Approval **5**

List of Figures vii

List of Tables xiii

List of Symbols and Abbreviations xv

1 Introduction **1**

1.1 Single Inductor Multiple Output (SIMO) Converters 1

1.2 Survey of SIMO Converters 4

1.2.1 Literature Review 5

1.2.1.1 Existing SIMO Topologies 5

1.2.1.2 Inductor Current Switching Schemes 6

1.2.1.3 Existing Analysis of SIMO Structures 7

1.2.2 Control of SIMO Class of Converters 8

1.2.3 Product Survey 15

1.2.4 Related Patents 15

1.2.4.1 Topologies with all Buck Outputs 16

1.2.4.2 Topologies with all Boost Outputs 16

1.2.4.3 Topologies with Buck and Boost Outputs 16

1.2.4.4 Topologies with Inverted Outputs 17

1.3 Motivation for the Thesis 19

1.4 Contribution and Organization of the Thesis 20

2 Inductor Current Ripple-Based Modeling of SIMO Converters **23**

2.1 Introduction 23

2.2 SIMO DC-DC Converter Topologies 24

2.3 Review of Existing Modeling Schemes for SIMO Converters 26

2.3.1 Inductor Current Switching Schemes 26

Copyright IIT Kharagpur

2.3.1.1 Time-Multiplexed Switching Scheme 27
2.3.1.2 Current-Shared Switching Scheme 27
2.3.1.3 Comparing Accuracy Performance 28
2.3.2 Existing Modeling Related to SIMO Converters 28
2.4 Inductor Current Ripple-Based State Space Averaging 29
2.4.1 Analysis of 1-2G Converter 30
2.4.2 Small Signal Modeling 31
2.4.3 State Space Equations 32
2.4.3.1 Mode 1 32
2.4.3.2 Mode 2 33
2.4.3.3 Mode 3 34
2.4.4 Averaged Model of the Converter 35
2.4.4.1 Steady State Solution 35
2.4.4.2 Small Signal Perturbation and Linearization 36
2.4.4.3 Transfer Functions of the Converter 38
2.4.5 Operating Range 38
2.4.5.1 1G-2 Converter 38
2.4.5.2 1-2-F Converter 40
2.4.5.3 1-2G Converter 41
2.5 Results and Discussions 42
2.5.1 Simulation Results for 1-2G Converter 43
2.5.2 Experimental Results for 1-2G Converter 44
2.5.2.1 Steady State 44
2.5.2.2 AC Analysis 45
2.5.3 Comparative Study of Simulation and Experimentation 48
2.6 Discussions 50

3 A Single-Inductor Multiple-Output Switcher with Simultaneous Buck, Boost and Inverted Outputs 51
3.1 Introduction 51
3.2 SIBBI Operation 52
3.2.1 Switch Implementation and Switching Scheme 53
3.3 Small Signal Modeling of SIBBI 55
3.3.1 State Space Equations 56
3.3.1.1 Mode 1 57

Copyright IIT Kharagpur

3.3.1.2 Mode 2 . . . 57
3.3.1.3 Mode 3 . . . 58
3.3.1.4 Mode 4 . . . 59
3.3.2 Averaged Model of the Converter . . . 60
3.3.2.1 Steady State Solution . . . 61
3.3.2.2 Small Signal Perturbation and Linearization . . . 63
3.3.2.3 Transfer Functions of the Converter . . . 65
3.4 Operating Range . . . 66
3.5 Results and Discussions . . . 68
3.5.1 Simulation Results for SIBBI . . . 68
3.5.2 Experimental Results . . . 69
3.5.2.1 Steady State . . . 69
3.5.2.2 AC Analysis . . . 71
3.5.3 Steady State Comparison of Modeling, Simulation and Experimental Results . . . 71
3.6 Discussions . . . 75

4 Control Methodology for Reduced Cross-Regulation in SIMO Converters 81
4.1 Introduction . . . 81
4.2 Control Philosophy for SIMO Class of Converters . . . 82
4.2.1 A Brief Review of the Existing Control Schemes . . . 82
4.2.2 The Proposed State Feedback Control Methodology . . . 83
4.3 Closed Loop Control for 1G-2 . . . 86
4.3.1 Operation . . . 86
4.3.2 Small Signal Modeling . . . 88
4.3.3 Closed Loop Control . . . 89
4.3.3.1 Self-Loop Compensation . . . 91
4.3.3.2 Cross-Loop Compensation . . . 92
4.3.4 Results and Discussion . . . 93
4.3.4.1 Simulation Results . . . 94
4.4 Discussions . . . 95

5 Practical Implementation of a SIMO Converter in Closed Loop 99
5.1 Introduction . . . 99

5.2 Primary Blocks . . . 100
5.3 Controller Design . . . 100
5.3.1 Compensator Circuit . . . 101
5.3.1.1 Type-II Compensation . . . 101
5.3.1.2 Type-III Compensation . . . 103
5.3.2 Summing Amplifier . . . 104
5.3.3 Ramp Generator . . . 105
5.3.4 Generation of PWM Signals for the SIMO Converter . . . 106
5.3.5 MOSFET Drivers . . . 107
5.4 Experimental Set-Up . . . 108
5.5 Experimental Results and Discussion . . . 108
5.6 Discussions . . . 112

6 Conclusions and Future Scope of Work 113
6.1 Future Scope of Work . . . 115

A Small Signal Modeling of SIMO Converters using Conventional State Space Averaging Technique 117
A.1 Operation of a Single-Inductor Triple-Output Boost Derived SIMO Converter . . . 118
A.1.1 State Space Equations . . . 119
A.1.1.1 Mode 1 . . . 119
A.1.1.2 Mode 2 . . . 120
A.1.1.3 Mode 3 . . . 121
A.1.1.4 Mode 4 . . . 122
A.1.2 Averaged Model of the Converter . . . 123
A.1.2.1 Steady State Solution . . . 124
A.1.3 Comparison of State Space with Ripple Space Modeling Approach 125
A.2 Discussion . . . 127

B PCB Design and Layout 129
B.1 DC Parasitics . . . 129
B.2 AC Parasitics . . . 131
B.3 Noise . . . 133
B.4 Grounds and Grounding . . . 134
B.5 Radiated Electro-Magnetic Interference (EMI) . . . 135
