<b>Abstract</b>	<i>vii</i>
<b>Acronyms</b>	<i>x-xiii</i>
<b>Contents</b>	<i>xiii-xv</i>
<b>Chapter 1. Introduction</b>	
1.0 Preamble	2
1.1 Aim	4
1.2 Scope	4
1.3 Methodology of the study	5
1.4 Structure of the Dissertation	7
<b>Chapter 2. Literature Review</b>	
2.1 Studies on the effect of land cover and urban geometries on urban microclimate	9
2.2 Landscape Metrics	10
2.3 Satellite based studies for analyzing land cover and surface temperature	12
2.3.1 Processing of satellite data	13
2.3.2 Estimation of surface temperature using satellite images	14
2.4 Numerical Models for Estimation of Surface Heat Balance and Thermal Comfort	14
2.5 Justification	18
<b>Chapter 3. Climate Analysis and Comfort Conditions in Kolkata</b>	
3.1 Introduction	20
3.2 The study area: city of Kolkata	21
3.2.1 Location	21
3.2.2 Climate of Kolkata	22

3.3	Human bio-meteorological assessment of the thermal environment	26
3.4	Physiologically Effective Temperature (PET)	27
3.5	Predicted Mean Vote (PMV)	30
3.6	Methodology adopted for thermal comfort study of Kolkata	33
3.7	Results and discussions	33
3.8	Conclusion	36
<b>Chapter 4. Surface Heat Fluxes</b>		
4.1	Introduction	39
4.2	Data acquisition and processing	40
4.2.1	Geometric correction	40
4.2.2	Atmospheric correction	41
4.3	Land cover patterns	41
4.4	Normalized Difference Vegetation Index (NDVI)	42
4.5	Vegetation fraction	48
4.6	Kauth Thomas Transform	48
4.7	Emissivity	52
4.8	Albedo	53
4.9	Computation of surface fluxes	53
4.9.1	Net radiation	55
4.9.2	Ground heat flux	58
4.9.3	Sensible heat flux	59
4.9.4	Latent heat flux	60
4.10	Results	60
4.10.1	Analysis of ground heat flux	60
4.10.2	Analysis of latent heat flux	61
4.10.3	Analysis of sensible heat flux	75
4.11	Conclusion	75
<b>Chapter 5. Morphological Analysis of Land Cover and Built Forms</b>		
5.1	Introduction	77
5.2	Selection of candidate sites for study	77
5.3	Generation of digital surface model	78
5.3.1	Extraction of building heights from high resolution images	78

5.4	Sky view factor (SVF)	81
5.4.1	Estimation of SVF	82
5.5	Volume to Surface Area Ratio (VbySA)	83
5.6	Characterization of spatial pattern and configuration using Landscape Metrics	84
5.6.1	Landscape Shape Index (LSI)	85
5.6.2	Area-Weighted Mean (AM_MN)	86
5.6.3	Fractal Dimension Index (FRAC)	87
5.6.4	Interspersion and Juxtaposition Index (IJI)	88
5.7	Conclusion	88
<b>Chapter 6. Results and Discussions</b>		
6.1	Introduction	90
6.2	Relationship of sensible heat to landcover fractions and built form	90
6.3	Sensitivity analysis	94
6.4	Conclusion	96
<b>Chapter 7. Summary, Conclusion and Recommendations</b>		
7.1	Summary	98
7.2	Conclusion	99
7.3	Recommendations	100
<b>References</b>		101-113
<b>Appendix</b>		
<b>A</b>	ASTER data characteristics	114
<b>B</b>	Scatter Plot diagram of dependant variable versus the sensible heat flux	115
<b>C</b>	Planck's Law, Emissivity, Radiant & Kinetic Temperature	119
