Table of Contents

CHAPTER 1: INTRODUCTION 1

1.1. Background 1

1.2. Deterioration 3

1.3. Maintainability and Maintenance 5

1.4. Availability 7
- 1.4.1. Instantaneous Availability 8
- 1.4.2. Average availability (or interval availability) 8
- 1.4.3. Steady state availability 8

1.5. Maintenance Optimization 10

1.6. Scope of the thesis 10

1.7. Statement of the problem 12

1.8. Aim 13

1.9. Organization of the thesis 13

CHAPTER 2: LITERATURE REVIEW 17

2.1. Introduction 17

2.2. Background and Survey Articles 18

2.3. Existing Maintenance policies 20
- 2.3.1. Age replacement policy 20
- 2.3.2. Periodic PM policy 20
- 2.3.3. Failure limit policy 21
- 2.3.4. Sequential PM policy 21
- 2.3.5. Repair limit policy 21
- 2.3.6. Repair number counting and reference time policy 21
- 2.3.7. Group maintenance policy 22
- 2.3.8. Opportunistic maintenance policy 22
- 2.3.9. Machine interference/ repair policy 22

2.4. Review of Latest literature on Deterioration Modeling 23
- 2.4.1. Continuous modeling 23
- 2.4.2. Shock Modeling 26
- 2.4.3. Markov Modeling 28

2.5. Observations made from the Literature Review 32

CHAPTER 3: GENERALIZED TIME BASED PREVENTIVE MAINTENANCE POLICY 35

3.1. Introduction 35
3.1.1. Definitions 37
3.1.2. Notations 38
3.2. Assumptions 39
3.3. The models 41
3.4. Differential equations 43
3.4.1. Model 1 43
3.4.2. Model 2 44
3.5. Recursive solution 45
3.5.1. Model 1 45
3.5.2. Model 2 46
3.5.3. Model 3 46
3.6. Optimization 46
3.6.1. Availability maximization 47
3.6.2. Total cost minimization 48
3.6.3. The cost model 48
3.6.4. Optimization procedure 51
3.7. Examples 52
3.7.1. Hypothetical example 52
3.7.2. Case Study: Truck tire retreading problem 53
3.8. Conclusions 59

CHAPTER 4: A CBM POLICY WITH GENERAL EFFECTIVE PM ACTIONS 61

4.1. Introduction 61
4.1.1. Notations 63
4.2. Assumptions 63
4.3. The model 64
4.4. State-transition equations 65
4.5. Recursive solution 71
4.6. Optimization 75
4.6.1. Availability Maximization 76

Copyright IIT Kharagpur

4.6.2. Total cost minimization 76
4.6.3. The cost model 77
4.6.4. Optimization procedure 80
4.7. Examples 81
4.8. Conclusions 83

CHAPTER 5: A CBM POLICY WITH MULTIPLE GENERAL PM ACTIONS 85

5.1. Introduction 85
5.1.1. Notations 88
5.2. Assumptions 89
5.3. The model 90
5.4. State transition equations 91
5.5. Steady-state recursive solution 100
5.6. Optimization 105
5.6.1. Availability Maximization 106
5.6.2. Total cost Minimization 106
5.6.3. The cost model 107
5.6.4. Optimization procedure 111
5.7. Examples 112
5.7.1. Hypothetical Example 112
5.7.2. Case Study
OPTIMUM SCHEDULES FOR ONLINE AND OFFLINE WASHINGS OF THE GAS TURBINE COMPRESSOR 117
5.8. Conclusions 126

CHAPTER 6: A CONDITION BASED INSPECTION AND MAINTENANCE POLICY 129

6.1. Introduction 129
6.1.1. Notations 132
6.2. Assumptions 133
6.3. The model 134
6.4. The Methodology 137
6.4.1. Differential equations 137
6.4.2. Recursive Solution 140
6.5. Optimization 142

Copyright IIT Kharagpur

6.5.1. Availability Maximization 143
6.5.2. Total cot Minimization 143
6.5.3. Optimization procedure 145
6.6. Example 147
6.7. Conclusions 149

CHAPTER 7: REPAIR CREW OPTIMIZATION USING JOINT REPAIR IN MACHINE INTERFERENCE PROBLEM 151

7.1. Introduction 151
7.1.1. Notations 154
7.1.2. Definitions 155
7.2. Assumptions 157
7.3. Methodology for finding optimum c in MIP with no JR 157
7.3.1. Net Benefit (NB) Calculation 160
7.3.2. Procedure for finding optimum 'c' 161
7.4. Example 161
7.5. Methodology for finding optimum c in MIP with JR 163
7.5.1. Assumptions for joint repair 165
7.5.2. Transition rates of an 'N' machine system with joint repair 167
7.5.3. Example 167
7.6. K-out-of-N:G system 170
7.6.1. Transition rate for K-out-of-N:G system without joint-repair 172
7.6.2. Transition rate for K-out-of-N:G system with joint-repair 172
7.6.3. Example 173
7.7. Load sharing K-out-of-N:G system 175
7.7.1. Transition rate for load sharing K-out-of-N:G system without joint-repair 176
7.7.2. Transition rate for load sharing K-out-of-N:G system with joint-repair 177
7.7.3. Example 177
7.8. Conclusions 179

CHAPTER 8: CONCLUSIONS AND FUTURE WORK 181

8.1. Conclusions 181
8.2. Scope for Future Research 182
