

C O N T E N T S

1.	Synopsis	...	iv
	Statement of the Problem - Summary and Conclusions.		
1.	Introduction	...	1
	Object of the Thesis - Previous Work in the Field - Plan of the Thesis.		
2.	Theoretical Analysis	...	4
	The Governing Equations of the Two-Phase Flow Field - Simplification of the Governing Equations - Rate Equations - One-Dimensional Treatment and Solutions by Method of Small Perturbations.		
3.	Experimental Studies	...	50
	Experimental Set-Up - Instrumentation - Experiments on Constant Area Aerothermopressor - Calculation and Results.		
4.	Conclusion	...	93
	Discussion and Inferences - Suggestions for Further Work.		
ii.	Appendix	...	99
	Specimen Calculation - List of Tables and Figures - Additional References and Bibliography.		

Nomenclature is given at the beginning and references at the end of each chapter.
