| <b>1 Introduction and Literature Review</b>  | <b>1</b>  |
| 1.1 Introduction to jet . . . . .  | 2         |
| 1.2 Applications of jets . . . . .   | 4         |
| 1.3 Literature review . . . . .  | 4         |
| 1.3.1 Literature related to turbulent offset jet and wall jet flows in<br>the quiescent medium . . . . . | 4         |
| 1.3.2 Literature related to turbulent offset jet and wall jet flows in<br>an external stream . . . . .   | 8         |
| 1.3.3 Literature related to buoyancy-opposed jet flow . . . . .  | 10        |
| 1.3.4 Literature related to turbulent natural convection flow in a<br>cavity . . . . .                   | 12        |
| 1.4 Objectives of the present study . . . . .  | 15        |
| <b>2 Mathematical Formulation</b>  | <b>17</b> |
| 2.1 Introduction . . . . .   | 17        |

|       |  |    |
|-------|--|----|
| 2.2   | High-Reynolds number standard $k - \epsilon$ model and low-Reynolds number $k - \epsilon$ models . . . . . | 17 |
| 2.3   | Different turbulence models considered . . . . .   | 18 |
| 2.3.1 | Standard $k - \epsilon$ model . . . . .  | 18 |
| 2.3.2 | Lauder and Sharma model . . . . .  | 18 |
| 2.3.3 | Yang and Shih model . . . . .  | 19 |
| 2.3.4 | Low-Reynolds number $k - \omega$ model . . . . .   | 19 |
| 2.3.5 | Shear stress transport model . . . . .   | 20 |
| 2.4   | Governing equations for forced convection flow . . . . .   | 20 |
| 2.4.1 | Turbulent transport equations for standard $k - \epsilon$ model, YS model and LS model . . . . .           | 21 |
| 2.4.2 | Turbulent transport equations for SST model . . . . .  | 22 |
| 2.5   | Governing equations for natural convection flow in a cavity . . . . .                                      | 24 |
| 2.5.1 | Turbulent transport equations for YS model . . . . .   | 25 |
| 2.5.2 | Turbulent transport equations for SST model . . . . .  | 26 |
| 2.5.3 | Turbulent transport equations for the low-Reynolds number $k - \omega$ model . . . . .                     | 27 |
| 2.5.4 | Modeling of turbulent heat flux . . . . .  | 29 |
| 2.5.5 | Buoyancy production term . . . . .   | 30 |
| 2.6   | Governing equations for mixed convection flow . . . . .  | 30 |
| 2.6.1 | YS model . . . . .   | 30 |
| 2.7   | Numerical scheme and method of solution . . . . .  | 31 |

### **3 A Comparative Study of Flow Characteristics of Wall-bounded Jets Using Different Turbulence Models** **33**

|       |   |    |
|-------|---|----|
| 3.1   | Introduction . . . . .  | 33 |
| 3.2   | Boundary conditions . . . . .   | 34 |
| 3.3   | Results and discussion . . . . .                                      | 35 |
| 3.3.1 | Reattachment length and skin friction coefficient . . . . .           | 35 |
| 3.3.2 | Similarity solution . . . . .   | 38 |
| 3.3.3 | Velocity profile ( $u^+ - y^+$ ) . . . . .                            | 39 |
| 3.3.4 | Variation of local maximum axial velocity ( $U_{max}$ ) . . . . .     | 45 |
| 3.3.5 | Jet half-width ( $Y_{0.5}$ ) variation along $X$ -direction . . . . . | 48 |
| 3.3.6 | Moffatt vortices . . . . .  | 52 |
| 3.3.7 | Pressure distribution ( $P$ ) in the domain . . . . .                 | 53 |
| 3.3.8 | Reynolds shear stress ( $\frac{u'v'}{U_0^2}$ ) distribution . . . . . | 53 |
| 3.3.9 | Evolution of the momentum flux in the axial direction . . . . .       | 60 |
| 3.4   | Summary . . . . .   | 63 |
