SYNOPSIS	(i)

CHAPTER - I

INTRODUCTION

1.1 Preliminary Remarks	1
1.2 Power-Law Fluids	2
1.3 Second-order Fluids	5
1.4 Thermoviscous Fluids	11
References	15

CHAPTER - II

FLOW PROBLEMS IN POWER-LAW FLUIDS

Part One

SIMILAR SOLUTIONS OF LAMINAR BOUNDARY LAYER EQUATIONS FOR POWER-LAW FLUIDS IN THREE DIMENSIONS

2.1 Introduction	20
2.2 Equations of Motion	22
2.3 Similarity Solutions of Boundary Layer Equations	28
2.4 Concluding Remarks	33

A particular case:

AXIALLY-SYMMETRIC STAGNATION POINT FLOW OF POWER-LAW FLUIDS

2.5 Introduction	36
2.6 Equations of Motion	37
2.7 Flow Near a Stagnation Point	38
2.8 Concluding Remarks	42

Part Two

HEAT TRANSFER TO POWER-LAW FLUIDS BETWEEN
PARALLEL PLATES

2.9	Introduction	43
2.10	Basic Equations	43
2.11	Velocity Field	44
2.12	Temperature Field	46
2.13	Entrance Region	52
2.14	Notations	55
	References	58

CHAPTER - III

FLOW OF SECOND-ORDER FLUIDS PAST A
CYLINDER

Part One

FLOW OF A SECOND-ORDER FLUID PAST A SYMMETRI-
CAL CYLINDER

3.1	Introduction	60
3.2	Boundary Layer Equations	63
3.3	Solution	70
3.4	Flow Past a Circular Cylinder	77

Part Two

PERIODIC BOUNDARY LAYERS OF SECOND-ORDER
FLUIDS

3.5	Introduction	82
3.6	Basic Equations	83
3.7	Solution	84
3.8	Discussion	92
	References	94

CHAPTER - IV

TWO-DIMENSIONAL FLOW OF INCOMPRESSIBLE
THERMOVISCOUS FLUIDS

4.1	Introduction	95
4.2	Equations of Motion	96
4.3	Two-dimensional Stagnation Point Flow	101
	References	108
