<i>Chapter 1</i> INTRODUCTION	1
1.1 General	1
1.2 Need for the Present Study	4
1.3 Objective and Scope of the Work	4
1.4 Organisation of the Thesis	5
<i>Chapter 2</i> LITERATURE REVIEW	6
2.1 Introduction	6
2.2 Development of Geocell System	6
2.3 Use of Geocell in Sub-surface Layers	6
2.4 Use of Geocell in Surface Layer	7
2.5 Equivalent Elastic Modulus of Cell-filled Concrete Layer	10
2.6 Summary	10
<i>Chapter 3</i> DETAILS OF TEST SECTIONS	12

3.1 Introduction	12
3.2 Materials Used for Construction of Cell-Filled Pavements	12
3.2.1 Plastic Cell	12
3.2.2 Cement	14
3.2.3 Sand	14
3.2.4 Soil	14
3.2.5 Moorum Subbase	16
3.2.6 Laterite Boulder Subbase	17
3.2.7 Crushed Aggregate for Subbase and Surface Layer	17
3.2.8 Soil-Cement mix for Subbase and Surface Layer	19
3.2.9 Sand-Cement mix for Surface Layer	20
3.2.10 Roller Compacted Concrete	21
3.2.11 Grouted Concrete	21
3.2.12 Conventional Concrete	22
3.3 Construction of Test Sections	22
3.3.1 Preparation of Subgrade	22
3.3.2 Construction of Subbase	24
3.3.3 Construction of surface layer	26
3.4 Concluding Remarks	30
Chapter 4 STRUCTURAL EVALUATION OF PAVEMENT SECTIONS	31
4.1 Introduction	31
4.2 Salient Features of Fwd	31
4.3 Data Acquisition System	33
4.3.1 Load Measuring Unit	33
4.3.2 Deflection Measuring Unit	33
4.3.3 LabVIEW 8.0 Software	33

4.4 Calibration of Sensors	35
4.4.1 Calibration of Load Cell	35
4.4.2 Calibration of Geophones	35
4.5 Structural Evaluation of Test Sections	36
4.5.1 Structural evaluation using FWD	37
4.5.2 Structural evaluation using Benkelman beam	39
4.6 Accelerated Loading of Test Sections	42
4.7 Backcalculation of Layer Moduli	54
4.8 Concluding Remarks	57
Chapter 5 DEVELOPMENT OF 3-D FINITE ELEMENT MODEL FOR CELL-FILLED PAVEMENTS	58
5.1 Introduction	58
5.2 Model Geometry	58
5.3 Elements Used in Modeling	60
5.4 Meshing	62
5.5 Analysis of a Typical Pavement	63
5.6 Evaluation of Typical Coefficient of Friction Value for Cell Layer	65
5.7 Equivalent Modulus of Cell-Filled Layer	68
5.8 Effect of Layer Stiffness on the Behavior of Cell-Filled Pavement	71
5.9 Concluding Remarks	74
Chapter 6 DESIGN OF CELL-FILLED PAVEMENTS	75
6.1 Introduction	75
6.2 Design of Cell-Filled Pavement	75
6.3 Comparison of Pavement Cost	80
6.3.1 Construction Cost	82
6.3.2 Maintenance Cost	83

6.4 Concluding Remarks	84
Chapter 7 CONCLUSIONS AND SCOPE FOR FUTURE WORK	85
7.1 Important Findings / Conclusions from the Present Study	85
7.2 Scope for Future Study	86
REFERENCES	87
