Abstract		xx
Chapter 1	Introduction	1-17
1.1	Plastics	1
1.2	The solution for plastics: Biodegradable polymer	3
1.3	Polyhydroxyalkanoates (PHAs)	4
1.3.1	General structure	5
1.3.2	Types of PHAs	6
1.3.3	Possible applications of PHAs	7
1.3.4	Biosynthetic pathways of PHAs	8
1.4	Importance of P(3HB- <i>co</i> -3HV) co-polymer	10
1.5	PHAs production by bacterial fermentation	11
1.6	Production of PHAs by transgenic plants	12
1.7	Cyanobacteria as production hosts	14
1.8	Occurrence of PHAs in cyanobacteria	14
1.9	Aim and objectives	17
Chapter 2	Materials and Methods	18-29
2.1	Microorganism and growth conditions	18
2.1.1	Culture vessels	19

2.1.2	Sterilization	19
2.1.3	Cloning and purification	19
2.1.4	Strain maintenance in slants	20
2.1.5	Maintenance of batch cultures	20
2.1.6	Photobioreactor study	20
2.2	Growth measurement	21
2.3	Extraction of polyhydroxyalkanoates (PHAs)	21
2.4	Detection and quantification of PHAs	21
2.4.1	Gas chromatographic analysis	21
2.4.2	Spectrophotometric assay of poly- β -hydroxybutyrate (PHB)	23
2.4.3	Fourier-Transform Infrared (FT-IR) analysis	23
2.4.4	Nuclear Magnetic Resonance (NMR) analysis	23
2.4.5	Gas Chromatographic-Mass Spectroscopy (GC-MS) analysis	23
2.5	Optimization of polymer production by Response Surface Methodology (RSM)	24
2.6	Statistical analysis	29
Chapter 3	Evaluation of cultural and nutritional conditions for accumulation of poly-β-hydroxybutyrate in <i>Synechocystis</i> sp. PCC 6803	30-62
3.1	Introduction	30
3.2	Materials and methods	33
3.2.1	Detection and quantification of PHAs	33
3.2.2	Confirmatory study	33
3.2.3	Impact of pH, temperature and light-dark cycles	33
3.2.4	Impact of spectral quality	34
3.2.5	Impact of vitamins and combined nitrogen sources	34

	3.2.6	Studies on nutrient deficiency	34
	3.2.7	Impact of abiotic stresses	35
	3.2.8	Impact of mixotrophy	36
	3.2.9	Interaction of mixotrophy with N-/ P-deficiency	36
	3.2.10	Impact of chemoheterotrophy	36
	3.2.11	Effect of gas-exchange limitation	36
	3.3	Results	37
	3.3.1	Detection and quantification of PHAs	37
	3.3.2	Confirmatory study for the presence of PHB	37
	3.3.3	Accumulation of PHB in relation to growth	42
	3.3.4	Effects of various physical and nutritional parameters on PHB accumulation	42
	3.4	Discussion	56
Chapter 4		Optimization of conditions for production of poly-β-hydroxybutyrate using response surface methodology	63-80
	4.1	Introduction	63
	4.2	Materials and methods	66
	4.2.1	Experimental design	66
	4.2.2	Statistical analysis	67
	4.2.3	Validation of the model	68
	4.3	Results	68
	4.3.1	Developing the regression model	68
	4.3.2	Model adequacy assessment	71
	4.3.3	Optimization of process	73
	4.3.4	Validation of the model	75
	4.3.5	Time-course of PHB accumulation under optimized condition	76

	4.4	Discussion	77
Chapter 5		Accumulation and mobilization of poly-β-hydroxybutyrate in <i>Synechocystis</i> sp. PCC 6803	81-96
	5.1	Introduction	81
	5.2	Materials and methods	82
	5.2.1	Metabolic inhibitors	83
	5.2.2	Mobilization of PHB	83
	5.3	Results	83
	5.3.1	Impact of uncouplers	83
	5.3.2	DCMU supplementation under phosphate deficiency	85
	5.3.3	Effect of 2,3-butanedione	86
	5.3.4	Mobilization of PHB in <i>Synechocystis</i> sp. PCC 6803	88
	5.3.5	Effect of illumination and dark incubation on PHB mobilization	89
	5.3.6	P-deficiency and PHB mobilization	90
	5.3.7	Mobilization of PHB in presence of glucose and acetate	90
	5.4	Discussion	92
Chapter 6		Biosynthesis and characterization of P(3HB-co-3HV) co-polymer in <i>Synechocystis</i> sp. PCC 6803	97-121
	6.1	Introduction	97
	6.2	Materials and methods	98
	6.2.1	Experimental conditions	98
	6.2.2	Conversion of valeric acid to sodium valerate	98
	6.2.3	TLC analysis	99
	6.2.4	PHA quantification	99

6.2.5	Casting of films	99
6.2.6	Sample preparation for mechanical tests	99
6.2.7	Scanning electron microscopy (SEM)	100
6.2.8	Crystalline structure	100
6.2.9	Differential scanning calorimetry (DSC)	100
6.2.10	Thermogravimetric analysis (TGA)	101
6.3	Results	101
6.3.1	Detection of P(3HB- <i>co</i> -3HV) co-polymer in <i>Synechocystis</i> sp. PCC 6803	101
6.3.2	Confirmatory study for the P(3HB- <i>co</i> -3HV) copolymer	103
6.3.3	Time-course of P(3HB- <i>co</i> -3HV) accumulation	106
6.3.4	P(3HB- <i>co</i> -3HV) yield at varied propionate/valerate concentrations	107
6.3.5	P(3HB- <i>co</i> -3HV) co-polymer production under optimized condition	109
6.3.6	Characterization of P(3HB- <i>co</i> -3HV) co-polymer	109
6.4	Discussion	117
	Summary and conclusions	122-125
	Future scope of research	126
	References	127-144
	Appendix
