Abstract			xi			
Contents			xii			
List of Tables			xvi			
List of Figures			xvii			
Chapter 1	Intro	oduction	1			
	1.1	General	1			
	1.2	Objectives	4			
Chapter 2	Revi	iew of Literature	5			
	2.1	Classification of vegetable transplanters and seedlings	5			
		2.1.1 Classification of vegetable transplanters	5			
		2.1.2 Classifications of seedlings	6			
	2.2	Production and use of paper pot seedlings	7			
		2.2.1 Techniques for making paper pots	7			
		2.2.2 Use of paper pot seedlings	8			
	2.3	Pot mixes and size of pots for raising seedlings	9			
		2.3.1 Potting mix	9			
		2.3.2 Volume of pot	16			
	2.4	Types of vegetable transplanters and their field performance	19			
		2.4.1 Transplanters for bare-root seedlings	19			
		2.4.2 Transplanters for plug seedlings	23			
		2.4.2.1 Semi-automatic transplanters for				
		plug seedlings	24			
		2.4.2.2 Fully automatic transplanters for				
		plug seedlings	28			
		2.4.2.1.1 Seedling removal devices in automatic	35			
		vegetable transplanter				
		2.4.3 Transplanters for pot seedlings	39			
		2.4.4 Robotic transplanters	45			
		2.4.5 Seedling storage and soil working components	46			
	2.5	Cost analysis of vegetable transplanters	47			
	2.6	Concluding remarks	48			
Chapter 3	Deve	elopment of Suitable Technology and Identification of				

Best Pot Mix and Pot Size for Production of High Quality 52 Seedlings

	3.1	Preparat	ion of pap	er pot					52
	3.2	Compon	ients of	the pot	mix	for	raising	vegetable	55
	3.3	Experiments on growth of paper pot seedlings				5	56		
		3.3.1	Procedure	e for the e	experi	ment	t		57
		3.3.2	Design of	f experim	ent				58
	3.4	Evaluati	on of seed	lling qual	ity				59
		3.4.1	Data anal	ysis					59
	3.5	Effect o and pot	f proportions ize on t	on of FY he growt	'M in th of	soil pape	based p r pot s	potting mix eedlings of	59
		vegetabl	les						50
		3.5.1	Tomato						59
		5.5.2 2.5.2	Chili						04 64
	36	5.5.5 Idontific	Cilli Cillin of t	ha hast a	omhi	natio	n of nr	oportion of	66
	5.0	EVM in	soil based	l pot mix	and n	ot si	n or pro	ising paper	00
		not seed	lings	i pot mix	anu p	01 512		using paper	
		3 6 1	Pareto do	minance					66
		3.6.2	Procedure	2					67
		3.6.3	Best com	bination	of pc	ot mi	x and r	oot size for	68
			raising pa	aper pot s	eedlin	igs			
	3.7	Final di	mensions a	and weigh	nt of p	aper	pots wi	th mix	70
	3.8	Drop tes	st of paper	pot	_				70
Chapter 4	Design of Multi-stack Semiautomatic Vegetable Transplanter					72			
	4.1	Concept	ual design	n of veget	table t	rans	planter		72
	4.2	Mechan	ical design	n of the pi	ropose	ed M	SVT		74
		4.2.1	General	design re	quire	ment	s of the	e vegetable	74
			transplant	ter					
		4.2.2	Number of	of rows					75
		4.2.3	Metering	wheel					78
			4.2.3.1	Design	of me	terin	g wheel	L	79
		4.2.4	Design of	t shaft of	plantı	ng u	nıt		80
		4.2.5	Slotted pl	late desig	n Is s s s:				83
		4.2.6	Support I	rame and	beari	ngs			84
		4.2.7	4271		n syst	for	dagian	of power	0J 05
			4.2.7.1	transmi	ssion	syste	en	or power	05
		4.2.8	Design of	t chain dr	ives		•.		87
		4.2.9	Design of	t ground	wheel	shaf	t		88
		4.2.10	Design of	t main fra	ime				90
		4.2.11	Design of $4.2, 1.1, 1$	snank of	I IUITO	w op	pener		92
		1 2 1 2	4.2.11.1 Design of	Design	OI SHE	ink d	olt		94
		4.2.12	Design of	a i ii oi i	unow	cios	el		94
Chapter 5	Materials and Methods					96			
	5.1	Fabricat	ion of vari	ious comp	ponen	ts of	the MS	VT	96
		5.1.1	Multi-sta	ck plantir	ng uni	t			97
			5.1.1.1	Meterin	ng whe	eels			97
			5.1.1.2	Slotted	plate				99

		5.1.1.3 Frame of the planting unit	100
	5.1.2	Power transmission of the planting units	102
	5.1.3	Furrow opener, furrow closer and seedling delivery tubes	104
	5.1.4	Frame of MSVT	106
	5.1.5	Assembly of various components of the MSVT	109
5.2	Laborat for Sele	cory Testing of Single Planting Unit of the MSVT ection of Suitable Operational Parameters	112
	5.2.1	Soil bin	112
	5.2.2	Soil processing trolley	114
	5.2.3	Implement trolley	114
	5.2.4	Planting unit trolley	114
	5.2.5	Linear motion transmission system	115
	5.2.6	Instrumentation	115
		5.2.6.1 Measurement of soil parameters	115
		5.2.6.2 Measurement of speed and depth of operation	116
		5.2.6.3 Calibration of DC controller	116
	5.2.7	Selection of pot size, furrow opener and closer	117
	5.2.8	Working principle of the multi-stack planting unit	117
	5.2.9	Operational parameters of MSVT	118
	5.2.10	Experimental plan for laboratory testing	118
	5.2.11	Procedure	119
	5.2.12	Data analysis	120
5.3	Perform Actual	nance Evaluation of the Developed MSVT in Field Conditions	121
	5.3.1	Selection and preparation of field	121
	5.3.2	Measurement of forward speed of tractor	121
	5.3.3	Measurement of slip	122
	5.3.4	Measurement of fuel consumption	122
	5.3.5	Measurement of plant spacing in rows	122
	5.3.6	Measurement of depth of transplanting	122
	5.3.7	Measurement of field capacity and field efficiency	122
	5.3.8	Adjustment of various components of MSVT for field evaluation	123
	5.3.9	Procedure of field performance evaluation	124
	5.3.10	Data analysis	126
Resu	lts and D	Discussion	128
6.1	Selectio	on of suitable speed of operation of the MSVT	128
	6.1.1	Effect of speed of operation on feeding efficiency (FE), conveying efficiency (CE), planting efficiency (PE) and overall efficiency (OE) of MSVT	128
	6.1.2	Effect of speed of operation on seedling spacing (SS), angle of inclination of seedling	130

Chapter 6

		(AI) and soil coverage (SC) obtained with MSVT			
	6.1.3	Selection of suitable speed of operation for achieving the maximum FE, CE, PE and acceptable range of SS, AI and SC.	132		
	6.2 Field I Drawn	Evaluation and Cost Economics of the Tractor Three-Row MSVT	134		
	6.2.1	Performance of the MSVT under actual field conditions for transplanting paper pot seedlings of tomato, brinjal and chili	136		
		6.2.1.1 Field capacity and labor requirement	136		
		6.2.1.2 Quality of transplanting	137		
	6.2.2	Cost economics of the MSVT	141		
Chapter 7	Summary and Conclusions
