

# Contents

<b>Chapter 1</b>	<b>Introduction and Summary</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	A Review on the Problems of Estimation Under Restrictions . . . . .	2
1.3	Estimation of Quantiles . . . . .	14
1.4	Estimation of Ordered Parameters . . . . .	15
1.5	A Summary of the Results in the Thesis . . . . .	19
<b>Chapter 2</b>	<b>Some Basic Definitions and Results of Decision Theory</b>	<b>37</b>
<b>Chapter 3</b>	<b>Estimating A Positive Normal Mean</b>	<b>47</b>
3.1	Introduction . . . . .	47
3.2	Some Smooth Estimators for Positive Normal Mean When the Variance is Known . . . . .	48
3.3	Estimating Positive Normal Mean When the Variance is Unknown . . . . .	54
3.4	Numerical Comparisons . . . . .	62
<b>Chapter 4</b>	<b>Estimating A Restricted Normal Mean</b>	<b>69</b>
4.1	Introduction . . . . .	69
4.2	Estimators for the Normal Mean Lying in $[-m, m]$ When the Variance is Known . . . . .	70
4.2.1	A New Smooth Estimator for $\mu \in [-m, m]$ . . . . .	71
4.2.2	Bayes Estimator With Respect to a Two Point Prior . . . . .	72
4.2.3	Bayes Estimator With Respect to a Three Point Prior . . . . .	73

Contents

4.2.4	Bayes Estimator With Respect to the Uniform Prior . . . . .	74
4.2.5	Bayes Estimator With Respect to the Rescaled Prior of Bickel . . . . .	75
4.2.6	Improving Upon the Restricted Maximum Likelihood Estimator . . . . .	76
4.2.7	Numerical Comparisons . . . . .	77
4.3	Estimating the Normal Mean Lying in $[-m, m]$ When the Variance is Unknown . . . . .	85
4.3.1	An Improvement over the Modified Maximum Likelihood Estimator . . . . .	85
4.3.2	Bayes Estimator With Respect to a Two Point Prior for $\mu$ . . . . .	88
4.3.3	Bayes Estimator With Respect to a Three Point Prior for $\mu$ . . . . .	89
4.3.4	Bayes Estimator With Respect to the Uniform Prior for $\mu$ . . . . .	90
4.3.5	Bayes Estimator With Respect to the Rescaled Prior of Bickel for $\mu$ . . . . .	90
4.3.6	Numerical Comparisons . . . . .	91
<b>Chapter 5 Estimating Parameters of An Exponential Population Under Inequality Restrictions</b>		<b>113</b>
5.1	Introduction . . . . .	113
5.2	Estimating Exponential Mean When It is Bounded Below . . . . .	115
5.3	Estimating Exponential Location Parameter When It is Bounded Above	119
5.4	Estimating Exponential Location Parameter When It is Bounded Below	124
5.5	Numerical Comparisons . . . . .	128
<b>Chapter 6 Estimating Lognormal Mean Under Restrictions</b>		<b>137</b>
6.1	Introduction . . . . .	137
6.2	Estimating Lognormal Mean When $\mu \geq 0$ . . . . .	138
6.3	Numerical Comparisons . . . . .	145
6.4	Estimating Lognormal Mean When $\mu$ Lies in $[-m, m]$ . . . . .	152
6.5	Numerical Comparisons . . . . .	159
<b>Chapter 7 Estimating An Inverse Gaussian Mean Under Restrictions</b>		<b>171</b>
7.1	Introduction . . . . .	171

7.2	Estimating A Lower Bounded Inverse Gaussian Mean . . . . .	172
7.3	Some Bayes Estimators for the Lower-bounded Inverse Gaussian Mean	177
7.4	Numerical Comparisons . . . . .	182
<b>Chapter 8 Estimating Ordered Normal Means</b>		<b>189</b>
8.1	Introduction . . . . .	189
8.2	James-Stein Type Estimators for Ordered Normal Means . . . . .	192
8.3	Numerical Comparisons . . . . .	204
8.4	Estimating Ordered Normal Means When Variances are Unequal . . . . .	211
8.5	Estimation of the Middle Among Three Ordered Normal Means . . . . .	216
8.6	Estimation of Components When Variances are Unequal . . . . .	220
<b>Chapter 9 Estimating Ordered Lognormal Means</b>		<b>231</b>
9.1	Introduction . . . . .	231
9.2	Some Estimators and Their Risk Functions . . . . .	233
9.3	The Pitman and The Maximum Likelihood Estimators . . . . .	242
9.4	Numerical Comparisons . . . . .	244
<b>Chapter 10 Estimating Quantiles of a Normal Population Under Restrictions on the Mean</b>		<b>247</b>
10.1	Introduction . . . . .	247
10.2	Improving Upon the Usual Estimators of the Normal Quantile . . . . .	248
10.3	An Inadmissibility Result for the Scale Equivariant Estimators . . . . .	256
10.4	Some Heuristic Estimators Based on the Restricted MLE . . . . .	259
<b>Appendix I Appendix</b>		<b>267</b>
I.1	Evaluation of Risk Functions . . . . .	267
I.2	Derivation of the Conditional Probability Density of $X_1$ given $(\bar{X}, S^2)$	272
I.3	Proof of Statement (5.2.4) . . . . .	274
