Synopsis - 1

Chapter I

BOUNDARY-VALUE PROBLEMS OF ELASTICITY

- | | | |
|--|---|----|
| 1. Introduction | - | 1 |
| 2. Plane elastostatic problems, some methods of solution | | 4 |
| 3. Method of complex representation | - | 8 |
| 4. Solution by reduction to Hilbert problem | | 16 |
| 5. Statement of the problems solved | - | 20 |

Chapter II

STEADY ROTATION OF A THIN PLATE IN THE FORM OF AN EPITROCHOID

- | | | |
|----------------------------------|---|----|
| 6. Formulation of the problem | - | 22 |
| 7. Solution of the problem | - | 24 |
| 8. Case of two-cusped epicycloid | - | 28 |

Chapter III

BOUNDARY-VALUE PROBLEM FOR A CARDIOID UNDER DISCONTINUOUS BOUNDARY LOADINGS

- | | | |
|---|---|----|
| 9. Formulation of the problem | - | 30 |
| 10. Solution of the problem | - | 33 |
| 11. Concentrated forces on the boundary of a cardioid | | 36 |

Chapter IV

CONCENTRATED FORCES AND A COUPLE OPERATING IN THE PLANE OF A CURVILINEAR POLYGONAL PLATE

- | | | |
|---|---|----|
| 12. Formulation of the problem | - | 38 |
| 13. Solution of the problem | - | 40 |
| 14. Double force along x-axis | - | 48 |
| 15. Two equal and opposite forces along the y-axis acting in a dumbbell shape disc | | 53 |
| 16. Effect of two equal double forces with their axes along two perpendicular lines | | 60 |

Chapter V

Page No.

ON A CONCENTRATED FORCE AND A COUPLE
IN A PARABOLIC PLATE

17. Concentrated force in a parabolic plate	62
18. Reduction of the problem to Hilbert problem	64
19. Solution of the problem	67
20. Concentrated force at the vertex of the parabola	72
21. A couple operating at a point inside a parabolic plate	75

Chapter VIMIXED BOUNDARY-VALUE PROBLEMS FOR CERTAIN
REGIONS

22. Reduction of the mixed boundary-value problem to Hilbert problem	80
23. Mixed boundary problem for the cardioid	82
24. Equilibrium conditions	90
25. A numerical example	93
26. Mixed boundary-value problem when cross-section is the inverse of an ellipse	96
27. A numerical example	101
28. Mixed boundary-value problem for an infinite region with a triangular hole	104
29. A numerical example	108
Bibliography	113
