Abstract . . . . .	xxv
<b>1 Introduction</b>	<b>1</b>
1.1 Building energy usage and the future . . . . .	1
1.1.1 Thermal comfort and building energy use . . . . .	1
1.1.2 Role of comfort standards . . . . .	2
1.2 Human thermal comfort . . . . .	2
1.2.1 Whole body human thermal models . . . . .	3
1.2.2 Fanger's model . . . . .	3
1.2.3 Changing face of thermal comfort . . . . .	4
1.2.4 Adaptive comfort standards . . . . .	5
1.2.4.1 Why does the adaptive comfort model work? . . . . .	6
1.2.4.2 Adaptive comfort and energy efficient buildings . . . . .	7
1.3 Thermal comfort for Indian classrooms . . . . .	7
1.4 Research hypothesis . . . . .	8
1.4.1 Research questions . . . . .	8
1.4.2 Research hypothesis . . . . .	9
1.5 Thesis structure . . . . .	9

<b>2 Literature review</b>	<b>11</b>
2.1 Adaptive thermal comfort . . . . .	11
2.2 Field studies on thermal comfort . . . . .	13
2.2.1 Analysing comfort field study data . . . . .	13
2.2.2 Thermal comfort surveys from the different climate zones . . . . .	14
2.2.2.1 Change of neutral temperature over time . . . . .	15
2.2.2.2 Comfort in free running buildings . . . . .	15
2.2.2.3 Neutral vs preferred temperatures . . . . .	16
2.2.2.4 Running mean temperature . . . . .	17
2.2.2.5 Extended PMV . . . . .	18
2.2.2.6 Age, gender, and seasonal differences . . . . .	18
2.2.2.6.1 Age differences . . . . .	18
2.2.2.6.2 Gender differences . . . . .	19
2.2.2.6.3 Seasonal differences . . . . .	20
2.2.2.7 Effects of air movement and humidity . . . . .	21
2.2.2.8 Nature of the surveys . . . . .	23
2.2.2.8.1 Survey questionnaire . . . . .	24
2.2.2.8.2 Adjusting surveys to local traits . . . . .	25
2.2.2.8.3 Determining preferred temperature . . . . .	25
2.2.2.8.4 Percentage dissatisfied . . . . .	26
2.2.2.8.5 Choice of survey parameters . . . . .	26
2.2.2.8.6 What index to use for the indoors? . . . . .	27
2.2.2.9 Adaptive opportunities: their availability and use . . . . .	27
2.2.2.9.1 Use of air-conditioners . . . . .	28
2.2.2.9.2 Adaptive opportunities of buildings . . . . .	30
2.2.2.9.3 Endemic adaptations . . . . .	31
2.2.2.9.4 Common adaptive measures . . . . .	31
2.2.2.9.5 Clothing adaptations . . . . .	32
2.2.2.10 Impediments to adaptive measures . . . . .	33
2.2.2.11 Some interesting contrasts . . . . .	34
2.2.3 Summary of findings . . . . .	35
2.2.3.1 Some adaptive comfort equations . . . . .	37
2.2.4 Thermal comfort field studies in India . . . . .	37
2.2.5 Comfort surveys in classrooms in tropics . . . . .	38
2.2.5.1 Adaptive measures in classrooms and impediments to their exercise . . . . .	39
2.3 Indian building codes . . . . .	40
2.4 Indoor environment and performance . . . . .	41
2.4.1 Effect of ventilation . . . . .	41

---

2.4.2	Effect of thermal environment . . . . .	41
2.4.2.1	Role of task nature . . . . .	42
2.4.2.2	Importance of subjective occupant satisfaction . . . . .	43
2.4.3	Occupant adaptation and performance level . . . . .	43
2.4.4	Indoor environment, productivity, and cost benefits . . . . .	44
2.4.5	Possible health benefits from adaptive comfort standards . . . . .	45
2.5	Passive cooling . . . . .	46
2.6	Gaps in literature and research objectives . . . . .	49
<b>3</b>	<b>Thermal comfort surveys</b>	<b>51</b>
3.1	Study location . . . . .	51
3.2	Thermal comfort studies in NV laboratory . . . . .	52
3.2.1	Study methodology . . . . .	52
3.2.1.1	The laboratory and the subjects . . . . .	52
3.2.1.2	Collection of survey data . . . . .	55
3.2.1.2.1	Indoor environmental parameters . . . . .	55
3.2.1.2.2	Subjective questionnaire . . . . .	57
3.2.1.2.3	Assessing clothing levels and metabolic rates	58
3.2.1.2.4	Outdoor temperature data . . . . .	59
3.2.2	Results and discussions . . . . .	59
3.2.2.1	Analysis of thermal sensation votes . . . . .	60
3.2.2.1.1	Regression neutral temperature . . . . .	61
3.2.2.1.2	Regression using PMV values . . . . .	63
3.2.2.1.3	Comfort temperature using Griffiths' equation	63
3.2.2.1.4	Humidity sensation votes . . . . .	64
3.2.2.2	Acceptability of thermal conditions . . . . .	64
3.2.2.2.1	Thermal acceptance . . . . .	65
3.2.2.2.2	Thermal preference and preferred temperature	66
3.2.2.2.3	Diurnal range of acceptability for temperature variation . . . . .	67
3.2.2.3	Observations regarding adaptive actions . . . . .	67
3.2.2.3.1	Clothing adaptation . . . . .	68
3.2.2.3.2	Use of fans, windows and other adjustments	68
3.3	Thermal comfort studies in NV classrooms . . . . .	70
3.3.1	Study methodology . . . . .	70
3.3.1.1	The classroom and the subjects . . . . .	70
3.3.1.2	Collection of survey data . . . . .	71
3.3.1.2.1	Indoor environmental parameters . . . . .	71
3.3.1.2.2	Subjective questionnaire . . . . .	72

3.3.1.2.3	Outdoor temperature data . . . . .	72
3.3.2	Results and discussions . . . . .	73
3.3.2.1	Analysis of thermal sensation votes . . . . .	74
3.3.2.1.1	Regression neutral temperature . . . . .	75
3.3.2.1.2	Comfort temperature using Griffiths' equation	77
3.3.2.1.3	Sweating sensation votes . . . . .	77
3.3.2.2	Acceptability of thermal conditions . . . . .	77
3.3.2.2.1	Thermal comfort votes and thermal acceptance	79
3.3.2.2.2	Thermal preference and preferred temperature	80
3.3.2.2.3	Diurnal range of acceptability for temperature variation . . . . .	80
3.3.2.3	Observations regarding adaptive actions . . . . .	81
3.3.2.3.1	Use of fans and windows . . . . .	81
3.3.2.3.2	Clothing adaptation . . . . .	83
3.4	A comparison of findings . . . . .	84
3.5	Summary . . . . .	86
<b>4</b>	<b>Comparison of student performance between conditioned and naturally ventilated classrooms</b>	<b>89</b>
4.1	Methodology . . . . .	90
4.1.1	Selection of students and courses . . . . .	90
4.1.2	Comparing performance across courses . . . . .	91
4.1.2.1	Scaling of marks . . . . .	92
4.1.3	Comparing 'ac' and 'nac' courses . . . . .	93
4.1.4	Thermal comfort survey . . . . .	93
4.1.5	Study limitations . . . . .	94
4.2	Results and discussions . . . . .	95
4.2.1	Results of thermal comfort survey . . . . .	95
4.2.2	Scaling of marks and a qualitative comparison . . . . .	96
4.2.3	Statistical tests . . . . .	97
4.2.3.1	Kruskal-Wallis H test . . . . .	97
4.2.3.2	Wilcoxon signed rank test . . . . .	99
4.3	Summary . . . . .	101
<b>5</b>	<b>An adaptive thermal comfort model for the tropical climatic regions of India</b>	<b>103</b>
5.1	Methodology . . . . .	104
5.1.1	Surveys analysed . . . . .	104
5.1.2	Adaptive comfort relations . . . . .	107
5.1.3	Outdoor weather data . . . . .	109

---

5.1.4	Estimating predicted comfort temperatures . . . . .	109
5.1.5	Estimating energy savings from implementation of ACS . . . . .	110
5.2	Results and discussions . . . . .	112
5.2.1	Comparison of predictions from different ACEs . . . . .	112
5.2.2	Energy savings estimates from ACDD, cooling . . . . .	115
5.2.3	Comparison of EN15251 ACE predictions with Kharagpur survey findings . . . . .	117
5.2.4	A model for thermal comfort . . . . .	118
5.3	Summary . . . . .	121
<b>6</b>	<b>Remedial measures for enhancing thermal comfort in naturally ventilated classrooms in tropics</b>	<b>123</b>
6.1	Observations from comfort surveys . . . . .	123
6.2	Measures for enhancing energy efficient comfort . . . . .	125
6.2.1	Building based measures . . . . .	126
6.2.1.1	Lighting efficiency . . . . .	127
6.2.1.2	Site planning and landscaping . . . . .	127
6.2.1.3	Shading . . . . .	128
6.2.1.4	Roofs . . . . .	129
6.2.1.4.1	Cool roofs . . . . .	129
6.2.1.5	Façade . . . . .	130
6.2.1.6	Ventilation . . . . .	131
6.2.1.6.1	Night ventilation . . . . .	132
6.2.1.7	Evaporative cooling . . . . .	133
6.2.2	Occupant based measures . . . . .	133
6.2.2.1	Perceived control and comfort . . . . .	134
6.2.2.2	Metabolic adjustments . . . . .	135
6.2.2.3	Using weather forecasts . . . . .	135
6.2.2.4	Occupancy . . . . .	136
6.2.2.5	'Green' occupants and energy efficient buildings . . . . .	136
6.2.3	Summary of recommendations . . . . .	137
6.3	Adaptive set points for AC buildings . . . . .	141
6.4	Summary . . . . .	142
<b>7</b>	<b>Conclusions and scope for future studies</b>	<b>145</b>
7.1	Conclusion . . . . .	145
7.2	Future studies . . . . .	146
