Chapter 1 A Unique Hydrostatic Motor with Epitrochoid Generated Rotor-stator and its Performance Problem	1
1.1 Introduction	1
1.2 Hydrostatic units with Epitrochoid generated rotor-stator	4
1.3 Literature Survey.....	7
1.3.1 Orbital construction, Rotor-Stator Profiles and Kinematic of ORBIT motors	7
1.3.2 Major problems in ‘ORBIT’ Motors.....	12
1.4 Objectives and Scope.....	14
1.5 Organization of the thesis	16

Chapter 2 Unification of Various Methods of Geometric Design of Constant difference Modified Epitrochoid to shape the Star member	17
2.1 Introduction	17
2.2 Various Approaches of Constant Difference Modified Epitrochoid Profile Design	18
2.3 Unification.....	23
2.4 Paradigm-1: Generation of Constant Difference Shifted Epitrochoid by Rolling the inside of a Larger Circle on a Smaller Fixed Circle (Type 1 Cycloidal Motion).....	24
2.4.1 Transformation to a different co-ordinate system for the purpose of unification.....	27
2.5 Paradigm-2: Cycloidal Gear Tooth Design Approach to Generate Epitrochoid.....	28
2.6 Unification of Approaches in Paradigm 1 and 2.....	30
2.7 Paradigm-3: Generalized Conjugate Circular Pin Gear Design Approach.....	33
2.8 Transformation of Approach in section 2.7 into the Approach in Section 2.4.....	35
2.9 Summary.....	39
Chapter 3 Analysis of Active Contacts.....	41
3.1 Introduction	41
3.2 Generation of Gap or Deformation at Active Contacts...	42
3.3 Interference Fit	43
3.4 Contact Deformation due to Fluid Pressure.....	53
3.5 Summary	55

Chapter 4	Computation, Results and Discussion on Deformations and Gaps at Active Contacts and some relevant Effects.....	57
4.1	Introduction.....	57
4.2	Computations on few sets of star-ring of ORBIT motors.	58
4.3	Deformation of ORBITAL units at ideal fit of Star-Ring (Set 5) with Fluid Pressure	70
4.4	Estimation of Deformation and Leakages at Active Contacts - FEM Approach	75
4.5	Summary.....	75
Chapter 5	Epilogue.....	77
5.1	General Conclusion.....	77
5.2	Observations and Results in brief.....	78
5.3	Scope of future work... ..	79
References	81
Appendix A1.1	LSHT Hydrostatic Transmission (HST) system	87
Appendix A2.1	Double Geometric Generations of Epitrochoid	93
Appendix A2.2	Equation of the Envelope of Unmodified Epitrochoid	95
Appendix A2.3	Phases in ORBIT Motor	97
Appendix A2.4	Flow Chart of Computational Methodology...	113

Appendix A2.5	FEM Approach to find Deformation at Active Contacts	115
Appendix A2.6	FEM Approach to find Deformation at Active Contacts	123
