Abstract	xxv

<b>Chapter 1</b>	<b>Introduction</b>	<b>1-5</b>
------------------	---------------------	------------

<b>Chapter 2</b>	<b>Literature Review</b>	<b>7-41</b>
------------------	--------------------------	-------------

2.1	Introduction	9
2.2	Fatigue: General aspects	10
2.3	Material response to cyclic loading	14
2.4	Ratcheting phenomenon	16
2.5	Ratcheting: historical background	17
2.6	Parameters affecting strain accumulation during ratcheting	19
2.6.1	Effect of mean stress	20
2.6.2	Effect of maximum stress	24
2.6.3	Effect of Stress Ratio	26

2.6.4	Effect of Temperature	27
2.6.5	Material dependence	29
2.7	Theory of Ratcheting	33
2.8	Re-appraisal of the current problem	40
<b>Chapter 3 Selected Materials and Their Characterization</b>		<b>43-68</b>
3.1	Introduction	45
3.2	Experimental procedure	45
3.2.1	Material	46
3.2.2	Chemical composition and heat treatment	46
3.2.3	Microscopic examinations and image analyses	47
3.2.4	Hardness measurement	48
3.2.5	Tensile test	49
3.2.6	Fractographic Examination	50
3.2.7	X-ray diffraction	51
3.3	Results and discussion	51
3.3.1	Material and Microstructural Analyses	51
3.3.2	Hardness and tensile properties	58
3.3.3	Fractographic Analyses	65
3.4	Summary	68
<b>Chapter 4 Ratcheting Behaviour of AISI 304LN Stainless Steel</b>		<b>69-98</b>
4.1	Introduction	71
4.2	Experimental procedure	72
4.2.1	Specimen design	72
4.2.2	Ratcheting test	73
4.2.3	X-ray diffraction	74

4.2.4	Transmission electron microscopy	74
4.3	Results and Discussion	75
4.3.1	Nature of hysteresis loops	75
4.3.2	Effect of stress amplitude on ratcheting strain at constant mean stress	75
4.3.3	Effect of mean stress on ratcheting strain at constant stress amplitude	81
4.3.4	Saturation of ratcheting strain	85
4.3.5	Hardening and softening during asymmetric cyclic loading	85
4.3.6	In-situ variation in substructure and microstructure	89
4.4	Conclusions	98
<b>Chapter 5 Ratcheting Behaviour of Interstitial Free Steel</b>		<b>99-120</b>
5.1	Introduction	101
5.2	Experimental procedure	102
5.3	Results and Discussion	103
5.3.1	Uniaxial ratcheting: nature of hysteresis loops	103
5.3.2	Accumulation of ratcheting strain: Effect of mean stress and stress amplitude	103
5.3.3	Saturation of ratcheting strain	109
5.3.4	Substructural variation in interstitial free steel	112
5.3.5	Post-ratcheting tensile behaviour	115
5.4	Conclusions	120
<b>Chapter 6 Ratcheting Behaviour of Aluminum Alloy</b>		<b>121-141</b>
6.1	Introduction	123
6.2	Experimental Procedure	124

6.3	Results and Discussion	125
6.3.1	Uniaxial ratcheting: Nature of hysteresis loops	126
6.3.2	Accumulation of ratcheting strain under varying stress amplitudes at constant mean stress	129
6.3.3	Saturation of ratcheting strain	134
6.3.4	Post-ratcheting tensile behaviour	135
6.4	Conclusions	140
<b>Chapter 7 Ratcheting Behaviour of <math>\alpha</math>-Brass</b>		<b>143-160</b>
7.1	Introduction	145
7.2	Experimental Procedure	146
7.3	Results and Discussion	147
7.3.1	Uniaxial ratcheting: Nature of hysteresis loops	147
7.3.2	Accumulation of ratcheting strain: effect of stress amplitude and mean stress	149
7.3.3	Saturation of ratcheting strain	152
7.3.4	Post-ratcheting tensile behaviour	153
7.3.5	Ratcheting behaviour and stacking fault energy	157
7.5	Conclusions	159
<b>Chapter 8 General Conclusions and Scope for Future Research</b>		<b>161-166</b>
