Chapter 1:

Introduction

1.1	General	1
1.2	Motivation of the work	4
1.3	The major objective	5
1.4	Lay out of the work	5

Chapter 2:

Literature Review

2.1	Introduction	7
2.2	Chronological development of C _F -SiC composites	7
2.3	Processing methods for ceramic matrix composites	12
	2.3.1 Chemical Vapor Infiltration	13
	2.3.2 Polymer Impregnation and Pyrolysis	16
	2.3.3 Liquid Silicon Infiltration	19
	2.3.4 Sol-Gel Method	21
2.4	Characterization of C _F -SiC composites	23
2.5	Appraisal of the present work	31

3.1	Introduction	33
3.2	Experimental procedure	35
3.2.1	Raw materials	35
3.2.2	Preparation of the solutions	35
3.2.3	Processing of ceramic powders: soft-solution approach	38
3.2.4	Characterization of the processed powders	39
3.2.4.1	Thermal analysis	39
3.2.4.2	X-ray diffraction studies	39
3.2.4.3	Examination of powder morphology	39
3.3	Results and Discussions	40
3.3.1	Selection of carbothermal reduction temperature	40
3.3.1.1	Thermal analysis of SiC green powder	40
3.3.1.2	Thermal analysis of ZrC green powder	44
3.3.1.3	Thermal analysis of 'SiC+ZrC' green powder	47
3.3.1.4	Thermal analysis of ZrB ₂ green powder	49
3.3.1.5	Thermal analysis of 'SiC+ZrB ₂ ' green powder	51
3.3.2	Determination of phases	55
3.3.2.1	XRD of SiC powder	55
3.3.2.2	XRD of ZrC powder	58
3.3.2.3	XRD of 'SiC+ZrC' powder	60
3.3.2.4	XRD of ZrB ₂ powder	61
3.3.2.5	XRD of 'SiC+ZrB ₂ ' powder	62
3.3.3	Morphology of the processed powders	64
3.4	Conclusions	66

Chapter 4:**Preparation of ceramic composites:
Soft-Solution Approach**

4.1	Introduction	67
4.2	Fabrication of composites	68
4.3	Characterization of composites	71
4.3.1	Density measurements	71
4.3.2	X-Ray diffraction	72
4.3.3	Microstructure	72
4.4	Results and Discussions	74
4.4.1	Density measurements: composites	74
4.4.2	X-ray diffraction analysis of composites	76
4.4.2.1	X-ray analysis of C _f -SiC composites	76
4.4.2.2	X-ray analysis of C _f -(SiC+ZrC) composites	77
4.4.2.3	X-ray analysis of C _f -(SiC+ZrB ₂) composites	79
4.4.2.4	X-ray analysis of C _f -(SiC+ZrO ₂) composites	81
4.4.3	Microstructure of composites	83
4.4.3.1	Microstructure of C _f -SiC composites	85
4.4.3.2	Microstructure of C _f -(SiC+ZrC) composites	89
4.4.3.2	Microstructure of C _f -(SiC+ZrB ₂) composites	92
4.4.3.3	Microstructure of C _f -(SiC+ZrO ₂) composites	95
4.4.3.4	On the potential of the suggested approach for the preparation of composites	98
4.5	Conclusions	99

Chapter 5:**Tensile behaviour of C_f-SiC composites**

5.1	Introduction	101
5.2	Evaluation of tensile properties	102
5.2.1	Materials	102

5.2.2	Specimen preparation	103
5.2.3	Tensile test	104
5.3	Results and Discussions	105
5.3.1	Estimation of tensile properties	105
5.3.2	Statistical analysis	105
5.3.3	Tensile behaviour of carbon tow	107
5.3.4	Tensile behaviour of C _f -SiC composites	110
5.3.5	Effect of carbothermal reduction temperature on tensile behaviour	114
5.3.6	Examination of fracture surfaces of C _f -SiC composites	116
5.4	Conclusions	120

Chapter 6:	Effect of second phase on tensile behaviour of C_f-SiC composites
-------------------	--

6.1	Introduction	123
6.2	Experimental	125
6.2.1	Materials	125
6.2.2	Tensile tests	125
6.2.3	Oxidation behaviour	125
6.3	Results and Discussions	126
6.3.1	Tensile stress-strain plots and tensile properties	126
6.3.2	Tensile behaviour of C _f -(SiC+ZrC) composites	136
6.3.3	Tensile behaviour of C _f -(SiC+ZrB ₂) composites	138
6.3.4	Tensile behaviour of C _f -(SiC+ZrO ₂) composites	141
6.4	Examination of fracture surfaces of composites	144
6.4.1	Fracture surfaces of C _f -(SiC+ZrC) composites	144
6.4.2	Fracture surfaces of C _f -(SiC+ZrB ₂) composites	146
6.4.3	Fracture surfaces of C _f -(SiC+ZrO ₂) composites	149
6.5	Oxidation behaviour of the composites	150

Chapter 7:	Concluding Remarks and Scope for Future Research
-------------------	---

7.1	Concluding Remarks	157
-----	--------------------	-----

7.2	Contributions	160
-----	---------------	-----

7.3	Future Scope of Work	160
-----	----------------------	-----

References	163
