Abstract	xv
Contents	xvii
Chapter 1 Introduction	1
1.1 Inventory control	3
1.2 Analysis of deterministic and probabilistic inventory systems	9
1.3 Fuzzy set theory and related literature on fuzzy inventory models	13
1.3.1 Preliminary concepts of fuzzy set theory	13
1.3.2 Literature review on fuzzy inventory models	22
1.4 The fuzzy random environment and related inventory models	26
1.4.1 Fundamentals of fuzzy randomness	26
1.4.2 Literature review of fuzzy random inventory models	28
1.5 Motivation of the work	29
1.6 Our approach	31
1.6.1 Continuous review system	32
1.6.2 Periodic review system	34
1.6.3 Single period inventory models	36
1.7 Objective of the thesis	37
1.8 Organization of the thesis	38

Chapter 2	Periodic Review System with Fuzzy Random Variable Demand	41
2.1	Introduction	43
2.2	Methodology	45
2.2.1	Model and assumptions	45
2.2.2	Determination of expected shortage	48
2.2.3	Formulation of the total cost	50
2.2.4	Determination of the optimal solution	52
2.2.5	Safety stock factor	54
2.2.6	The algorithm	55
2.3	Numerical example	57
2.4	An illustration of a possible implementation of the model in a real life inventory problem	58
2.5	Concluding remarks	63
Chapter 3	A Fuzzy Random Mixture Inventory Model with Imprecise Chance Constraint	65
3.1	Introduction	67
3.2	Some fundamental concepts of imprecise chance constraint	69
3.3	Methodology	72
3.3.1	Model and assumptions	72
3.3.2	Determination of the expected shortage	75
3.3.3	Mathematical formulation of the expected total cost	77
3.3.4	Mathematical formulation of the constraint	79
3.3.5	Safety stock criterion	80
3.4	Numerical example	81
3.5	Concluding remarks	83

Chapter 4	A Fuzzy Random Periodic Review System with Variable Lead-time and Negative Exponential Crashing Cost	85
	4.1 Introduction	87
	4.2 Methodology	89
	4.2.1 Model and assumptions	89
	4.2.2 Determination of expected shortage	92
	4.2.3 Determination of total cost	93
	4.2.4 Determination of the optimal solution	95
	4.2.5 Safety stock	96
	4.2.6 The algorithm	98
	4.3 Numerical example	98
	4.4 Concluding remarks	102
 Chapter 5	 A Single Period Inventory Problem with Resalable Returns: A Fuzzy Random Approach	 103
	5.1 Introduction	105
	5.2 Some useful results	107
	5.3 Methodology	109
	5.3.1 Model and assumptions	109
	5.3.2 Mathematical formulation of the problem	111
	5.4 Numerical example	114
	5.5 Concluding remarks	116
 Chapter 6	 The Newsboy Problem: A Fuzzy Random Approach	 117
	6.1 Introduction	119
	6.2 Fuzzy inequality relation	121
	6.3 Methodology	124
	6.3.1 Model and assumptions	124

6.3.2 Mathematical formulation of the problem	129
6.4 Numerical example	130
6.5 Some concluding remarks	135
Chapter 7 Fuzzy Random Continuous Review Inventory System with Setup Cost Reduction and Quality Improvement	137
7.1 Introduction	139
7.2 Methodology	141
7.2.1 Model and assumptions	141
7.2.2 Determination of the expected shortage	143
7.2.3 Mathematical formulation of the problem	144
7.3 Numerical example	149
7.4 Concluding remarks	152
Chapter 8 Conclusions and Scope for Future Work	153
8.1 General conclusions of the thesis	155
8.2 Contribution of the thesis	156
8.3 Scope for future work	157
Bibliography	159
Curriculum Vitae	175
List of Publications	177
