Synopsis	(i)	
Introduction	1	
CHAPTER I		
BENDING OF THIN PLATES		
Art.		
1.1	The basic analogy and the part derivation of the secondary solution	17
1.2	Statement and the method of solution of the problem	20
1.3	Right-angled isosceles triangle with one of the equal sides clamped	24
1.4	Right-angled isosceles triangle with the hypotenuse clamped	33
1.5	Right-angled triangle containing an angle of 30° with the greater of the sides containing the right-angle clamped	35
1.6	Equilateral triangle with one side clamped	48
CHAPTER II		
TWO EIGENVALUE PROBLEMS		
2.1	Statement and the formulation of the problem	60
2.2	Solution of the problem	62
2.3	Derivation of the characteristic equation	65
2.4	Particular cases	68
CHAPTER III		
A THERMO-ELASTIC PROBLEM		
	81	
Bibliography	87
