 135

9.4 Upper Bound on the Number of Spanning Trees of a Graph 136

10 Laplacian Eigenvalues of a Super Graph of Star Graphs 139
10.1 Introduction 139
10.2 Lemmas and Results 140
10.3 Main Results 141

11 Sharp Bounds on the Sum of the Squares of the Degrees of a Graph 155
11.1 Introduction 155
11.2 Lower Bounds on the Sum of the Squares of the Degrees of a Graph 156
11.3 An Upper Bound on Sum of the Vertex Degree and Average Degree of a Vertex of a Graph 160
11.4 Upper Bounds on the Sum of the Squares of the Degrees of a Graph 165
11.5 Laplacian Eigenvalues with Degree Sequence 178
11.6 Application 180

12 Properties of the First Zagreb Index 181
12.1 Introduction 181
12.2 Basic Definitions 182
12.3 Connection of M_1 to Other Graph Invariants 183
12.4 Lower and Upper Bounds for M_1 185
12.5 An Alternative Proof of Theorem 12.4.1 187

13 Conclusions and Problems for Future Study 191

Bibliography 193
