Nomenclature	vii
List of abbreviation	x
Abstracts	xi
Contents	xiii
List of figures	xvi
List of tables	xx
Chapter 1: Introduction	1
1.1 Objectives of the present research work	3
Chapter 2: Literature Review	5
2.1 Powder, binder and Feedstock attributes	8
2.2 Tooling for injection stage of PIM	14
2.3 Injection moulding stage of PIM	16
2.4 Debinding stage of PIM	18
2.5 Sintering stage of PIM	20
2.6 Problems and defects related to injection stage of PIM	23
2.7 Modeling and Simulation of injection stage of PIM	25
2.8 Scope of work	31
Chapter 3: Experimental Work	33
3.1 Feedstock Preparation	33
3.2 Characterization	34
3.2.1 Critical Solids loading	34
3.2.2 Powder particle size and shape Analysis	34
3.2.3 Viscosity	35
3.2.4 DSC Studies	35

3.2.5	TGA Studies	35
3.2.6	Thermal conductivity	35
3.3	Injection Moulding	36
3.3.1	Phase Segregation	40
3.4	Debinding	40
3.5	Sintering	41
3.6	Properties	41
3.6.1	Density	41
3.6.2	Mechanical Properties	41
Chapter 4: Mathematical Formulation		43
4.1	Governing equations	44
4.2	Solidification model	47
4.3	Discretization	51
4.3.1	Discretization of the momentum equation	52
4.3.2	Pressure interpolation	55
4.3.3	Discretization of the continuity equation	56
4.3.4	Pressure-velocity correction using Phase coupled Semi implicit Pressure Linked Equation (SIMPLE) algorithm	57
4.3.5	Discretization of the energy equation	61
4.3.6	Discretization of the scalar transport equation	63
4.4	Boundary Conditions	64
4.4.1	Velocity inlet boundary condition	65
4.4.2	Pressure outlet boundary condition	66
4.4.3	Wall boundary conditions	66
4.5	Numerical procedure	67
Chapter 5: Results and Discussion		69
5.1.	Characterization	69
5.1.1	Critical powder loading	70
5.1.2	Particle size and shape	71
5.1.3	Specific heat, thermal conductivity and density of powder	73

	5.1.4 DSC Studies of binder and feedstock	74
	5.1.5 Thermal conductivity and density of binder and feedstock	78
	5.1.5.1 Thermal Conductivity	78
	5.1.5.2 Density	79
	5.1.6 Thermal Expansion coefficient of binder	80
	5.1.7 TGA studies	82
	5.1.7 Viscosity	83
	5.1.7.1 Binder viscosity	84
	5.1.7.2 Feedstock viscosity	89
	5.1.7.3 Powder viscosity	91
5.2	Validation	92
	5.2.1 Grid independence test	92
	5.2.2 Comparison of injection pressure	94
	5.2.3 Mould filling time and temperature prediction	100
	5.2.4 Shear strain rate and Pressure profile during injection of feedstock	108
	5.2.5 Temperature prediction during solidification of feedstock	110
	5.2.5 Prediction of phase segregation after solidification of feedstock and effect of injection temperature on phase segregation	112
	5.2.5.1 Effect of mould temperature on phase segregation	118
	5.2.5.2 Effect of injection speed on phase segregation	119
	5.2.6 Validation of simulated phase segregation with experimental results	121
5.3	Debinding	139
5.4	Sintering	145
Chapter 6: Conclusions		149
References		153
