Acknowledgement	v
Contents	vi-xi
List of Symbols	xii-xiii
Abstract	xiv
Chapter 1 Introduction and Objectives	**1-26**
1.1 Introduction	1-8
1.1.1 Arsenic chemistry	2-4
1.1.2 Occurrence and mobilization of arsenic in groundwater	4-6
1.1.3 Health hazards of arsenic	6-8
1.1.4 Social impact of arsenicosis	8
1.2 Arsenic removal technologies	8-19
1.2.1 Oxidation	10
1.2.2 Chemical coagulation-precipitation and electrocoagulation	11
1.2.3 Ion Exchange	11
1.2.4 Membrane Technology	12
1.2.5 Adsorption	12-20
1.3 Laterite and treated laterite used as adsorbent in this study	20-22
1.4 Approaches to improve performances of adsorbent	22-24
1.5 Organization of experimental work	24-25
1.6 Aim/Objective of the current research	25-26
1.7 Organization of the thesis	26
Chapter 2 Application of raw laterite as arsenic adsorbent	**27-94**
2.1 Introduction	27-28
2.2 Experimental	28-36

Copyright IIT Kharagpur

2.2.1 Arsenic spiked water 28-29
2.2.2 Arsenic contaminated groundwater 29
2.2.3 Preparation of Adsorbent (Raw laterite) 29
2.2.4 Experimental Procedure 29-31
2.2.5 Conduction of adsorption experiments 31-32
2.2.6 Conduction of desorption experiments 32-33
2.2.7 Conduction of leaching study of KRL 33-34
2.2.7.1 Toxicity Characteristic Leaching Procedure (TCLP) 33-34
2.2.7.2 Synthetic landfill leachate (SSL) 34
2.2.8 Analysis 34-36
2.2.8.1 Adsorbent characteristics 34-35
2.2.8.2 Arsenic measurement 35-36
2.3 Results and discussions 36-94
2.3.1 Adsorbent characteristics 36-42
2.3.2 Isotherm study of As(III) and As(V) on RL 42-55
2.3.2.1 Selection of the operating conditions for the adsorption study of As(V) and As(III) using KRL as adsorbent 42-44
2.3.2.2 Effect of pH of the solution 44-46
2.3.2.3 Equilibrium studies 46-55
2.3.2.3.1 Arsenic adsorption isotherm on different RL samples 47-48
2.3.2.3.2 As(III) adsorption isotherm using RL adsorbent 48-52
2.3.2.3.3 As(V) adsorption isotherm 52-54
2.3.2.3.4 Arsenic adsorption isotherm using contaminated groundwater (CGW)/RL system 54-55
2.3.3 Kinetic study 56-62
2.3.3.1 As(III) adsorption kinetics 56-59
2.3.3.1.1 Order of adsorption kinetics of As(III) 57
2.3.3.1.2 Effect of Initial As(III) concentration 58
2.3.3.1.3 Effect of adsorbent dose on As(III) adsorption in the kinetic study 58-59
2.3.3.2 As(V) adsorption kinetics 59-62

Copyright IIT Kharagpur

2.3.3.2.1 Effect of the initial As(V) concentration 59-61
2.3.3.2.2 Effect of ionic strength on adsorption kinetic 61-62
2.3.3.2.3 Effect of Temperature on Adsorption Kinetics 62
2.3.4 Competitive ions effect on As(III)/As(V) adsorption 62-66
2.3.4.1 Anionic interference on As(III)/As(V) adsorption 62-64
2.3.4.2 Cationic interference on As(III)/As(V) ions adsorption 65
2.3.4.3 Mixed ions interference on As(III)/As(V) ions adsorption 65-66
2.3.5 Modeling of adsorption kinetics 67-77
2.3.5.1 Theory 67-70
2.3.5.2 Numerical Method 70-71
2.3.5.3 Experimental conditions for kinetic modeling 71
2.3.5.4 Estimated values of D_e and K_f 71
2.3.5.5 Parametric study 72-76
2.3.5.5.1 Effect of initial adsorbate concentration 72-74
2.3.5.5.2 Effect of temperature 75
2.3.5.5.3 Effect of Biot number 75
2.3.5.5.4 Effect of the mass of adsorbent to the solution volume 75-76
2.3.5.6 Arsenic adsorption kinetics of arsenic CGW on RL 77
2.3.6 Fixed-bed adsorption of As(III) and As(V) on RL 78-87
2.3.6.1 Mathematical analysis of fixed-bed experimental data 78-79
2.3.6.2 Adams-Bohart model 79-81
2.3.6.3 Design of adsorption column by the BDST model 81-82
2.3.6.4 Design of adsorption column for different inlet concentration 82-83
2.3.6.5 Design of adsorption column for different flow rate 83
2.3.6.6 Effect of the bed depth of the column 83
2.3.6.7 Effect of interruption of operation 83-85
2.3.6.8 Effect of inlet As(V) concentration 85-86
2.3.6.9 Quality of effluent water 87
2.3.7 Fixed-bed adsorption of arsenic on RL using CGW 87-88
2.3.8 Pressure drop develop in fixed-bed column 88
2.3.9 Desorption/leaching study of arsenic-loaded RL 89-93

Copyright IIT Kharagpur

2.3.9.1 Desorption study using alkali solution 89-90
2.3.9.2 Recycling of used adsorbent 91
2.3.9.3 Leaching study 91-93
2.3.9.3.1 Leaching effect of pH of solution on RL 91-92
2.3.9.3.2 Toxicity Characteristic Leaching Procedure (TCLP) 92
2.4 Conclusion 93-94

Chapter 3 Application of acid treated laterite as arsenic adsorbent 95-118

3.1 Introduction 95-96
3.2 Experimental and Method 96-99
3.2.1 Materials 96-97
3.2.1.1 Preparation of acid activated laterite 96-97
3.2.2 Experiment 97-99
3.2.2.1 Equilibrium study 97-98
3.2.2.2 Kinetic study 98
3.2.2.3 Fixed-bed study 98
3.2.2.4 Conduction of desorption experiments 98
3.2.2.5 Leaching study of AAL (0.2 N) and arsenic-loaded AAL(0.2 N) 98-99
3.2.3 Analysis 99
3.3 Results and discussion 99-118
3.3.1 Adsorbent characterization 99-104
3.3.2 Selection of acid concentration in acid activation step 104-105
3.3.3 Equilibrium studies 105-108
3.3.3.1 Arsenic adsorption using As(V)/As(III) spiked water 105-107
3.3.3.2 Arsenic adsorption using CGW 107-108
3.3.4 Kinetic study 108-112
3.3.4.1 Kinetic model 108-109
3.3.4.2 Effect of initial arsenic concentration 109
3.3.4.3 Effect of temperature 109-110
3.3.4.4 Effect of particle size 111
3.3.4.5 Adsorption kinetics using CGW 111-112

Copyright IIT Kharagpur

3.3.5 Competitive ions effect on As(III)/As(V) ions adsorption 112-114
3.3.5.1 Anionic interference on As(III)/As(V) ions adsorption 112-113
3.3.5.2 Cationic interference on As(III)/As(V) ions adsorption 113-114
3.3.6 Fixed-bed adsorption of arsenic 114-117
3.3.6.1 Regeneration of arsenic-loaded fixed-bed column and reuse for adsorption 117
3.3.7 Leaching study of fresh AAL(0.2 N) and arsenic adsorbed AAL(0.2 N) 117-118
3.3.7.1 Leaching effect of pH of solution on AAL(0.2 N) 117-118
3.4 Conclusion 118

Chapter 4 Application of TL as arsenic adsorbent 119-170

4.1 Introduction 119-120
4.2 Experimental and Method 120-126
4.2.1 Materials 120-122
4.2.1.1 Preparation of acid-base treated laterite 121-122
4.2.2 Experiment 122-125
4.2.2.1 Equilibrium study 122-123
4.2.2.2 Fixed-bed study 123-124
4.2.2.3 Household column filter design 124
4.2.2.4 Conduction of desorption experiments 124-125
4.2.2.5 Leaching study of TL and arsenic-loaded TL 125
4.2.3 Analysis 126
4.3 Results and discussion 127-169
4.3.1 Optimization of treatment conditions 127-128
4.3.2 Adsorbent characterization 128-142
4.3.2.1 Characterization of KTL 128-139
4.3.2.2 Characterization of KTL, BTL, PTL1, and PTL2 treated at optimal condition 139-142
4.3.3 Batch mode arsenic adsorption on treated laterite 142-169
4.3.3.1 Effect of treatment parameters on arsenic adsorption isotherm 142-144

Copyright IIT Kharagpur

4.3.3.2 Comparison of adsorption capacity of TL with other adsorbents 144-147
4.3.3.3 Isotherm of binary adsorbate system 148-149
4.3.3.4 Comparison of arsenic adsorption performance using adsorbent KTL, BTL, PTL1, and PTL2 149-150
4.3.3.5 Effect of pH on adsorption isotherm 150-152
4.3.3.6 Effect of treatment parameters on arsenic adsorption kinetics 153-155
4.3.3.7 Kinetic modeling of TL/arsenic system 155-157
4.3.3.7.1 Estimated values of D_e and K_f for single arsenic system 155-156
4.3.3.7.2 Shrinking core model applied to system containing both arsenic species 156-157
4.3.3.8 Effect of other ions on As(III) and As(V) adsorption 158-159
4.3.3.9 Fixed-bed column study 159-174
4.3.3.9.1 Fixed-bed column study using As(V) and As(III) spiked distilled water and CGW 159-162
4.3.3.9.2 Fixed-bed modeling 162-171
4.3.3.9.2.1 Thomas and Wheeler-Jonas fixed-bed modeling 165-167
4.3.3.9.2.2 Thomas and W-J model predicted breakthrough behavior 167-171
4.3.3.9.3 Regeneration and reuse of TL fixed-bed in column run 171
4.3.3.9.4 Comparison of fixed-bed column performance between TL and activated alumina bed using CGW 171-172
4.3.3.9.5 Pressure drop develop in fixed-bed column 172-173
4.3.3.9.6 Household filter performance 173-174
4.3.3.10 Leaching study of fresh TL arsenic adsorbed TL 174-175
4.3.3.10.1 Leaching effect of pH of solution on TL 174
4.4 Conclusions 175-176

Chapter 5 Conclusions and perspective of future work 177-178
