Abstract	xv
Contents	xvii
Chapter 1 Introduction	1
1.1 Introduction	1
1.2 Estimation of ultimate strength	2
1.3 Shortcomings in available methods	2
1.4 Scope and objective of the present investigation	4
1.5 Outline of the thesis	5
Chapter 2 Literature review	7
2.1 Introduction	7
2.2 Ultimate strength of ship hull girder	8
2.2.1 Simple methods	9
2.2.1.1 Caldwell's method	9
2.2.1.2 Improvements on Caldwell's method	10
2.2.2 Advanced methods	11
2.2.2.1 Progressive collapse analysis	11
2.2.2.2 Finite Element Method (FEM)	14
2.2.2.3 Idealized Structural Unit Method (ISUM)	14
2.3 Analysis of un-stiffened plate	15
2.3.1 Statistics of initial imperfections	16
2.3.2 Modeling of initial imperfections	17
2.3.2.1 Initial deflection	17
2.3.2.2 Welding residual stresses	19
2.3.3 Effect of initial imperfections	21
2.3.4 Probabilistic approach	25
2.4 Analysis of stiffened plate	27
2.4.1 Methods of analysis	28
2.4.2 Modeling of stiffened plates	28
2.4.3 Number of span for analysis	30
2.4.4 Initial imperfections	31
2.4.5 Modes of failure	32
2.4.6 Rotational restraints (Boundary conditions)	33
2.5 Corrosion in ship hull girder	34
2.5.1 Statistics of corrosion wastage	34
2.5.2 Effect of corrosion on ultimate strength	35
2.5.3 Corrosion modeling as a function of time	37
2.6 Summary	42

Chapter 3	Effect of initial imperfections	
3.1	Introduction	45
3.2	Simplified incremental-iterative method	45
3.3	Stress-strain (σ - ε) relationships	49
3.3.1	Stress-strain curves under tensile load	50
3.3.2	Stress-strain curves for plate element under compressive load	51
3.3.2.1	Membrane stress theory	52
3.3.2.2	Rigid-plastic mechanism theory	57
3.3.2.3	Numerical examples	60
3.3.3	Stress-strain relationship for stiffened plate	61
3.3.3.1	Beam column buckling	63
3.3.3.2	Torsional buckling (Tripping)	64
3.3.3.3	Web local buckling of flanged stiffeners	66
3.3.3.4	Web local buckling of flat bars	67
3.4	Numerical examples: Effect of initial imperfections on ultimate strength	69
3.5	Random initial imperfections	76
3.5.1	Random initial deflection amplitude	76
3.5.2	Random welding residual stresses	77
3.5.3	Statistical dependence	78
3.6	Random material yield strength	79
3.7	Numerical examples: Probabilistic estimation of effective width	79
3.8	Numerical examples: Probabilistic estimation of hull girder ultimate strength	80
3.8.1	Effect of random initial imperfections	80
3.8.2	Effect of random material yield strength	82
3.8.3	Combined effect of random material yield strength and random initial imperfections	84
3.9	Contribution and discussion	87
Chapter 4	Effect of corrosion	
4.1	Introduction	91
4.2	Data collection and organization	92
4.3	Time dependent random corrosion growth	98
4.4	Spatial aspects of random corrosion growth	109
4.5	Numerical examples: Ultimate strength under random corrosion loss	115
4.6	Contribution and discussion	116
Chapter 5	Conclusions and future scope of study	
5.1	Conclusions	117
5.2	Future scope of study	118
