Abstract	xiii
Contents	xv
Chapter 1 Introduction and Summary	1
1.1 Introduction	1
1.2 A Review of Literature on Estimation of Measures of Reliability	3
1.2.1 Estimation of Reliability Function	3
1.2.2 Estimation of Hazard Rates and the Scale Parameters in Exponential Models	8
1.2.3 The Problem of Estimation After Selection	10
1.3 A Summary of the Results in the Thesis	13
Chapter 2 Some Basic Definitions and Results of Decision Theory	17
2.1 Decision Rules, Loss and Risk Functions, Admissibility and Minimality	17
2.2 Invariant Decision Problems	21
2.3 Improving upon Inadmissible Decision Rules	23
Chapter 3 Estimation of Reliability in An Exponential Series model	27
3.1 Introduction	27
3.2 Reliability Estimation for a Series System with Components from One Parameter Exponential Populations	29
3.2.1 Invariance	30
3.2.2 An Admissible Generalized Bayes Estimator	35

3.2.3	Numerical Comparisons	40
3.3	Reliability Estimation for a Series System with Components from Two Parameter Exponential Populations with a Common Location	48
3.3.1	Notations and Preliminaries	48
3.3.2	Deriving the UMVUE of θ	49
3.3.3	A Modified MLE	52
3.3.4	Numerical Comparisons	52
Chapter 4	Hazard Rate Estimation in Exponential Populations	61
4.1	Introduction	61
4.2	Estimating Hazard Rate of the First Population When the Pop- ulations have a Common Location	63
4.2.1	Some Basic Estimators	64
4.2.2	The Class of Affine Equivariant Estimators	70
4.2.3	The Class of Scale Equivariant Estimators	72
4.2.4	Estimation of λ_1 when $\mu \leq 0$	75
4.2.5	Numerical Comparisons	77
4.3	Simultaneous Estimation of Hazard Rates	83
4.3.1	Some Improved Estimators	85
4.3.2	The Class of Affine Equivariant Estimators	86
4.3.3	The Class of Scale Equivariant Estimators	89
4.4	Estimation of the Common Hazard Rate	95
4.4.1	Some Basic Estimators and the Best Affine Equivariant Estimator	96
4.4.2	A Class of Scale Equivariant Estimators	97
4.4.3	Numerical Comparisons	101
Chapter 5	Hazard Rate Estimation of Selected Exponential Populations	105
5.1	Introduction	105
5.2	Some Natural Estimators and an Admissible Class	106
5.3	Some Minimavity Results	110
5.4	A General Inadmissibility Result	113
5.5	Numerical Comparisons	115
Chapter 6	Reliability Estimation of the Selected Exponential Popula- tions	119
6.1	Introduction	119
6.2	Estimation of Reliability of a Selected Exponential Population .	120
6.2.1	Some Natural Estimators and the UMVUE	121
6.2.2	Some Minimavity and Admissibility Results	122
6.2.3	A General Inadmissibility Result	125

6.3	Simultaneous Estimation in the Selected Subset	128
6.3.1	The Natural Estimator and the UMVUE	129
6.3.2	Inadmissibility of the UMVUE and the Natural Estimator	129
6.3.3	Some Improved Estimators	132
6.3.4	Conclusion	135
6.4	Estimation of Reliability of a Selected Negative Exponential Population	136
6.4.1	Derivation of the UMVUE and Natural Estimators	137
6.4.2	Numerical Comparisions	138
	Conclusions and Scope of Future Work	143
	Bibliography	145
	List of Publications	155
