Abstract	xii
Contents	xiv
Chapter-1 Introduction and State of Art	1
1.1 Practical relevance and general description	1
1.1.1 <i>Convective transport in microchannels</i>	1
1.1.2 <i>Some practical considerations</i>	8
1.2 State of Art	10
1.2.1 <i>Natural convection in microchannel</i>	10
1.2.2 <i>Forced convection in microchannel heat sink</i>	11
1.2.3 <i>Thin film evaporation in microchannel</i>	12
1.3 Aim and scope of the present work and outline of the thesis	13
1.3.1 <i>Natural (gaseous) convection in vertical microchannel</i>	13
1.3.2 <i>Forced (liquid) convection in microchannel heat sink</i>	14
1.3.3 <i>Thin film evaporation in microchannel</i>	14
Chapter-2 Natural Convection in Vertical Microchannel	17
2.1 Outline	17
2.2 Problem formulation	17
2.3 Results and discussions	20
2.4 Conclusions	26
Chapter-3 Forced convection in microchannel heat sink	29

3.1	Outline	29
3.2	Problem formulation	29
3.3	Results and Discussions	34
3.3.1	<i>Developed vs. developing flow</i>	35
3.3.2	<i>Effect of eccentricity of the heat source</i>	35
3.3.3	<i>Effect of footprint of the heat source</i>	36
3.3.4	<i>Effect of base thickness of microchannel heat sink</i>	37
3.3.5	<i>Effect of channel aspect ratio (α)</i>	38
3.3.6	<i>Effect of number of microchannels</i>	40
3.3.7	<i>Effect of coolant flow rate</i>	42
3.3.8	<i>Effect of heat sink materials</i>	42
3.3.9	<i>Comparison of analytical and experimental results</i>	43
3.4	Conclusions	44
Chapter-4 Thin film evaporation in microchannel		47
4.1	Outline	47
4.2	General mathematical formulation	48
4.3	Consideration of slope- and curvature-dependent disjoining pressure	52
4.4	Consideration for apparent slip	53
4.5	Consideration for real slip	56
4.6	Solution method	58
4.7	Results and discussions	59
4.7.1	<i>Traditional formulation</i>	59
4.7.2	<i>Slope- and curvature-dependent disjoining pressure</i>	65
4.7.3	<i>Apparent slip</i>	73
4.7.4	<i>Real slip</i>	77
4.8	Conclusions	80
4.8.1	<i>Traditional model</i>	80
4.8.2	<i>Slope- and curvature-dependent disjoining pressure</i>	80
4.8.3	<i>Apparent slip</i>	81
4.8.4	<i>Real slip</i>	81
