<b>Abstract</b>	<b>xxix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Computer-based food process modeling and optimization . . . . .	3
1.2 Fouling in heat exchangers . . . . .	3
1.3 CFD modeling . . . . .	4
1.4 Rice grain hydration during cooking . . . . .	4
1.5 Objectives . . . . .	5
<b>2 Review of Literature</b>	<b>7</b>
2.1 Rice . . . . .	7
2.1.1 Effect of different cooking conditions on rice . . . . .	7
2.1.2 Rice grain hydration . . . . .	8
2.2 Rice as an ingredient in dairy products . . . . .	9
2.2.1 <i>Kheer</i> . . . . .	9
2.2.1.1 Method of preparation of <i>kheer</i> and its composition . . . . .	9
2.2.1.2 Shelf Life of <i>kheer</i> . . . . .	11
2.2.2 Instant <i>kheer/phirni</i> mix . . . . .	12

2.2.2.1	Method of preparation . . . . .	12
2.2.2.2	Physico-chemical properties and shelf life . . . . .	12
2.3	Computer-based food process modeling and optimization . . . . .	13
2.3.1	Neural Network Fundamentals . . . . .	13
2.3.2	Genetic Algorithm Fundamentals . . . . .	14
2.3.3	Fuzzy Logic Fundamentals . . . . .	15
2.4	Processing equipments . . . . .	16
2.4.1	Helical coil heat exchanger . . . . .	16
2.4.2	Screw conveyor . . . . .	17
2.4.3	Shell and tube condenser . . . . .	17
2.5	Fouling of heat exchangers . . . . .	18
2.5.1	Distribution and composition of fouling deposit . . . . .	19
2.5.2	Mechanism of fouling . . . . .	19
2.5.3	Fouling models . . . . .	20
2.5.4	Ways of reducing fouling . . . . .	22
2.6	Simulation of fluid flow and heat transfer in helical coil heat exchanger using Computational Fluid Dynamics (CFD) . . . . .	22
2.7	Mechanization of manufacture of traditional Indian dairy products . . . . .	23
<b>3</b>	<b>Theoretical Considerations</b>	<b>25</b>
3.1	Neural Network Modeling . . . . .	25
3.1.1	Normalization of data set for ANN modeling . . . . .	26
3.1.2	ANN model development . . . . .	26
3.2	Genetic Algorithm Optmization . . . . .	27
3.2.1	Hybrid ANN-GA for modeling and optimization . . . . .	28
3.3	Sensory evaluation of <i>kheer</i> using fuzzy logic modeling . . . . .	30
3.3.1	Scorecard and training of judges . . . . .	30
3.3.2	Fuzzy modelling of sensory score . . . . .	30
3.3.2.1	Triplets associated with sensory scales . . . . .	31
3.3.2.2	Triplets for sensory score of <i>kheer</i> samples . . . . .	32

3.3.2.3	Triplets for sensory score of quality attribute . . . . .	32
3.3.2.4	Triplets for 'relative weighage' of quality attributes . . . . .	33
3.3.2.5	Triplets for overall sensory score of <i>kheer</i> . . . . .	33
3.3.2.6	Value of Membership Functions of Standard Fuzzy Scale . . . . .	33
3.3.2.7	Overall membership functions of sensory score on standard fuzzy scale . . . . .	34
3.3.2.8	Similarity values of <i>kheer</i> samples and quality attributes . . . . .	34
3.4	Thermal property equations based on composition . . . . .	35
3.4.1	Estimation of density, thermal conductivity and specific heat capacity . . . . .	35
3.5	Design criteria of continuous <i>kheer</i> making machine . . . . .	37
3.5.1	Cooking section . . . . .	37
3.5.1.1	Heat transfer coefficient on product side . . . . .	38
3.5.1.2	Heat transfer coefficient on steam side . . . . .	39
3.5.1.3	Overall heat transfer coefficient . . . . .	40
3.5.1.4	Length of helical coil . . . . .	40
3.5.2	Flash chamber . . . . .	41
3.5.3	Condenser . . . . .	41
3.5.3.1	Heat transfer coefficient on liquid and vapor side . . . . .	41
3.5.3.2	Overall heat transfer coefficient . . . . .	41
3.5.3.3	Effective length of condenser . . . . .	42
3.5.4	Rice and sugar conveyor . . . . .	42
3.6	Model development: 2D Heat transfer . . . . .	43
3.6.1	Problem formulation . . . . .	43
3.6.2	Governing equations . . . . .	43
3.6.2.1	Enthalpy balance in control volume . . . . .	43
3.6.2.2	Estimation of overall heat transfer coefficient (with fouling) based on outer diameter . . . . .	44
3.6.2.3	Fouling model for helical coil heating section . . . . .	46
3.6.2.4	Governing Equation–Method of Characteristics . . . . .	47
3.6.3	Numerical scheme for modeling . . . . .	48

3.6.3.1	Initial and boundary conditions . . . . .	48
3.6.3.2	Modified Euler Method . . . . .	48
3.7	Model development: 3D fluid flow, heat transfer and fouling study . . . . .	50
3.7.1	Problem formulation . . . . .	50
3.7.2	Governing equations . . . . .	50
3.7.2.1	Turbulence model . . . . .	50
3.7.2.2	Heat transfer in fluids . . . . .	52
3.7.2.3	Kinetics of milk fouling . . . . .	52
3.7.3	Initial and boundary conditions . . . . .	52
3.7.4	Input parameters and numerical implementation . . . . .	53
3.8	Model development: Rice hydration during cooking . . . . .	55
3.8.1	Governing equation for moisture migration in rice . . . . .	55
3.8.2	Moisture diffusivity . . . . .	58
3.8.3	Particle density . . . . .	59
3.8.4	Starch gelatinization kinetics . . . . .	59
3.8.5	Ceiling moisture content . . . . .	59
3.9	Initial and boundary conditions . . . . .	60
3.9.1	Initial condition . . . . .	60
3.9.2	Boundary condition . . . . .	60
3.9.3	Input Parameters and numerical implementation . . . . .	62
<b>4</b>	<b>Materials and Methods</b>	<b>63</b>
4.1	Preparation of kheer . . . . .	63
4.1.1	Raw materials for <i>kheer</i> preparation . . . . .	63
4.1.2	<i>Kheer</i> prepared in open pan . . . . .	63
4.1.3	<i>Kheer</i> prepared at elevated pressures . . . . .	64
4.2	Analysis of process parameters of <i>Kheer</i> prepared in open pan and pressure cooking vessel . . . . .	65
4.2.1	Color Measurements . . . . .	65
4.2.2	Texture Analysis . . . . .	66

4.2.3	Optimization of process parameters . . . . .	67
4.2.4	Fuzzy logic modeling . . . . .	67
4.3	Determination of thermo physical properties of rice-milk mixture . . . . .	67
4.3.1	Sample preparation . . . . .	67
4.3.2	Determination of density . . . . .	67
4.3.3	Determination of specific heat capacity . . . . .	68
4.3.4	Determination of thermal conductivity . . . . .	68
4.3.5	Determination of viscosity . . . . .	69
4.4	Proximate analysis of rice-milk mixture . . . . .	70
4.4.1	Moisture content . . . . .	70
4.4.2	Ash content . . . . .	70
4.4.3	Protein content . . . . .	71
4.4.4	Fat content . . . . .	71
4.4.5	Carbohydrate content . . . . .	71
4.5	Fouling study . . . . .	71
4.5.1	2D heat transfer model . . . . .	71
4.5.2	3D CFD model . . . . .	72
4.6	Rice cooking experiments . . . . .	72
4.6.1	Measurement of Moisture Content . . . . .	73
4.6.2	CFD Modeling . . . . .	73
<b>5</b>	<b>Results and Discussion</b>	<b>75</b>
5.1	Optimization of process parameters . . . . .	75
5.1.1	Open pan experiments . . . . .	75
5.1.1.1	Whiteness Index and Hardness . . . . .	76
5.1.1.2	Sensory evaluation of open pan samples . . . . .	76
5.1.1.3	Fuzzy logic evaluation of open pan samples . . . . .	77
5.1.2	Elevated pressure experiments . . . . .	79
5.1.2.1	Hardness and Whiteness Index . . . . .	79
5.1.2.2	Sensory evaluation of elevated pressure samples . . . . .	80

5.1.2.3	Fuzzy logic evaluation of elevated pressure samples . . .	81
5.1.3	Neural network modeling . . . . .	83
5.1.4	Genetic algorithm for constrained optimization . . . . .	84
5.1.5	Optimum cooking parameters for the continuous <i>kheer</i> -making machine . . . . .	85
5.2	Thermo–physical properties of rice-milk mixture . . . . .	86
5.3	Design and development of continuous <i>kheer</i> making machine . . . . .	87
5.3.1	Cooking section . . . . .	87
5.3.2	Heating section . . . . .	89
5.3.3	Holding section . . . . .	90
5.3.4	Flash chamber . . . . .	90
5.3.5	Condenser . . . . .	90
5.3.6	Rice conveyor . . . . .	93
5.3.7	Sugar conveyor . . . . .	94
5.4	2-Dimensional heat transfer model . . . . .	95
5.4.1	Variation of bulk-mean temperature with time and length . . . . .	95
5.4.2	Variation of fouling thickness with time and length . . . . .	97
5.4.3	Variation of Biot number with time and length . . . . .	97
5.5	3-D fluid flow, heat transfer and fouling model . . . . .	99
5.5.1	Velocity profile . . . . .	101
5.5.2	Temperature profile . . . . .	101
5.5.3	Variation of overall heat transfer coefficient . . . . .	102
5.5.4	Variation of Biot number and fouling thickness . . . . .	103
5.5.5	Optimizing the design features of the heating section . . . . .	106
5.6	Modeling rice grain hydration during cooking . . . . .	110
5.6.1	Experimental results . . . . .	110
5.6.2	Simulation of rice cooking process . . . . .	110
5.6.2.1	Moisture profile in rice grains at different cooking times	110
