## Table of Contents

### Chapter 1: Introduction

1.1	Introduction	1
1.2	Literature Review	7
1.2.1	Process Industries - RCM Implementation - Results	7
1.2.2	PDM-Expert Systems- Equipment Health Monitoring	10
1.2.3	Integration PDM-Prognosis-Reliability Modelling	11
1.2.3.1	Failure Data and Predictive Maintenance Data	12
1.2.3.2	Operating Context	14
1.2.3.3	Equipment Health – Reliability - Maintenance Performance	16
1.2.4	PDM – Fuzzy Logic - Reliability	16
1.2.4.1	Predictive Maintenance Data and Reliability	17
1.3	Motivation and Objectives	19
1.4	Research Approach	27
1.5	Layout of the Thesis	28

### Chapter 2: Predictive Maintenance Technology

2.1	Introduction	31
2.2	Survey of PDM Techniques used Indian Steel Plants	33
2.3	Predictive Maintenance of Large Electric Motor	35
2.4	Some Successful Case of Predictive Monitoring	40
2.4.1	Early Detection of Bearing Defect	41
2.4.2	Detection Stator Core Damage	41
2.4.3	Detection Rotor Bar Damage	43
2.5	Integration of Predictive Monitoring into Prognosis	44
2.6	Conclusions	45

---

## **Chapter 3: Equipment Health Assessment using Predictive Maintenance Data**

3.1	Introduction	46
3.2	Why Equipment Health Index?	48
3.3	Equipment Health Index Model	52
3.3.1	Response Variables	55
3.3.2	Computing Overall Health Index	55
3.4	Case Study	57
3.4.1	Results	59
3.5	Root Cause Analysis and Reliability Improvement	62
3.5.1	Gearbox and Internal Parts	64
3.6	Conclusions	65

## **Chapter 4: Fuzzy Estimation of True Degradation of Process Equipment**

4.1	Introduction	67
4.2	Degradation of Process Equipment	68
4.3	Model for Estimating True Degradation	75
4.4	Case Study for Estimating True Degradation	78
4.4.1	Steel Rolling Process – Equipment Degradation – Maintenance	79
4.4.2	Dynamic Load Estimation	80
4.5	Results	89
4.6	Development of Equipment Specific Health Acceptance Criteria	91
4.7	Conclusions	93

---

## **Chapter 5: Maintenance Resource Planning through Failure Probability and Fuzzy Fault Tree Analysis**

5.1	Introduction	94
5.2	Methods of Failure Mode Identification	95
5.3	Fuzzy Fault Tree Analysis	97
5.3.1	Fuzzy Arithmetic Operations	99
5.4	Large Motor as a System of Four Sub Systems	100
5.5	Case Study on a Large Electric Motor	110
5.6	Review of Maintenance Requirements of Motors	128
5.7	Conclusions	129

## **Chapter 6: Prioritization of Maintenance Tasks using Possibility of Failure Detection**

6.1	Introduction	130
6.2	FMECA and PDM Data	131
6.3	Proposed Approach and Risk Priority Number	132
6.4	Failure Mode Detection and Predictive Maintenance	134
6.4.1	Potential – Function Failure and Probability of Failure Mode	135
6.4.2	Possibility of Failure Mode Detection	137
6.5	Proposed Approach	139
6.6	Case Study	142
6.7	Conclusions	150

---

<b>Chapter 7: Equipment Renewal Decision Support System with PDM Data</b>	
7.1 Introduction	152
7.2 Equipment as System of Sub Systems and PDM	153
7.3 Fuzzy Stat Modelling of PDM Data	155
7.3.1 Fuzzy Sets and Degree of Match Operation	156
7.3.2 Expert Rule Base and Hierarchical Fuzzy Inference	157
7.3.3 Applying Conjunction and Disjunction Operations	158
7.4 Proposed Model of Hierarchical Health Assessment	159
7.5 Case Study	162
7.6 Managerial Aspects and Conclusions	169
<b>Chapter 8: Conclusions</b>	
8.1 Summary of research wok	171
8.1 Conclusions	173
8.2 Contributions made by the author	176
8.3 Future Directions	177
<b>Publications from the present study</b>	180
<b>References</b>	182
