Abstract		xv
Contents		xvii
Chapter 1	Introduction	1
	1.1 General Introduction	1
	1.2 Objective of the Present Work	2
	1.3 Outline of the Thesis	3
Chapter 2	Literature Review	5
Chapter 3	Wave-Modeling and Ship Performance in Waves	15
	3.1 Introduction	15
	3.2 Numerical Wave Models	16
	3.2.1 Background of WAM	19
	3.2.2 Brief description of WAM	20
	3.2.3 Spectral representation of ocean waves	25
	3.2.4 Directional spectral representation of ocean waves	29
	3.3 Ship Performance in Waves	31

3.3.1	Speed reduction curves	31
3.3.2	Total resistance for weather routing application	32
3.3.3	Ship behavior in rough weather and voluntary speed reduction	42
3.4	Summarizing Remarks	45
Chapter 4	Development of the Basic Algorithm for Ship Routing	49
4.1	Introduction	49
4.2	Programming Approach to the Ship Routing Problem	53
4.2.1	Dijkstra's algorithm	56
4.2.2	Framework of Dijkstra's algorithm	60
4.2.3	Implementation of Dijkstra's algorithm	62
4.2.4	Discretization of the space domain	70
4.2.5	Possible movements of a ship	73
4.3	Ship Route Optimization	75
4.3.1	Evaluation of weights for route optimization	77
4.3.2	Results	87
4.4	Summarizing Remarks	113
Chapter 5	Further Developments and Considerations of Practical Constraints	115
5.1	Introduction	115
5.2	Presence of Land Masses	115
5.3	Handling of 'Non-Navigable' Waters	123
5.4	Voluntary Speed Reduction	127
5.5	Smoothness of the Trajectory	140

5.6 Consideration of Current and Wind Effects	142
5.6.1 Current effects	142
5.6.2 Wind effect and consideration of storm	143
5.7 Consideration for Changing Wave Conditions	149
5.8 Other Factors for Ship Weather Routing	181
5.9 Summarizing Remarks	182
Chapter 6 Concluding Remarks	185
6.1 Conclusions	185
6.2 Scope of Future Work	187
References	189
Curriculum Vitae	197
